# RESULTS OF EXAMINATION OF CANDIDATES FOR APPOINTMENT AS DEPUTY MAGISTRATES-COLLECTORS, AND SUB-DEPUTY COLLECTORS.

## RESOLUTION—No. 101A—D. APPOINTMENT, DEPT.

Dated Darjeeling, the 22nd May 1893.

#### READ-

The Resolution of the 25th May 1892, reviewing the result of the examination held in March of that year, and appointing candidates to be probationers in the Executive Branch of the Provincial and Subordinate Civil Service.

The notification of the 15th November 1892, publishing rules for the examination for admission to the Executive Branch of the Provincial and Subordinate Civil Service of 1893.

The reports of the Examiners at the examination held on the 27th, 28th, 29th, and 30th March 1893.

As the result of the examination for the Subordinate Executive Service held in 1892, five gentlemen were selected to officiate as Deputy Magistrates and Deputy Collectors, twenty to be Probationary Deputy Magistrates and Deputy Collectors, and ten to be Probationary Sub-Deputy Collectors. The twenty Probationary Deputy Collectors have in due course been appointed to be Officiating Deputy Magistrates and Deputy Collectors, and the ten Probationary Sub-Deputy Collectors have also been absorbed either as substantive pro tempore or as Officiating Sub-Deputy Collectors of the 4th grade. The Lieutenant-Governor is glad to say that the report furnished by their official superiors of the working of these probationary officers has been satisfactory.

2. In November last it was notified that at an examination to be held in March 1893, seven candidates would be selected for Probationary Deputy Collectorships on a salary of Rs. 50 a month, and seven for Probationary Sub-Deputy Collectorships on a salary of Rs. 30 a month respectively. It was announced that four of the probationers for Deputy Collectorships would be appointed from the first four candidates on the list in order of merit, that three would be selected by the Lieutenant-Governor from amongst those who have obtained a minimum of one third of the total marks, and that from the remainder of those qualified by obtaining one-third of the total marks, the Lieutenant-Governor would select seven more candidates as probationers for Sub-Deputy Collectorships.

3. The examination so notified was held on the 27th, 28th, 29th, and 30th of March 1893. No fewer than 154 competitors obtain one-third marks. (of whom all except eight* were graduates) actually appeared and sent in papers. Of these 147 candidates, 125 took up Bengali as their vernacular, 18 took up Hindi or Hindustani, and four took up Uriya. No less than 134 of the candidates have obtained the minimum of one-third marks necessary for appointment into the Subordinate Executive Service by nomination.

- 4. Further consideration of the number of probable retirements during the present year, and of the number of vacancies which are likely to be occasioned by the deputation of officers on settlement or other special duty, has shown that the number of advertised vacancies is not sufficient, and the Lieutenant-Governor has accordingly been pleased to direct that the number of Probationary Deputy Collectorships to be now filled up shall be raised from 7 to 10, and the number of Probationary Sub-Deputy Collectors from 7 to 14. In order to avoid a block among the Probationary Sub-Deputies, the Lieutenant-Governor has also decided to select ten officers from that class during the year to officiate as Deputy Collectors, the choice being made with reference to character, qualifications, standing in the service, and the result of the competitive and departmental examinations.
- 5. The following Sub-Deputy Collectors, who passed 5th, 8th, 13th, 22nd and 25th respectively at the recent examination, will now be promoted to officiate at once as Deputy Collectors:—

Babu Jotendra Mohan Sinha, B.A.

" Lolit Chundra Das Gupta, B.A.

" Makhun Lall Chatterjee, M.A.

" Akshoy Kumar Sen, B.A.

Mr. Rowland Nogendra Lall Chandra, M.A.

6. The following four gentlemen, who stood first in order of merit, are entitled to appointments as Probationary Deputy Collectors:—

			N	umber of marks.
Babu Debendra Kumar Mittra, M.A.	•••	•••	•••	518
" Nogendro Nath Dutt, M.A.	•••	•••	•••	516
" Bepin Bihary Banerjee, м A.	•••		•••	508
" Jyotish Chunder Sen, B.A.	•••	•••	• • •	<b>502</b> .

The number of candidates to be selected by the Lieutenant-Governor from among those who have obtained one-third marks is raised from three to six. The choice has been carefully made with reference to the number of marks obtained, the claims upon Government of members of the candidate's family, the interests of the different classes of the community, and the requirements of the public service. The following are the candidates selected for appointment as Probationary Deputy Collectors:—

Babu Jogeshwar Biswas, B.I..
,, Brij Bansi Sahai M.A., B.L.
Maulvi Mahomed Yusaf Ali, B.A.
Babu Mati Lal Roy, B.A. (No. I).
Mr. L. J. Clarke, B.A. (Oxon).
,, R. B. Bainbridge.

All these probationary officers will receive a salary of Rs. 50 per mensem, and if the report from the districts in which they are stationed is favourable,

they will, after such period of probation as may seem advisable, be appointed to be Officiating Deputy Magistrates and Deputy Collectors as vacancies occur. They will not ordinarily be vested with magisterial powers until they are so appointed. Separate orders will now be passed posting all the gentlemen above named to districts.

7. The following are the 14 candidates selected by the Lieutenant-Governor from among those who have obtained one-third marks to be Probationary Sub-Deputy Collectors:—

Babu Hem Kumar Mullick, BA.

" Himangshu Nath Chuckerbutty, M.A., Chintaharan Chatterjee, B.A.

,, Chintaharan Chatterjee, B.A. ,, Charu Chundra Kumar, B.L. ,, Paramesh Prasanna Roy, B.A. ,, Harendro Nath Bancrjee, M.A.

,, Harendro Nath Banerjee, M.A., Hara Krishma Mahanti, B.A.

" Monmotho Nath Sirear, M.A., B.L. " Bhupendra Nath Gupta, B.A. " Rai Krishna Baladur, B.A.

;, Rai Krishna Bahadur, B.A., Rama Ballabh Migra, M.A. Maulvi Syed Abdul Salek, B.A.

Mohamed Habibar Rahman, B.A.

, Syed Ali Mazhar, B.A.

The probationary officers will receive a salary of Rs. 30 per mensem at present, and will, if they are satisfactorily reported on, be gradually absorbed into the fourth grade of Sub-Deputy Collectors as vacancies occur. Separate orders will at once be passed posting them to districts.

ORDER-Ordered that the above Resolution be published in the Calcutta Gazette.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Govt. of Bengul.

#### Rainfall, Weather, and State and Prospects of the Crops.

Explanation. —... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space in left blank. If any of the returns are inch of rain has allen.

With reference to the column of rainy days, the definition of a rainy day is when at least CALCUTTA, the 30th May 1893

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 27TH MAY 1893.

Throughour the greater part of the week weather in the north of the Bay, and latterly in Lower Bengal, has been under the influence of a depression which appears to have commenced in the extreme south of the Bay some days before, and taking an almost northerly course up the Bay, began to affect the general weather conditions on the north-west coast on

Saturday, the 20th, the last day of the previous week.

On the 17th, as for some days before that, the conditions which are supposed to lead up to and initiate stormy weather in the Bay were unusually well marked, viz., very uniform pressure with light winds and cloudless skies. The change from these conditions began to appear in the south of the Bay in steeper gradients, and by the northward advance of a moist current in the east of the Bay, giving heavy rain in Burma and Arskan. The storm was then probably not well defined, but in any case the centre of the disturbance must have been too far from any of the observatories on the coast for its position to have been even guessed at, far less determined. The only information to hand regarding its early history is from the log-book of the S. S. Char of Cambridge, which left Ceylon on the 17th, and passing through the disturbance reached the head of the Bay on the 20th. At first a gale from the south was experienced, and afterwards from the north-east, while pressure was very unsteady. The bad weather was left behind, and in the extreme north of the Bay ordinary weather prevailed.

On Sunday, the 21st, the first day of the week under review, after a steady fall of pressure for several days all round the coast, a depression was shown covering the whole of the north of the Bay, but it had not then begun to cause had weather at any of the metcorological stations. The sea was very rough at Diamond Island, and a fairly strong wind was blowing, but after a day or two both wind and sea began to moderate. When this improvement was established at Diamond Island, the depression had become better defined in the north-west of the Bay, and it then appeared that the disturbance was similar in character

to the ordinary small storms which occur frequently in the rainy season.

On Monday, the 22nd, pressure was rising briskly in the south-east of the Bay and changes were small everywhere, while wind velocity was low except at Diamond Island and in Ceylon. After this, however, its motion was slow towards the north, the centre probably passing in an almost northerly direction, and at no great distance from the North Orissa Coast. On Tuesday, the 23rd, pressure fell rapidly at False Point, the wind remaining north-easterly until the evening, when communication with the station ceased. Pressure had fallen to 29 inches, and this fall was accompanied by a strengthening wind and incessant heavy rain. At 8 A.M. on Wednesday morning the centre appeared to be almost east of False Point, and wind velocity was increasing at all the stations on the north-west coast, as well as over all Lower Bengal, but rainfall, though very heavy in Orissa, and gradually extending to South-West Bengal, was very partial at stations further inland or entirely absent. During Wednesday and Thursday the motion of the depression must have been very slow, and at times it appeared to be almost stationary, but it was steadily developing. On the afternoon of Thursday it seemed to be moving in a more westerly direction, so as to pass well to the west of Balasore, as the wind directions at Saugor Island, Calcutta and Balasore began to change to south through east, and the velocity fell considerably at the first two. In the evening of Thursday, however, the winds returned to their previous north-easterly directions and began to increase rapidly in strength. On the near approach of the centre, pressure fell with great rapidity at Saugor Island, the lowest reading reported being at 5 o'clock on Friday morning, when it was 28 423 inches. The centre must then have been a short distance to the west of Saugor Island. A hurricane began about 4 A.M., and continued for many hours. At 5 A.M. the velocity was reported to be not less than 90 miles an hour, and the centre moved more to the west, passing about half way between Calcutta and

The weather in Lower Bengal was necessarily very unsettled during the last half of the week. Strong cyclonic winds were blowing at all stations, and a good deal of rain was falling; but in Bihar and North Bengal fine weather continued till the end of the week. After the atorm centre crossed the coast, very heavy rain preceded and accompanied its advance. Rainfall, however, became lighter and less general after the area of lowest pressure passed the central stations, and it never extended to North Bengal and Bihar. The north-easterly motion of the centre had evidently an important influence on the quantity of rain and its distribution in the northern districts, as the cyclonic circulation of winds which prevailed over a wide area meant westerly directions, and comparative absence of moisture

even when the centre was still within a short distance from Calcutta.

Pressure.—The passage of the depression caused large fluctuations, and at the contre pressure was probably considerably lower than even at Sangor Island, where it reached 28.423 inches. At False Point it fell to 29 inches before communication ceased, and at Calcutta, Midnapore, and Balasore readings on Friday were very little over 20 inches. Owing to the slow motion of the depression changes during Friday were very small except at Saugor Island, Balasore and Midnapore, and at Sirajganj and Faridpur, where there was a rapid fall owing to the advance of the depression in that direction. Defect was very large for several days, and has affected the means for the week at all stations in Orissa and South Bengal. The largest mean defect is 816 inch at Saugor Island, and it exceeds a quarter of an inch at Cuttack, Balasore and Calcutta. In the northern districts defect was very little over a twentieth of an iuch.

Temperature. - Owing to the cloudy weather which prevailed in Lower Bengal and Orissa Temperature.—Owing to the cloudy weather which prevailed in Lower Bengal and Orissa during the whole or a considerable part of the week, day temperatures were many degrees below the normal-and night readings also, though to a much smaller extent. In North Bengal and Bihar, however, where the influence of the cyclone has been very slight, ordinary temperatures have continued. Defect in mean temperature is over 8° at Cuttack and Midnapore, and over 5° in many parts of South-West Bengal and Chota Nagpur. Average defect for Chota Nagpur is 6.9°, Orissa 5.7° and South-West Bengal 5°. In East Bengal there is defect of only 1.6° and South Bihar of half a flegree, while in Assam, North Bengal and Bihar there is excess ranging up to 3.7° in Assayl.

Rainfall has been unusually heavy in Orissa and South-West Bengal; the detailed falls will be found in the accompanying tables. In Chota Nagpur and also East Bengal considerably more than normal amounts have fallen, but in North Bengal and Bihar falls are either

ably more than normal amounts have fallen, but in North Bengal and Bihar falls are either average or under. The mean fall for the whole of Orissa is 17.76 inches, in South-West Bengal 6.91 inches, East Bengal 6.98 inches, and in Chota Nagpur 2.66 inches. North Bengal received 1.98 inches as compared with a normal fall of 2.39 inches, South Bihar .88 inch and North Bihar 39 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 27th of May 1893:-

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. thermometers are verified and the readings have been corrected to a standard constructed and verified at the They are exposed under a thatched shed open at the sides and are suspended four feet Kew Observatory. above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

> H. J. S. Cotton, Chief Secy. to the Goot. of Bengal.

#### REVENUE DEPARTMENT, -(OPJUM).

#### NOTIFICATION-No. 286T.R.

The 30th May 1893.—Mr. W. T. Ryves, Sub-Deputy Opium Agent, Bihar Agency, who was granted furlough for six months under Government Notification No. 10440, dated the 3rd March 1893, reported his departure from India on the afternoon of 6th May 1893.

H. H. RISLEY, Secy. to the Govt. of Bengal.

#### DECLARATION-No. 2313L.R.

The 2nd June 1893.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the removal of the Post Office at Hatiya in the village of Nilakhi, pargana Sundeep, chakla Hatiya, zilla Noakhali, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 10 cottahs of standard measurement, bounded on the North by the road to the Munsif's Court, on the West and South by Gafoor Backsha's land, and on the East by the proposed dispensary land, is required within the aforesaid village of Nilakhi.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. H. RIBLEY, Secy. to the Govt. of Bengal.

#### NOTIFICATION-No. 1681.

The 3rd June 1893.—The following rules are published for general information.

H. H. RISLEY, Secy. to the Govt. of Bengal.

Rules for the appointment of Sub-Inspectors of Schools.

- 1. A candidate for appointment as Sub-Inspector of Schools must satisfy one of the two following conditions:—
  - (a) He must have passed the B. A. Examination.

(b) He must have passed the F. A. Examination and have served successfully as a teacher in a subordinate capacity in a High School or as Head Master of a Middle English School for not less than three years. His success as a teacher must be certified by an Inspector of Schools.

In the Chota Nagpur and Orissa Divisions the following condition must be satisfied:—
He must have passed the Entrance Examination and have served successfully as a
teacher in a subordinate capacity in a High School or as Head Master of a
Middle English School for not less than six years. His success as a teacher
must be certified by an Inspector of Schools.

2. He must produce a certificate signed by two well-known respectable persons that they are well acquainted with him and believe him to be of good moral character. The certificate must be countersigned by the Magistrate of the district in which the candidate resides, or in Calcutta by the Commissioner of Police or a Presidency Magistrate.

3. He must produce a certificate showing that on the date fixed for the examination his age will not exceed 80 years. This certificate must be supported by a horoscope, or

failing this, by other sufficient evidence.

4. He must produce a certificate signed by the Civil Surgeon of a district that he is

of good health and sound physique.

5. Selected candidates before being confirmed must undergo a period of probation, which shall in no case be less than three months, and may be extended to six at the discretion of the Inspector.

> H. J. S. COTTON, Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd June 1893.—It is hereby notified for general information that, under the power vested in him by clause 3, section 1, Chapter I of the Sonthal Parganas Justice Regulation No. V of 1893, the Lieutenant-Governor is pleased to direct that the aforesaid Regulation shall come into force in the district of the Southal Parganas with effect from the 10th June 1893.

#### NOTIFICATION.

The 6th June 1893.—It is hereby notified for general information, under the provisions

Uchaulie Kharwa Bujurg. Karsora alias Khorsora. Bisumbhurpur.

Kharakhar. Naroich. Garwa.

of section 15 of Act V of 1861, that as the conduct of the inhabitants of the marginallynoted villages of pargana Chirkawan, in the police-station and sub-division of Aurunga-

rad, in the district of Gaya, has rendered it expedient to quarter an additional police therein, the Lieutenant-Governor sanctions the entertainment in those villages for a period of 12 months from the date of appointment of the following special police force for the purpose of keeping the peace there. The total cost of the police, which is shown below, will be assessed on and levied from the villagers in proportion to their respective means:—

5 Constables, second grade, at Rs. 8 per month, for one year		0	0
10 Constables, third grade, at Rs. 7 per month, for one year	480 840	ŏ	ŏ
•	2,280	0	0
Kits for 22 men at Rs. 17-5-6 each per annum	381	9	0
Pension charges at 2 annas per rupes per head	285	0	0
Contingencies at 10 per cent	228	0	0
Construction of two barracks at Rs. 250 each	500	0	0
Total	8,674	9	0 annua

H. J. S. Cotton, Chief Secy. to the Gott. of Bengal.

#### NOTIFICATION.

The 6th June 1893.—Under section 79 of Act III of 1877 (the Indian Registration Act), it is hereby notified for general information that, with the approval of the Governor-General in Council, the Lieutenant-Governor sanctions the substitution of the following revised schedule of registration fees for that at present in force in Bengal:-

## TABLE OF FEES UNDER THE INDIAN REGISTRATION ACT III OF 1877.

#### I .- ORDINARY FEES.

(A).—The fees for the registration of the documents described below shall be regulated on an ad-valorem scale, and calculated according to the value of the right, title, and interest affected in the manner following, that is to say-

	The	ъ д.	<i>x</i> .
Where the value does not exceed Rs. 50	0	8	0
Where the value exceeds Rs. 50, but does not exceed Rs. 100	0	12	0
Where the value exceeds Rs. 100, but does not exceed Rs. 250	1	0	0
Where the value exceeds Rs. 250, but does not exceed Rs. 500	1	8	0
Where the value exceeds Rs. 500, but does not exceed Rs. 1,000	2	0	0
For every additional Rs. 1,000 or part thereof	1	0	0
NOT EVERY RECEIVED IN TALL PROTECT			

Description of Documents.

Conveyances and bills of sale, deeds of gift or dower, settlements, deeds of partition, leases, deeds of mortgage or instruments of further charge, bonds, assignments of any interest secured by a bond or mortgage deed, policies of insurance, bills of exchange and promissory notes, and generally all other documents of the nature of those hereinbefore mentioned. provided-

(i) that in case where any consideration is expressed, the consideration, and in case of leases and other periodical payments, the amount payable for one year in addition to any fine or premium, and in case of bonds and mortgages, the amount to be secured, shall be taken to be the value of the right, title, or interest affected;

(ii) that if no consideration, rent or other value be expressed in the document, the amount payable shall be in every case Rs. 10;

(iii) that if a lease given to any raiyat, and the kabuliyat or counterpart of such lease executed by such raivat be brought for registration at the same time, the fees chargeable in respect of the two documents shall not be greater than the fee which would have been charged upon the lease alone.

(B).—The fee for the registration of a separate instrument acknowledging the receipt or payment of any sum of money, whether consideration on account of any deed of sale or mortgage, or rent on account of any lease, or other value expressed in any document, shall be calculated according to the amount received on the above scale: provided that, if any instrument referring to the same transaction have already been registered, the fee shall not exceed Rs. 2.

- (C).—(a) The fee to be paid on the deposit of any sealed cover containing a will shall be Rs. 2.
  - (b) On the opening of such cover, Rs. 2, besides the expense of copying the contents according to the scale laid down in this table for the granting of certified copies.
    - (c) On the registration of any will or authority to adopt presented open, Rs. 4.

(d) For withdrawal of a scaled cover containing a will, Rs. 2.

(D) .- The fee for the registration of a certified copy of a decree or order of Court shall be Re. 1.

(E).—The fee for the registration of an agreement for personal service shall be 8 annas only.

(F).—The fee for the registration of any document of a description not mentioned above shall be Re. 1.

(G).—For every copy and memorandum of a document to be forwarded to another office under sections 64-67, there shall be paid an extra fee equivalent to that paid under Article A, B, D, or F: provided that the fee for a copy shall not exceed Rs. 10, and that the fee for a memorandum shall not exceed Re. 1.

(H).—The fee to be paid for search shall be-

For the first year in the Index Registers of	of which	search is	Rs.	A.	P.
made	,, wascar		0	8	0
For every other year		•••	-	4	-
For each Register Book, I, III, of IV, ins	ipect <b>e</b> a	•••	U	8	U

Provided that no fee under this Article shall exceed the sum of Rs. 10.

Nots .- Every application for the grant of a certified copy, except at the time of the registration of a document, should be accompanied by the fee necessary to trace the entry in the indices at the above rates.

(I)—For making or granting copies of reasons, entries or documents, before, on, or after registration, a fee shall be charged at the rate of I anna for every hundred words in the native character, and of 2 annas for every hundred words in the English character.

(a) When an applicant requires his copies to be furnished on the day of application, an extra fee of Re. 1 (or, if the copies exceed four pages of 300 words, of four annas for each page) shall be charged on all copies so furnished.

#### II .- EXTRA OR ADDITIONAL FEES.

(K).—For registration by any Registrar (other than the Registrar of Calcutta) of any document under section 30 (a), an extra fee equal to the ordinary fee, or Rs. 5, whichever is less.

Nors.—The additional fee shall not be payable when an instrument is registered by a Registrar acting as Sub-Registrar, or in consequence of the Sub-Registrar by whom it should be registered under section 29 being a party interested in the transaction to which such instrument relates.

(L).—For registration by the Registrar of Calcutta, when no portion of the property is situate within his district, Rs. 10.

(M).—For attendance under section 81 at a private residence for registration or accept-

ance of any one document, will, or authority, Rs. 10. (N).—Before the issue of a commission, or before the Registering Officer or Judge personally proceeds to any dwelling-house or jail to obtain evidence as to the voluntary nature of the execution of a power-of-attorney under section 33, or for the examination of any person under section 88, a fee shall be paid as follows on account of every person exempted from

- (1) If the person be exempted on account of bodily infirmity, such as to make it impossible, without risk of life, to attend the office, or because confined in jail, Rs. 5.
- (2) If the person be exempted on account of sickness of any other kind, or as a person exempt by law from personal appearance in Court, Rs. 10.

And in addition travelling allowance must be paid to the Registering Officer or Judge, or any person to whom the commission is issued, at the rate of four annas a mile for all distances exceeding one mile from the registration office:

Provided that, where two or more persons who execute the same document reside together.

only one commission fee shall be charged so far as those persons are concerned.

(O).—For admission of a document to registration under section 24 or section 34 after the expiration of the time prescribed-

If presented within seven days of the time Twice the fee payable on account of prescribed. such document.

If presented within a month of the time? Four times the fee. prescribed.

If presented within four months of the time Ten times the fee. prescribed.

Explanation.—This fine is inclusive of the ordinary fee.

Note.-When two or more copies of a document executed by the same parties are presented for registration at the same time, an ordinary fee shall be payable for each copy; but any extra or additional fee which is payable under clauses (K), (L), (M), (N), and (O) shall be calculated as for one document only, no matter how many copies of that document may be registered.

(P).—For authenticating or attesting the execution of a power-of-attorney as follows:—

If it is a special power Ditto general power 2

(Q).—The fees for serving summonses under the provisions of section 87 shall be regu-

lated according to the scale in force in the revenue courts in the same district.

(R).—Besides the fees payable under Articles (A), (B), (C) (c), (D), (E) and (F) of this table, there, shall be paid, for the registration of every document of such length as to occupy more than two pages of the register, an extra copying fee at the rate of four annas for every page or part thereof in excess of the first two pages. Assuming three hundred words to the page, this fee may be calculated by counting the number of words in the document; or if no such calculation is made by the parties, the Registering Officer will estimate the number of pages likely to be thus charged for, but the fee shall in every case be payable on presentation; and in case of miscalculation, the document shall not be returned until any deficiency in the fee levied is made good.

Example.—A conveyance is presented for registration, containing 1,350 words. If the parties certify to this fact, the Registering Officer would at once proceed to charge a fee for three pages (1.350-600=750), i.e., 12 annas. If the number of words is not known, the Registering Officer would perhaps charge for two extra pages, or eight annas only, and the deficiency of four annas would have to be made good before the document could be returned.

(S).-When a document remains unclaimed for more than one month after completion of registration, a fee of four annas shall be charged for every month or part of a mouth, beyond

the first month after completion of registration.

(T). - When a document remains unclaimed for more than one month after refusal of registration, a fee of 4 annas shell be charged for every month, or part of a month, beyond the first month after refusal of registration. The amount of the fee shall not, however, exceed Rs. 5 in any case.

. Note.—The Inspector-General of Registration is empowered to remit the fee in any case when it appears to him that its exaction would be productive of injustice or hardship.

H. J. S. Cotton, Chief Secy. to the Govt. of Bengal.

#### ESTABLISHMENT.

#### The 6th June 1893.

No. 149.—Rai Sahib Bani Madhab Mitra, Assistant Engineer, Arrah Division, having returned on the forenoon of the 17th May 1893 from the privilege leave granted to him in Bengal Government Notification No. 126, dated the 8th May 1898, the unexpired portion of hat leave, viz. from the 17th May to the 1st June 1893, is hereby cancelled.

IRRIGATION. The 6th June 1893.

No. 150. - Declaration .- Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a supply channel at Jagatpur of the Kendrapara Canal, it is hereby declared that for the above purpose a piece of land 6 furlongs 40 feet long, and averaging in width 354 feet, measuring 32 acres 1 rood 24 poles, more or less, of standard measurement, commencing fro a mauza Sikaripur, pargana Padmapur, and terminating at mauza Nimpur, pargana Padmapur, in the district of Cuttack, is required within the aforesaid villages.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom

weeks in the Calcutta Gezette of the dates noted in the

it may concern.

Lieutenant Governor of Bengal is pleased, under the provisions of sections XI and XII of Act V (B.C.) of 1864, to pass the following rules in modification of those now in force in the Calcutta Canals and Tolly's Nala from 1st July 1893. A draft of these rules 18th and 25th January; 1st, 8th, 15th as proposed was published in this Department Notification No. 11, of the 17th January 1893, for a period of eight weeks in the Calcutta Gazetta of the datas rected in the No. 151. - Amended Notification .- It is hereby notified for general information that the

margin:-

1.-Every vessel on entering the Calcutta Canals or Tolly's Nala shall be liable to measurement for the purpose of ascertaining the tolls payable; and in case of any reasonable doubt arising, the navigation officers at any toll-station shall have authority to measure a vessel notwithstanding that it was measured on entering the canals.

2—The tonnage of every vessel, whether laden or empty, shall, for the purposes of Act V of 1864 (B L.C.) and of these rules, he determined by the following measurements:—

A.—The product of quarter the length of the vessel from stem to stern, measured along the greater line multiplied by the

along the water line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the waterline to the bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length is to be made in feet, rejecting inches; the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting

portions of less than a quarter of a foot in net depth.

C.—In calculating the amount of toll to be levied, any portion of 100 maunds less than  $12\frac{1}{2}$  maunds is to be omitted. In the case of boats exceeding 500 maunds by measurement, any fraction of 100 maunds less than 50 maunds is to be bmitted, and exceeding 50 maunds is to be charged as 50 maunds only.

D .- Provided that in the case of vessels which entered the canals at Chitpore, Kidderpore, and Chetla empty for the purpose of loading therein, the depth shall be measured from the line of usual immersion as visible on the outside of the vessel to the bottom of the

vessel, and not from the line of actual immersion at the time of measurement.

E.—In the case of steamers the tonnage, as determined by clauses A, B, and D, shall

be reduced by one-third as an allowance for engine space.

3.—Every vessel entering the canals shall be furnished with a ticket on payment of the prescribed toll. The manjee's name, the date and hour of entry, the maundage of the vessel, the cargo it contains, and amount of toll charged, shall be entered in this ticket to identify the vessel on which toll has been paid.

4.—Every person in charge of a boat, raft, or float, who shall pass into the canal without tendering the toll due, or who shall pass out of the canal without surrendering the ticket received on entering and paying any tolls that may be due, shall be liable to be detained and punished according to section X of Act V of 1864.

5.—This ticket may be demanded and inspected by any navigation officer, and must

be kept on board and at hand for that purpose.

6.—Persons in charge of boats entering the Calcutta Canals at Dhappa or Chitpur must procure a toll ticket and present it to the lock muharrir to be examined and stamped. This ticket must be given up at the exit lock on the boat leaving the canals. In the case of Tolly's Nullah a toll ticket must be obtained at the entrance and given up at the exit station.

7.- Every person in charge of a boat found in the canals with toil tickets unstamped or unsigned will be detained and treated as having no toll ticket under section X of Act V

of 1864.

8.—The manjee or owner of every vessel not having a ticket on board and producible on demand shall be liable to the provisions of section X of the Canals Act.

9.-Duplicates of lost tickets, of which the numbers and dates of entry can be satisfactorily established, will be granted by the Supervisor on further payment of a sum equal to the original amount of toll.

10.-During the detention of any vessel under these rules, or under section IX of the Act, it will be the duty of navigation officers to see that neither the vessel nor its cargo is clandestinely removed; but they are in no way responsible for the safety of the boat or its cargo, for which the manjee, owner, or agent must make their own arrangements.

11.—The purchaser of a vessel sold under these rules, and under the Act, will have the option of taking it out of the canal on the day of purchase, or of taking out a fresh toll ticket at the rate fixed by the Schedule of Tolls in force for the time being.

12.—No boat engaged by any officer of Government, whether civil or military, shall be exempt from toll, on the ground that the officer is travelling on public duty. Exceptions to this rule are allowed in the case of certain vessels and officers under the special sanction of the Lieutenant-Governor.

13.—Any vessel remaining in the canals more than two months without authority from the Supervisor shall be summarily removed.

14.—Boats requiring repairs shall be allowed to enter Dhappa Docks and remain there for a maximum period of thirty days, during which they will be charged at the rate of one-sixth part of the demurrage ordinarily payable. Any boat remaining in the docks longer than thirty days without the special permission of the Supervisor shall pay demurrage at the full rate for such excess period.

15 .- No vessel shall be docked for repairs on the banks of the Calcutta Canals or of

Tolly's Nula.

16.—Wherever mooring posts may have been put up by the Supervisor, vessels shall be made fast by the head and stern along the banks to such posts, and shall not be moored

in any other manner.

• 17.—The Supervisor may by notification prohibit the dropping of anchors or the putting up of bamboos or luggees in any part of the canals or on the banks; and in such parts no anchors shall be dropped, or luggees put up, under a penalty of fifty rupees, and of a fine not exceeding four rupees a day for continued disobedience of an order for removal issued by the Supervisor.

18.—Boats whilst loading or unloading in the canals will be allowed to use ladders;

but the ladders must be gradually taken in as the water rises.

19.—As the water falls, the head and stern ropes must be loosened, and hoats gradually pushed towards the centre of the canal: when the flood comes in, these two ropes must be

gradually pulled in, and the hoat kept as close to the bank as possible.

20.—Only one boat shall be allowed to make fast along and in line with the canal banks, and no boat shall be made fast or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety of other boats or obstruct the passage of other boats.

21. Boats passing through the canals shall keep in separate lines, empty boats

keeping close to the bank and those that are laden in the centre.

22.—Hackeries, carts, bullocks, &c., using the canal roads shall, when stationary, be ranged on the side of the road farthest from the canal bank.

■ 23.—In portions of the canals where only one towing-path exists, vessels shall moor.

on the off side, and the towing-path side shall always be kept clear.

- 24.—No persons shall place obstructions on the canal banks, roads, drains, or bridges (when such are on canal land), so as to impede a free passage along them or cause injury to them, or shall commit a nuisance, or deposit filth of any sort on the banks or in the canals.
- 25.-Any vessel, vehicle, or any other thing that may cause an obstruction to navigation, or to the banks, roads, drains, and bridges, or injury to the same, will be hable to be immediately removed and detained till all expenses incurred on account of removal, demands, and fines are paid. If a charge be not paid within ten days from date of detention, the said vessel, vehicle, or other thing will be sold to defray expenses.

  26.—No artificial fire or light of any description shall be used on boats containing

petroleum, jute, hay, or straw whilst in the Calcutta Cansls or lock basins.

27.—Whoever personally or by his or her servant infringes the provisions of any of the foregoing rules numbered 15 to 26 inclusive, shall be liable, under section XI, Act V of 1864 (B.C.), to a fine not exceeding Rs. 50 for any one such infringement, or to a fine not exceeding Rs. 5 a day for a continued infringement.

28 .- At the instance of the Supervisor, any Magistrate who imposes a fine under

section XI or XVI of the Act may award any portion of such five to the informer.

29.—Any person who wilfully or negligently allows a vessel to sink in the canals shall be liable to a fine not exceeding Rs. 50.

30 .- In every case of wreck caused by negligence or otherwise, the Supervisor and his

subordinates will give every assistance in removing the same.

31 .- A notice shall be affixed on such wreck when recovered, calling on those concerned to pay to the Supervisor all toll which may be due, or fine which may have been adjudged, as well as the expenses incurred in the recovery or removal of the wreck; and intimating that, if the sum be not paid within fitteen days of the date of notice, the boat and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, the proceeds of the sale being dealt with as directed in section IX of the Act.

32 - Every navigation officer is authorized to remove any vessel, anchor, pole, or other thing which he may find in a position which is in contravention of these rules, and to deal

with it in such a manner as may be necessary to give effect to the rules.

33 .- Whenever any laden vessel is seized by a navigation officer, it shall be the duty of . the Supervisor to give immediate notice of the same to the owner or his agent, requiring the removal of the cargo without delay, and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the same.

34 —If the Supervisor be unable to ascertain the name and place of business or the abode of the owner of the cargo of any vessel or boat seized under the Canals Act, he shall notify the seizure by a notice exhibited in his office, and by advertisement in one or more of the Calcutta newspapers. Such notice and advertisement shall call upon the owner to cause the immediate removal of the cargo, and to pay any necessary expenses incurred in providing or its proper custody and storage.

35.—The Supervisor may incur whatever expense he may think necessary for the proper custody and storage of the cargo of any vessel seized under the Canals Act; and if the cargo be not removed within ten days from the date of seizure, he may sell the same at public auction to the highest bidder, after giving ten days' notice of the same by advertisement in

one or more Calcutta newspapers and by a notice exhibited in his office.

36.—The money realized at such a sale shall be applied first to defray any expenditure that may have been incurred by the Supervisor on account of the cargo sold, and the balance, if any, shall be held in deposit to be paid to the owner of the said cargo on his applying for

37.—No steamers are allowed to enter the Calcutta Canals without permission of the Supervisor at Chitpore or Canal Inspector at Dhappa. Steamers are not allowed to tow flats or cargo boats in the Circular Canal, but may tow one flat at a time in the New Canal. Any one infringing this rule is liable to a fine of Rs. 50.

88.—The term "navigation officer" as used in the foregoing rules shall include the

persons alluded to in section VIII of the "Canals Act, 1864," and all Public Works Officers

or Subordinates in charge of the canals not below the grade of Sub-Overseer.

MOTER LALL MOOKERJEE, for Exe. Engr., Nadia Rivers Division

Berhampur, the 5th June 1893.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

1st —Bay of Bengal Daily Report giving meteorological observations taken at 27 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by poon in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 45 meteorological stations in Bengal and Assam, and transmitted to Calcutta by weather telegrams, wi.h a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 8 A.M. observations of each day is printed in time for the evening mail, and is distributed to subscribers in Calcutta the same evening. This report for the present is only published during the south-west monsoon, i.e. from about May 15th to November 15th, orthereabouts. Price Rs. 2-8 per mensem, including postage.

3rd—A Weekly and Monthly Statement of Meteogological Observations taken at 49 observing stations, and of rainfall recorded at 260 sub-divisional stations, together with summaries of the more important features of the moteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russel Street, Calcutta, for the Bay of Bengal Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Meteorological Reporter to the Govt. of Bengal.

#### The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the lat January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

# REVENUE DEPARTMENT.

REVISED ADVERTISEMENT.

A Dictionary of the Economic Products of India By DB. GEO. WATT, C.I.E.

Reporter on Economic Products.

Published under the authority of the Government of India in

the Revenue and Agricultural Department of India in

the Revenue and Agricultural Department.

The first five volumes of this work are now ready for issue, and intending subscribes are invited to register their names with the Superintendent of Government Printing, Calcutta.

Trinting, Calcutts.

The first five volumes and Vol. VI, Part I, of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutts, and will be supplied to non-subscribers on receipt of the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for the price for will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs 45 in India, and 3 guiness in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India--animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both ch-mical and industrial); trade statistics; markets; &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross reference, so that little difficulty red be experienced in finding the account of a product even when its scientific name is unknown to the reader.

In important feature of the Dictionary consists in the factory that desired. The Dictionary is intended to deal with the

name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new-viscoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

tion, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. If embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G. Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI, which will consist of four parts) Part I contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an Index to all the vernnecular and other names contained in the Dictionary. The Index will pracconsisting or an index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

may prove of considerable value.

The period of registration of subscribers, pames having expired on the 1st October, the price will in fixure be in India Rs. 45 and in England 3 gaineas, payable and vance, for the complete set (exclusive of the Index, for which a separate charge will be made). An extra charge for packing and postage will be made for the set—in India, at 3 annas per volume, and for England, at 2 rupees 6 annas per volume.

For copies bound in half only or half morocco. Ra. 6 and 8

For copies bound in half calf or half morocco, Ra. 6 and 8 shillings respectively will be charged extra for the

No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately

complete, and no single volume will be sold separately

#### RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS.

REVENUE DEPARTMENT-LAND REVENUE.

Calcutta, the 29th May 1893.

RESOLUTION No. 2306.

#### READ-

Report of the Director of Bengal Surveys for the year ending 30th September 1892. Read also—

Board's No. 386A., dated the 19th April 1893, submitting the Report of the Director of Land Records on settlements during the same year.

The date originally fixed for the submission of these two Reports was the 15th November, but the Report of the Director of Submission of reports; charge Surveys was not submitted till the 16th March 1893, while the Report of the Director of Land Records reached Government through the Board on the 20th April 1893. In Colonel Sandeman's case, his absence on leave during the recess prevented the report from being commenced at the proper time, and in Mr. Macpherson's case the pressure of urgent work in connection with the commencement of settlement operations in Bihar and Tippera and the necessity for inspecting the work in progress in Orissa, Chittagong, and elsewhere, compelled him to postpone the less essential work of report-writing. The Director of Land Records points out that the present arrangement does not leave him sufficient time to print, read, consider, abstract, and comment upon the local officers' reports. Separate orders will be issued after further consultation, but it is

very desirable that the task of writing the report should be completed before the active work of the cold season is entered upon. Colonel Sandeman, who submits the report on surveys, was appointed to be the Director of Bengal Surveys from the 1st April 1892, but was placed on special duty from the 27th January preceding for the purpose of making preliminary arrangements for the Bihar Survey, and assumed charge of the survey parties working in Bengal from the 8th March 1892. He went on furlough for six months on the 15th April 1892, making over charge to Colonel Strahan. Mr. Maude was in charge of the Department of Land Records from the 1st October 1891 to the 3rd November, and Mr. Finucane from the latter date to the 3rd May 1892, when he went on leave, being relieved by Mr. Macpherson, who remained in charge for the rest of the year. The Report of the Director of Land Records follows the order laid down by Government, giving precedence to the three important settlements of Orissa, Chittagong, and the Western Duars. The Director of Rengal Surveys deals first with the Bihar Survey, which is the most important work under his supervision, but which is not dealt with by the Director of Land Records, as settlement work did not commence in Bihar during the year of report. Sandeman as well as Messrs. Finucane and Macpherson were active in inspection and made a number of useful tours. The several Settlement and Assistant Settlement Officers of Orissa and Chittagong were generally out in camp for the greater part of their respective terms of employment during the year, and much good work was done. In Jalpaiguri and Chittagong the staff and establishment suffered much from sickness.

Surveys and settlements are now in progress over the whole of the regulation portion of the Orissa Division, and in regulation portion of the Orissa Division, and in portions of all the other Divisions except Chota Nagpur, where the Bengal Tenancy Act is not at present in force. The advisability of extending portions of the Act to this Division, under the provisions of Act XIV of 1874, for the purpose of a general survey and record of rights in order to allay agrarian disturbances and to facilitate the commutation of predial services, has long engaged the attention of Government, but no final decision has been arrived at pending the receipt of a report by the Board on certain subsidiary questions. The outturn of survey work by professional agency amounted during the year to 4,712 square miles of traverse survey, 2,290 square miles of cadastral survey. 3271 square of traverse survey, 2,290 square miles of cadastral survey,  $327\frac{1}{2}$  square miles of forest survey, and 556 square miles of topographical survey including 194 square miles of hill sketching in Chittagong, besides 187 square miles of skeleton boundary survey of tea grants and jungle and 17 square miles of detail survey of tea lands. With the exception of the forest survey, the Bhutan boundary survey, the Rajapur drainage survey, and the survey of the Town of Calcutta, all the surveys in progress have for their object the settlement of revenue or rent. It is true that the main purpose of the Bihar Survey is to record rather than to settle rents; still the former process tends almost inevitably to lead to the latter, as under the law it is open to either landlord or tenant to apply for the settlement of a fair rent. The total area in which the settlement of revenue or rents was being carried on during the year was 6,600 square miles of temporarily-settled tracts and Government estates, 1337 square miles of wards' estates, and 121 square miles of private estates. The cost of surveys and settlements incurred by Government in temporarily-settled tracts and Government estates (chiefly in Orissa Chiefly and the Western Duran of Industrial) ment estates (chiefly in Orissa, Chittagong, and the Western Duars of Jalpaiguri) since the commencement of the operations up to 30th September 1892 was Rs. 20,46,408; but the increase of revenue which these operations will yield has not yet been realised, nor can its amount be estimated with any approach to accuracy. The costs incurred by wards' estates for the same period amounted to Rs. 4,10,083; the increase of rent actually obtained is Rs. 61,728, and the additional increase expected Rs. 18,500, or altogether 15 per cent. on the outlay; the corresponding figures for private estates are Rs. 59,364, Rs. 7,239, and Rs. 1,213, which show an increase amounting to 12.2 per cent. on the outlay. Regarded therefore purely from the landlord's point of view the process of survey and settlement brings in a sufficient return to recommend it on financial grounds; while the tenants obtain an adequate set-off for the incresse in their rent by having their status recorded and by being protected against further enhancement for a period of fifteen years. An examination of the record shows,

moreover, that the greater part of the increased rental brought out by settlement operations is not due to enhancement properly so called, but to the fact that the tenants have been found to be in possession of land materially in excess of the area for which they were paying rent.

A notable feature of the year's work has been the attempt to draw up a more uniform procedure for conducting survey Principles of Procedure. and settlement operations throughout Bengal. most of the other provinces of India the conditions governing settlement work are tolerably constant over the whole area affected; the same village systems prevail, the same agency is available, and consequently there is no great difficulty in laying down a standard procedure from which there will be only occasional departures. This, however, is not the case in Bengal. In different parts of the country very diverse conditions have to be considered and dealt with: the agency available for survey, the nature of the tenures, the extent of sub-infeudation, and the character of the people themselves, vary materially in the areas under settlement. For these reasons, in the operations undertaken during. the last few years, it has been impossible to adhere closely to the procedure laid down in the Survey and Settlement Manuals, and in practice the standard system has been constantly modified with reference to local peculiarities and the views of the Settlement Officers in charge. Efforts are now being made to work on more uniform lines. The leading principle is that the officers of the survey and Settlement Departments should be treated, while engaged in writing the records, as a single staff working with the common object of producing a correct record of the actual facts. With this end in view, rules for the writing of the record in Bihar, Orissa, and Tippera have been drawn up by the Directors of Surveys and Land Records, so as to adapt the general system laid down in the Manuals to the varying local requirements. These rules have been translated into the vernacular for the use of the survey amins and inspectors. great advantage of combining the two establishments for the purpose of making the record is that the revenue officers employed on settlement work proper are constantly cheeking and supervising the khanapuri work or writing of the khasra (field index) and khatian (tenant-roll) drawn up by the survey officers, and the double test which is thus applied at all stages of the work will, it is believed, result in producing a correct record at the lowest possible cost compatible with requisite accuracy.

In illustration of the differences between the old and the new methods, it is only necessary to compare the proce. The Chittagong system. dure under which the Chittagong Survey has been completed, with that which is now being carried out in Orissa, Bihar, and all other settlements in these provinces in which a professsional survey is made. In Chittagong the survey amins were strangers who could not understand the language of the country. They surveyed precisely what they saw, and entered on the map in pencil the boundaries of every subdivision of a field, a number of which sub-divisions, locally designated kotas, forms an integral field. areas originally marked off as villages in the Revenue Survey, though generally too large for a single sheet of the map, were treated as units for the purpose of the settlement, instead of being divided into convenient unit blocks, so that there are on the average five sheets to a village. these maps were made for the Settlement Department, and settlement amins (local men) were sent to draw up the khasra and khatian, leaving the area Their first business was to eliminate the kotas and find out columns blank. which were the actual fields occupied by a separate tenant, and to give serial numbers to those fields; but as each amin worked on a separate sheet, this method brought out five separate series of preliminary numbers to each village. When the traces thus numbered were returned, the Survey Department re-numbered the true fields in one consecutive series for the whole village, worked out the areas, and made over the area lists to the Settlement Department. From the area lists prepared in the survey office, the settlement office muharrirs copied the areas into the khasras and khatians after correcting the numbers originally given in pencil to the fields in these records. The extra labour involved in this system and the additional risk of error are obvious, but the work was too nearly completed, when Colonel Sandeman took charge, to make it worth while for him to attempt to introduce the better system which he has devised.

Under that improved system, as now followed in Orissa and Bihar, the survey amins are required to survey the bound-The Bihar and Orissa system. aries of fields only, inking them at the same time without putting down the numbers. The maps are sent to the survey office for scrutiny and testing, after which khanapuri is commenced by the survey amins. If the amin who prepares the maps is an up-country man, as in Orissa he generally is, a local man, who has been taught survey, is deputed from the Survey Office to do khanapuri. Experience has shown that the local amins work too slowly and too inaccurately to be employed on surveying. For the purpose of khanapuri the local amin is supplied with a map sheet, blank sheets of the khasra, khatian, and khewat forms, and jamabandi papers previously obtained from the landlords. A second amin is at the same time employed to prepare the khatian simultaneously with the khasra. All the citries in the khasra and khatian, except such as require the interference of the Settlement Officer, are made by the survey amins, and are read out and explained to the landlords and tenants daily, parchas, or slips containing the relevant entries, being given to the tenants, which they can get read and explained to them in the village at leisure, and so feel confidence in the correctness of the entries, or else state clearly what precise entry they object to. Entries which are the subject of dispute are made in red ink or are underlined in red; and disputes are entered in a separate list for the Settlement Officer's decision. The amins who write the records are under the supervision and control of the revenue officers as well as of the survey staff; in so far as the survey and measurements are concerned, they are under the supervision of the Survey Department alone. When the map and records have been prepared in the above manner, they are sent to the survey office in order that areas may be extracted. After areas have been extracted and entered in the records, all the papers, including the map, or a trace of the map, are made over to the revenue officers for final attestation.

6. It will be seen that, as was stated above, the prominent feature of the new procedure is the amalgamation of the Survey and Advantages of new system. Settlement Departments as parts of one establishment working jointly towards a common end. Each cadastral camp is thus de facto the settlement office, and the Survey Inspectors and amins or patwaris here become the Settlement Officers' establishments for purposes for which separate establishments had hitherto to be employed in the field. The unit of survey is no longer the kitta, or kota, or kiari, which is a mere cultivating division of the field, and in many places liable to constant change, but it is the true field of the cultivator. Another radical change introduced is that demarcation, which was formerly carried out under the orders of the Settlement Officer by a separate staff, is now effected by the survey officials, who issue notices under the Survey Act to the proprietors to put up boundary marks. All these improvements appear to the Lieutenant-Governor to be marks. All these improvements appear to the Lieutenant-Governor to be excellent. The Chittagong procedure involves—(i) risk of unfair manipulation of boundaries by settlement amins; (ii) unnecessary survey of innumerable plots of kotas; (iii) unnecessary numbering which leads to error and confusion; (iv) want of supervision by the Survey Department over the record-writing amins. Under the Orissa procedure, on the other hand, which has been further improved in Bihar, the records are written simultaneously under the joint control and supervision of the Survey and Settlement Departments. This ensures greater despatch, precision and cheapness. In Chittagong the cost of survey, exclusive of record-writing, but including only the following processes, viz., traverse, detailed survey, completion of maps, area extraction, inking of maps after elimination of kotas, and entering of numbers, amounted in the year to Rs. 269-1 per square mile; in Orissa the whole cost of survey, inclusive of record-writing, was Rs. 179 per square mile in 1890-91, and Rs. 157 in 1891-92.

7. Another satisfactory feature of the year's work is the progress made in training local men in survey work. The employment of local agency on survey and settlements not only materially reduces the cost, but provides an efficient means of maintaining the maps and records when the work is complete. During the season under notice the following local establishments were put through a course of instruction and will be utilized as far as possible:—

In the Champaran district, 180 patwaris and their relatives.

. In the Muzaffarpur district, 270 patwaris and their relatives and other local men (80 more were under training).

In Tippera, 300 local men (Bengalis).

8.

In the coparcenary villages in Bihar, it is possible that some difficulty may be experienced in arranging for a patwari or other resident of the village to do the survey and record writing, but it is hoped that this difficulty may not be insurmountable. Section 5 of Regulation I of 1819 empowers the Collector, with the approval of the Board of Revenue, to appoint patwaris in such villages with or without reference to the proprietors, and if it is found that the latter cannot agree among themselves to nominate a joint patwari, it may be necessary to take action under this section.

In the Western Duars no local agency has been trained, nor are any local patwories available. In Chittagong a few local man were trained when the operations first commenced, but they have not been utilized to any appreciable extent.

The distinct advance which has thus to be recorded in the system of conducting the larger survey and settlements is Potty settlements. due to the enlightened experience of Colonel Sandeman, and to the unwearied supervision exercised by him and by Mr. Macpherson. It is not to be wondered at if the management of petty settlements shows as yet no corresponding improvement. It must freely be admitted that the conduct of these settlements by Collectors in the past has been very often unsatisfactory. The procedure has been slow and hesitating, and the work dilatory and expensive. In consequence of large additions to the duties of the Director of Land Records in connection with the more important surveys and settlements, Government has found it necessary to relieve him of the supervision of this class of work. It is possible that in some cases arrangements may be made to include the survey, the Khanapuri and the record-writing of such settlements in the professional survey programme, leaving the attestation to be done under the supervision of the local officers. But as a general rule the petty settlements must be carried out by District Officers in direct subordination to the Commissioner of the Division, and as they will no longer submit progress reports to the Director of Land Records, it becomes all the more essential for the Board to take the matter in hand, and to issue simple rules to ensure correct procedure and steady progress. What seems to be generally wanting is a correct understanding of the procedure and an intelligent forecast of the rate at which the work ought to be done. District Officers have often not the experience which is required to tell them how much an amin should be able to survey in a month and how large a staff is required to be put in the field so as to carry the fieldwork through the cold weather; leaving the hot weather for attestation and case work and not allowing the business to drag. The worst instances mentioned in the Director's Report are those in which the progress has been unreasonably slow, and unnecessary cost has been incurred and irritation caused. Thus, Khosalpur is a Government estate in Nadia with an area of 425 acres, contained in 13 villages; of which the survey began as far back as April 1889. A re-measurement appears to have been made in the year 1891-92. The survey should have been completed by two amins in a month. Out of 3,525 acres comprised in the Atmi Ward's estate in Shahabad, 1,250 acres were surveyed during the year, but no khanapuri or attestation appears to have been done. Lot Syamdaspur is a patni tenure in the Bankura district, having an area of 82 acres, the survey and settlement of which was sanctioned by the Commissioner of Burdwan on the application of the tenure-holder in March 1890. was appointed to measure the estate in July 1891. He worked under the orders of the Settlement Officer, the Sub-divisional Officer of Bishenpur, and submitted his map and measurement papers in February 1892. The raiyats disputed the correctness of the measurement, and a fresh measurement was ordered at the expense of the tenants, which was completed in April 1892. The settlement was still pending at the end of September 1892. Such delay in disposing of a petty case is lamentable and must discourage proprietors from making applications under Chapter X of the Tenancy Act. In the case of the survey and settlement of nine petty private estates in Midnapore, the settlement cost on the

average about ten times as much as the survey—a proportion which appears to the Lieutenant-Governor most unreasonably high.

9. As a first step towards effecting an improvement in this branch of a Standard procedure to be drawn District Officer's work, the Lieutenant-Governor considers that the Board may with advantage prepare a plain manual stating the procedure to be adopted for an estate of a given size, and specifying how many amins should be employed, when they should begin the work, and how long they should take over it, what system should be adop ed for writing the khasras and khatians and giving out parchas while the survey is going on, how supervision should be exercised, how attestation should be effected after the khatians have been finished, and so on through the various stages of the work up to the publication of the record. Having before him these particulars worked out for a standard estate, a Collector ought to find little difficulty in adapting the model scale to any estate which he has to deal with, and he will thus be in a position to exact from his settlement subordinates a definite rate of progress. One factor no doubt is variable. The number of entries disputed will differ in different parts of the country according to the bitterness of party feeling, the nature of the holdings, or the character of the people, and this may make a material difference in the duration of the settlement. It may be expected, however, that even under this head experience will nender it possible to work out average rates of progress for different areas which will afford some guidance in judging whether a particular settlement is being unduly delayed.

10. The following paragraphs show the progress made in the larger Progress of Work-Bihar Sur- survey-settlements. The Bihar survey was sancvey. tioned by the Government of India in their letter No. 2135—112, dated the 18th September, 1891. A notification under the Bengal Survey Act V (B.C.) of 1875, dated the 17th November 1891, was accordingly published in the Calcutta Gazette for the survey of the districts of Muzaffarpur, Darbhanga, Saran, and Champaran. The preliminary arrangements for the traverse survey in Muzaffarpur and in Champaran were made by His Honour the Lieutenant-Governor during his visit to Bihar in the early part of November 1891, with the advice of Mr. Finucane, immediately before the survey party took the field. Work actually commenced on the 19th December 1891, as there was some delay in issuing notices under the Survey Act on landholders and others, but it was not till about the 10th January 1892 that the survey party mustered in full strength. During the experimental survey under the Tenancy Act of the Muzaffarpur district in 1885-86, Colonel Barron had traversed 803 square miles, of which 414 square miles were cadastrally surveyed. Out of the 389 square miles remaining to be surveyed in 1891-92, village trijunction points were found marked by stones in 301 square miles, and this was the first area taken in hand during the season. The survey party worked till 17th June 1892, when it went into recess. area traversed during this period was 1,247 square miles covered by 2,144 villages in Muzaffarpur, and 363 square miles covered by 238 villages in Champaran, or a total of 1,610 square miles, which is only 90 square miles less than the season's estimate. Including the 301 square miles of Colonel Barron's survey, over 1,900 square miles were made ready for cadastral work during the season 1892-93.

11. In March 1892, Colonel Sandeman was present at a meeting at Muzaffarpur presided over by the Commissioner of the Division. The Maharaja of Darbhanga and about 30 representative planters and zamindars attended. The object of the meeting was to explain to the parties interested the financial and other advantages of utilizing the village patwari for the purposes of the survey. The meeting unanimously approved the principles of employing local agency, but with the qualification that before the patwari was trained and employed at the zemindar's expense, he should be released from Government control. Mr. Gibbon, Manager of the Bettia estate, alone ongaged to place the services of 250 patwaries at the disposal of the Survey Department by way of experiment. Subsequent to the meeting, Babu Ramdhari Sahai, the Secretary of the Landholders' Association, and Mr. (now Sir W.) Hudson asked permission to

send their patwaries for training. The Maharaja of Darbhanga also requested the Director of Bengal Surveys to give some of his patwaries a professional training, in order to save him the cost of employing amins to make yearly corrections in the maps of his estate. Sir Charles Elliott notes with satisfaction the favourable attitude of the zamindars with regard to the training of a local agency; and trusts that they will give further support to the operations as they become more assured of the care and accuracy with which the records are being framed. His Honour desires especially to place on record his acknowledgments to Mr. Gibbon for the support which he has given to the Survey and Settlement Officers.

12. With regard to boundary pillars, the Director of Surveys reports that the stones used for marking trijunctions and certain other intermediate traverse stations were all of one pattern, viz., blocks of sandstone 2 feet long, rough hewn to  $4\frac{1}{2}$  inches from the end, which was cut into a triangular prism of three sides. These were obtained from the Bengal Stone Company at Mirzapur. The Director of Surveys has made arrangements for the future with Messrs Burn and Company for new kinds of marks made of Raniganj pottery; those meant for ordinary traverse stations being only glazed pipes 2 feet long and 2 inches in diameter, costing 2 annas each, and those for trijunction points being cylindrical cones marked S 1, measuring  $2\frac{1}{2}$  feet long and 8 inches diameter, and costing 12 annas each. These when filled with clay will answer the same purpose as stones, and will be much cheaper.

13. The following statements show the area to be dealt with in Orissa, the survey work done previous to the season 1891-92, and that done during the season:—

•District.	Permanent- ly settled area,	Tempora- rily-settled	Arca under	Permanently- settled or revenue free area under settlement of rents.	Total of columns 4 and 5.	WORK DONE BE- FORE 1891-92.		Work nowr in 1831-92.		Remarks.
						Traverse.	Cadastral.	Traverse.	Cadastrul	
							8	9	10

Total	2,068 •	5,670				1,567	1,037	2,007	1,768	

It appears that the survey work remaining to be done in the three districts at the end of September 1892 was as follows:—

 Cuttack
 ...
 ...
 Nil
 320

 Balasore
 ...
 ...
 1,100
 1,697

Cuttack district. There was heavy rain on the 8th, 9th and 10th of June, and on the 11th the survey camps stationed on the banks of the Byturni river were swamped. So great was the rise of the floods that boats of 500 maunds capacity were rowed into the camp for the rescue of the survey records. It was due to the presence of mind and energy of Mr. Smart that the whole of the records of the season's work were not destroyed. The 1,459 square miles shown as cadastrally surveyed in Cuttack included 364 square miles of canal irrigated lands, in which the work consisted of bringing up to date the maps of 1878-79, and doing the khanapuri. This turned out unavoidably to be little less arduous than entirely fresh work.

15. The report of the Director of Surveys demonstrates clearly the fact that the work of record-writing was retarded owing to the want of precise rules. No less than four different forms of khasra and three different forms of khatian were introduced

during the season. The Lieutenant-Governor does not under-rate the difficulties which had to be contended with in adapting the standard forms to local conditions, and he is prepared to admit that the form to be finally adopted cannot be expected to be arrived at on the first attempt. But the amount of change in the Orissa forms was clearly excessive. It is also a matter for regret that precise instructions for the record-writing were not translated into the vernacular and placed in the hand of the amins until June 1892. already noted, however, a definite plan of procedure was laid down during the year in consultation between the Survey and Settlement Departments. This plan was revised in December 1892, with the concurrence of the Lieutenant-Governor, in certain points of detail. It is hoped that no large changes will in future be necessary, and that the experience acquired in Orissa and Bihar will materially facilitate the preparation of final forms for all other settlemente

The report of the Director of Surveys shows that record-writing was done during the year in 1,145 square miles of Cuttack and 307 square miles of Puri. The Director of Land Records states that the record of rights and of rents had been attested in only 1,425 square miles up to the end of the year. The area of attestation given in square miles shows that attestation is considerably behind the record-writing. Twenty-three per cent. of the khasra entries in Cuttack, and thirty-two per cent. in Puri, were checked jointly by Europeans of the Survey Department, by Assistant Settlement Officers, and Native Inspectors; the superior officers of the Survey and Settlement Department only checked 5 per cent. of these, which seems to be hardly enough.

The rates paid by the Survey Department for the various descriptions

of work done in the Division, as compared with the Cost of work. previous season, were as follows, per square mile:-

		provides season,	were as ronows, per square mine.							
				1890 91.			18	1891-92,		
				Rs.	Α.	P.	Rs.	Α.	P.	• ~
Traverse survey			•••	34	.1	9	29	9	7	
('adastral "		•••		72	4	9	63	9	7	
Khanapuri		•••		27	()	0	34	υ	0	
Completion of re	cords	•••	•••	4.5	7	2	29	12	0	
		Total		179	0	8	157	0	0	

These figures show a saving of Rs. 22 per square mile, though the decrease in the rate for cadastral work is perhaps to a certain extent due to the inclusion in it of the 364 square miles of revision survey of canal irrigated lands in Cuttack. The rate for survey for the season under review was not quite 4 annas per acre, and must be considered satisfactory, having regard specially to the disadvantages already referred to, under which khanapuri work had to be done, and to the drawback to the full employment of local agency presented by the constitutional laziness and clumsiness of the Uriya amin. The improvements since effected in the procedure may be trusted to show a further reduction in the rates. The figures for khanapur, and completion of records are satisfactory.

Assessment work did not begin, nor was there any settlement of fair rents in Orissa in 1892-93. Soil maps constructed with the object of facilitating assessment have been prepared for 1,038 villages in Cuttack and 633 in Puri.

The survey work done during the year consisted of 167 square miles of traverse and 462 square miles of cadastral survey in the head-quarters sub-division, and 130 square miles of traverse and 26 square miles of cadastral work in Cox's Bazar. The work remaining to be done at the end of the year comprised some 500 square miles of traverse survey in Chakaria, Moheskhal, and Teknaaf, and a cadastral survey of 110 to 120 square miles out of this area.

The total number of villages under survey and settlement is 933 in the head-quarters sub-division and 147 in the Cox's Bazar sub-division, including Ramu. Up to the end of the year the khasras of 825 villages of the head-quarters sub-division had been written by the khanapuri amins, but khatians had been completed and the area columns in the khasras filled up for only 655 villages, in only 355 of which had attestation been done. Khanapuri work of thana Ramu was completed in 1890. No khanapuri had been done up to September 1892 for the rest of the Cox's Bazar sub-division. The slow progress of khanapuri work in Chittagong is due to the cumbrous procedure already explained. Existing rents were recorded and status determined for 119,871 raiyats and 70,393 other tenants in the Sadar sub-division during the year. Fair rents had been settled for a small number of tenants only down to the end of the year.

18. The outturn of survey work for the year was 22.74 square miles of cadastral survey of jotes scattered over the whole tract, which had been omitted in previous seasons for various reasons, 327.53 square miles of forest survey on the 4" scale, 337.17 square miles of waste land survey on the 2" scale, and 17.52 square miles comprised in two blocks of tea land, which the Settlement Officer had in the previous season decided to reserve against tea. Survey work in the Western

Duars came to a close in the year.

The unit of the map in the Duars is a cluster of jotes. There are no villages in the survey sense of the word, the territorial divisions being parganas or taluks, which are too large for units. Altogether 10,303 jotes and khas blocks have been under survey and settlement. Attestation of all the jotes, with the exception of 946, had been completed up to the end of the year. Settlement of rent and revenue had been completed only in 4,170 jotes comprising the Mainaguri tahsil. In this tahsil the revenue has been raised by the settlement from about Rs. 1,28,000 to Rs. 2,09,000; and the Lieutenant-Governor has learned with satisfaction that the new revenue has been collected for the first year without any difficulty.

19. Arrangements have been made for the survey by a professional party during 1892-93 of the Jaipur khas mahal in the Bogra district, covering an area, in a fairly compact block, of 44 square miles, and of the Pataspur estates in Midnapur, with an area of,  $56\frac{1}{2}$  square miles. The smaller Government estates under settlement were the following. In all of these the survey was non-professional, with the exception of some of the estates of Backergunge:—

Burdwan Division.—There was only one small estate Bhetia in Midnapore. The completion of the settlement awaits a decision on the position of the aymadars, which is stated to be analogous to that of the itmamdars of Chittagong.

Presidency Division.—The only estate under settlement under the Tenancy Act was a petty one named Khosalpur in the Nadia district. Though the settlement is reported to have been concluded in October last, the final report has not yet been submitted. The extraordinary delay in completing this little

settlement has already been noticed.

Dacca Division.—One estate named Jowar Joymongal in the Dacca district, 14 small estates called the Kalkini estates in Faridpur, and 21 Government estates with an aggregate area of nearly 95 square miles in Backergunge, were under settlement under the Tenancy Act. The inordinate delay in the case of the first-named estate has been already mentioned. The settlement of the Kalkini estates was originally taken up in 1889 under the Regulations, but in 1891 the proceedings were brought under the Bengal Tenancy Act. After some correspondence it was decided that no new settlement would be required if the survey previously made proved to be correct after testing 10 per cent. of the field measurements. The settlement of these estates has proceeded very slowly, and it has been found necessary, since the close of the year, to appoint a special Settlement Officer for them.

The settlement of 17 of the Backergunge estates, with an area of 52,590 acres, was in charge of Mr. Dwija Das Dutt. Babu Peary Mohan Basu, Settlement Officer of the Dakhin Shabazpur Ward's Estate, was in charge of three with an area of 6,520 acres, while the Sub-divisional Officer of Bhola was in charge of the remaining one, the area of which is 1,062 acres. The description of the work done during the year, given in the report of the Director of Land Records, shows the work done, but does not show how much remained to be

done at the end of the year.

Chittagong Division.—Sixteen small estates in Tippera and three in Noakhali were under settlement under the Tenancy Act. In the case of six of the

Tippera estates all proceedings from demarcation to confirmation were concluded within the year. This is satisfactory, and should be the usual rule in all such settlements. The settlement of these six estates resulted in an increase of Rs. 1,068 over the previous rental of Rs. 2,023. In the case of seven other estates in this district the proceedings were originally started under the Regulations, but eventually the Bengal Tenancy Act had to be applied. The settlement of these estates was also completed within the year, though copies of khatians remained to be distributed. The settlement of another estate, Maizurdi, standing over from the previous year, was also completed, while fair progress had been made in the settlement of the remaining two. In the Noakhali district there were three estates, the settlement of only one of which was completed during the year and awaited the final sanction of the Board; in the case of the other two, settlements of fair rents have been made, but the proceedings have not yet been completed. In one of these the amins' papers were prepared very badly and took an unduly long time to examine and attest.

Patna Division.—Only two small estates with an area of 2,014 acres were under settlement under the Tenancy Act. The settlement of both was concluded during the year, but it is not stated when it was commenced. The rent-roll of the two estates was increased from Rs. 2,721 to Rs. 3,437 in the case of one, and from Rs. 4,848 to Rs. 5,565 in the case of the other. The cost incurred was only Rs. 268 in the former and Rs. 235 in the latter, which is satisfactory.

20. The Wards' estates under survey and settlement were portions of the Wards' Estates.

Burdwan Raj Estate situated in Burdwan, Bankura, Midnapore, Hooghly, Nadia, containing an aggregate area of 141 square miles (exclusive, however, of Bankura), and Kujang with an area of over 226 square miles in Cuttack; the Talipabad estate in

Dacca, containing an area of 94 square miles; the Dakhin Shabazpur estate in Backergunge containing 149 square miles; the Serail estate in Dacca containing nearly 277 square miles; the Kanika estate in Cuttack containing 441 square

miles; and a small estate named Atmi in Shahabad.

The Manager of the Burdwan Raj Estate reported that he had been enabled to recover possession of some missing villages by the help of the survey work of previous seasons; and by his request further survey operations were undertaken in the Bankura district under Government Notifications under the Tenancy and Survey Acts, dated November and December 1891. The work allotted for professional survey during the year was the traverse survey of 650 square miles in Bankura, and the cadastral survey of 62½ square miles scattered over Burdwan and Bankura districts. The records of the Burdwan Raj regarding lands in Bankura were found to be very incomplete and misleading, and out of 621 square miles claimed, the Raj officials could only point out an aggregate area of 13 square miles as actually held by the Raj. The outturn of work in these two districts was 621 miles of traverse survey and 13 square miles of cadastral work, while the cost, owing partly to the defective state of the Raj records, and partly to obstruction on the part of the tenants, was nearly double of what it would have been under more favourable circumstances. The settlement of the have been under more favourable circumstances. Sujamutha estate in Midnapore, appertaining to the Raj, was completed during the year by Mr. Dejen Lala Roy, except with regard to the records of one village. The cost of work was ten annas for survey and fifteen annas for settlement. The report is awaited. The survey of the Kujang Estate in Cuttack, belonging to the Burdwan Raj, which began in 1889, had been completed by professional agency before the beginning of the year under review. The settlement work ended in April 1892.

Much progress does not appear to have been made in the survey and settlement of the Talipabad Estate in Dacca; the process of framing the records has been slow and expensive, and the best efforts of the Settlement Officer are required to bring the operations to a satisfactory conclusion within reasonable limits of expenditure. The survey of the Dakhin Shabazpur Ward's Estate was completed during the year; fair progress was also made in the settlement of this and of the Serail Ward's Estate. The completion report for the latter

settlement is awaited.

The most important survey of a private estate undertaken under the Tenancy Act during the year was that of 21. Private Estates. • Chakla Roshnabad in Tippera belonging to the Maharaja of Hill Tippera. The area of the Maharaja's estates in British territory is 572 square miles, of which about 16 square miles are in the Sylhet district of Assam. The survey and settlement have been undertaken on the application of the Maharaja and at his cost. He has deposited one lakh of rupees to meet the cost. A small section of the Chittagong survey party was despatched to Tippera for this work towards the middle of April, and completed the traverse survey of 150 square miles. The Maharaja had expressed a wish that the operations should be spread over at least two seasons in order to give him time to protect his own interests. The attitude of the tenants was obstructive at the outset, but matters mended when the Collector, Mr. Greer, visited the Survey camp in May and explained to the talukdars the objects of the survey. Owing to the complicated nature of the tenures, the minute sub-infeudation, the litigious character of the tenants, and the number of long-standing disputes between them and their landlord, it seems probable that the settlement of these estates will be attended with special difficulties and a rapid rate of progress cannot be looked for.

22. The Lieutenant-Governor desires to acknowledge the admirable work done during the year by Colonel Sandeman and Mr. Macpherson in connexion with the introduction of a more uniform system of Survey and Settlement into Bengal. Both of these officers have had great difficulties to contend with, and their duties, which have been exceptionally heavy, have been performed with the highest zeal and ability. The thanks of the Lieutenant-Governor are also due to Messrs. Slack and Allen for the progress made in the Chittagong Settlement, and Mr. D. Sunder for that in the Western Duars. Lieutenant Crichton also deserves credit for the ability with which he has conducted the extensive and difficult survey operations in Orissa. Mr. H. R. Reily, the Settlement Officer of Orissa, died of an accident shortly after the close of the year under report. Munshi Nandji has already been commended for his excellent report on the

settlement of the Dubalhati Estate.

By order of the Lieutenant-Governor of Bengal,

II. H. RISLEY,

Secretary to the Government of Bengal.

# REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF 1892-93.

No. 440B., dated Calcutta, the 23rd May 1893.

From—L. P. Shirres, Esq., Offg. Secretary to the Board of Revenue, L.P., To—The Secretary to the Government of Bengal, Financial Department.

- I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the 4th quarter of 1892-93, comprising the months of January, February, and March 1893.
- 2. The quantity of salt of every description cleared during the quarter under report amounted to 24,22,398 maunds, against 26,48,867 maunds in the previous quarter, and 22,12,559 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 56,82,664, against Rs. 62,46,890 in the previous quarter, and Rs. 51,96,684 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of excise salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the

close of the quarter, are shown in table I:-

#### SUMMARY OF THE METROROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY. THE 3RD JUNE 1893.

AT the end of the previous week the depression, though of much less importance, was over the central districts moving in a north-easterly direction, and was causing heavy rain and strong winds within the area of lowest pressure. It continued its slow motion to the north-east, and the centre of the disturbance on the first day of the present week was between north-east, and the centre of the disturbance on the first day of the present week was between Dacca and Sirajganj. By this time the influence of the depression did not extend to Bihar, where pressure was falling slightly and winds had become easterly, but in all the central districts cyclonic winds of north-westerly direction were still blowing. On the 29th a very shallow depression' remained, extending over the eastern districts of Bengal and the greater part of Assam, with lowest pressure between Mymensingh and Silchar. General rain was falling in the parts affected by the depression, though not very heavily, as the largest fall reported was under 3 inches, but with its final disappearance on the following day very heavy rain fell in Cachar, and weather in Bengal began to be more generally unsettled.

While the depression was over the eastern districts of Bengal, westerly or porth-westerly.

While the depression was over the eastern districts of Bengal, westerly or north-westerly winds prevailed over the greater part of the province. These westerly winds were comparatively dry, and there was very little rain until after the depression had filled up. On 30th May gradients and wind directions had become more normal, and cloudy rainy weather prevailed till nearly the end of the week except in Orissa, where rainfall was very partial. The rise of pressure which followed the depression continued till there was considerable excess, and on the 31st of May there was an area of relatively high readings over the north of the Bay and Lower Bengal. Within this area excess was more than a tenth of an inch, and as readings were almost normal in the south of the Bay and also along the foot of the Himalayas, gradients were less steep than usual in the north of the Bay and steeper in Bengal. This high pressure area in the north of the Bay has had an important influence in preventing rainfall in the east of the Bay and afterwards in Bengal, but it was not till the last day of the week that the effect became generally apparent at inland stations. From 31st May till 2nd June general rain fell in all districts, and on the 3rd, the last day of the week, numerous falls were received in the northern districts, but they were lighter in amount. Owing to the cloudy weather which prevailed during the greater part of the week, very low day temperatures were general, but minimum readings were not usually much below the normal. The means were at times more than 10° in defect, and evon at the end of the week, when skies were clearing, there was defect of more than 5° in the western districts.

Pressure rose very rapidly in Lower and Eastern Bengal after the passage of the depression, and readings were soon above the normal in all districts. The distribution was very nearly normal on the 30th May, when the largest difference was '06 inch in Orissa; but on the following day excess varied from '05 inch in the extreme north to '15 inch in Orissa. Changes were slight on the 1st of June, but a brisk fall prevailed on the 2nd and 3rd, after which readings were again very nearly normal. The means for the week show little sign of the large variations which occurred at the beginning, and the greatest difference from the normal is very little over a twentieth of an inch.

Temperature, as stated above, has been much below the normal by day, but not to any great extent at night, the difference in maximum readings being largely due to the cloudy weather which prevailed throughout the week. The means for the large divisions are all below the normal, the largest defect being in the western districts. For Chota Nagpur it is 7.5°, South-West Bengal 4.9°, South Bihar 4.1°, Orissa and Assam about 2.5°, and the other districts between 1° and 2°

other districts between 1° and 2°.

Rainfall.—General and in some cases heavy rain has fallen in all districts except Orissa and the adjacent parts of South-West Bengal and Chota Nagpur, which received very scattered showers between the 29th and 31st. General rain began to fall in Behar on the 31st; but in North Bihar, though the rainfall was fairly well distributed, the amount was generally light, and the mean for the week is only slightly above the normal. For Orissa the mean fall is very little over helf the normal fall, but in all the other districts there has been a rather large excess. In North Bengal excess is 2.1 inches, in East Bengal 4.48 inches, and in South West Bengal 4.18 inches, and in South-West Bengal, Chota Nagpur, and South Behar between 1 and 2 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 3rd of June 1893:-

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet joye the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86,

rmerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in e Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; <, lightning; p, passing temporary showers; , lightning reflection.

APPENDIX TO

# The Calcutta Gazette.

WEDNESDAY, JUNE 7, 1893.

#### NOTICES TO MARINERS.

#### GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 132.

[First Publication.]

BAY OF BENGAL-ORISSA COAST.

Balasore Anchoring buoy away from position.

THE following telegraphic communication has been received from the Commander R. I. M. Str. Guide, dated 1st instant, and is republished for general information:—
"Balasore Anchoring buoy dragged S.-E. 3 miles. Searched Balasore Roads, discovered

no wrecks."

B. P. CREAGH, Comdr., R.L.M., Port Officer of Calcutta.

Published for general information.

T. BUTLER.

CALCUTTA, the 5th June 1893.

Offg. Under-Secretary, Marine Department.

#### GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 133.

[First Publication.]

#### BAY OF BENGAL-ORISSA COAST.

Inner Spit and South end buoys in position.

WITH reference to Notice to Mariners, No. 130, dated the 80th ultimo, issued by this office, a further telegraphic communication has been received from the Port Officer, False Point, that the Inner Spit and South end buoys are now in position, in 24 and 10 feet, respectively; channels the same.

B. P. CREAGH, Comdr., R.I.M., Port Officer of Calcutta.

Published for general information.

T. Burge,

CALCUTTA, the 5th June 1893.

Offu. Under-Secretary, Marine Department.

#### GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 184.

[First Publication.]

AUSTRALIA-NEW GUINEA COAST.

Sandbank west of Warrior reef and Missionary passage.

THE Portmaster, Brisbane, has given Notice (No. 17 of 1893) that Mr. D. Reid, Master of the Queensland Government steamer Albatross, reports that he passed an unknown sandbank awash at low-water neaps in the following approximate position:

9° 38′ 10″ S. Latitude 142° 51′ 20" E. Longitude

Also, that he passed through Missionary passage with the eastern extreme of Bristow (Bobo) island, bearing N.E. magnetic.

Mangrove island does not exist, but a long reef lies parallel with the passage carrying large coral heads in the approximate position of "Mangrove island."

(4 miles from Hapur and 24 miles from Meerut Cantonment Railway station.)

Programme of the midsummer class of technical instruction from 8th to 16th August 1893.

The following subjects will be considered, and Lectures will be delivered on :-

(a)—Stable Management

By Vety. Lt.-Col. J. H. B. Hallen, and Veterinary Lieutenant R. L. Crauford.

of Stud Stallions. (b)—Management Brood Mares, and young stock, and the system of utilising them for

Agricultural purposes. (c)—Forage Crop Cultivation. Lectures on Lucerne, Guinea grass, Impey,

Dub, Carrots, Oats, Barley, &c., cultivation in the several fields. The cultivation is carried out yield-

ing good profits.

(d)—Irrigation by Horses (horses and mares) Mule, and Donkey (male and female) Power; and to breed Mr. H. C. D'Silva, Vety. Overseer. and have profit by the young stock.
The irrigation of the cultivated lands of the Civil Veterinary Department Depôt will be seen practically carried out by horse and donkey power only. No bullocks are employed.

By Vety. Major G. J. R. Rayment and Vety. Lieut. F. B. Drage.

Lectures on the first two subjects will be given in the stables and paddocks, and those in connection with forage crop cultivation will be carried out in the fields on the farm: thus practical demonstration on each subject will be afforded.

Intending visitors and students are informed that Dak Garris can be obtained at Meerut City to take native passengers to Babugarh; six passengers in each garri. Cost of

the entire garri (six fares is about Rs. 6).

Dak arrangements for European gentlemen can be made at Meerut Cantonment. Cost

of entire gardi from Rs. 8 to Rs. 10.

- 4. The men can put up and find lodgings at Hapur, or they can bring small tents to pitch and live in at No. 11 paddock, where most of the cultivation is being carried on.

5. At Bahugarh Bazar they will be able to obtain their supplies for food.
6. Men desirous of receiving practical instruction in ploughing, ridging, harrowing, manuring, water-lifting, and the sowing and cultivating of crops may remain at the Civil Veterinary Department Depôt Farm at Babugarh, until they prove themselves efficient in all branches of forage crop cultivation. Every student thus remaining for practical instruction will, in due course, be examined with regard to the several kinds of work carried out on the farm, and, on his passing a practical examination in the several subjects, he will receive a certificate on which will be recorded his merits as forage crop workman and cultivator.

J. H. B. HALLEN, Vety. Lieut.-Colonel, Inspector-General, Civil Veterinary Department.

The 1st May 1893.

NOTICE is hereby given, under section 6. Act XI of 1859, that the undermentioned estates or shares of the estates, in the district of Hooghly, will be put up to public and unreserved sale at the Collector's Office of that district on the 28rd day of June 1898 for arrears of revenue and other demands which, by the Regulations and Acts in force, are directed to be realized in the same manner as arrears of revenue due.

When in columns 5, 7, and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for each share, and the other share or shares in the estate are excluded from the sale.

## EMIGRATION TO BRITISH AND FOREIGN COLONIES FROM THE PORT OF CALOUTTA, DURING THE YEAR 1892.

GENERAL DEPARTMENT-EMIGRATION No. 1690.

Calcutta, the 8th June 1893.

#### RESOLUTION.

#### READ-

The Annual Report on Emigration from the Port of Calcutta to the British and Foreign Colonies for the year 1892.

The report for the past year, the body of which was submitted at the prescribed time, is sufficiently full and fairly concise, and is accompanied by two maps showing the native districts of emigrants to the Colonies and the districts in which they were registered, and illustrating by different shades of colour the proportion which the number of emigrants bears to the resident population. The maps were received some days after the receipt of the report. It is necessary that the report should reach the Government in a complete form by the prescribed date, and steps should be taken to ensure this in future.

2. Some amendments were made during the year in the rules in force under the Colonial Emigration Act XXI of 1883, and full-powered steamers engaged as emigrant vessels to the colonies, and using either the Cape or Canal route, were exempted conditionally from the rules relating to artificial ventilation.

3. The demand for adult Indian emigrants fell from 13,867 in 1891 to 10,558 in 1892, owing to requisitions having been made by only five out of the eight colonies to which emigration from India is at present permitted. Demerara indented for 4,555, Trinidad for 2,500, Natal for 900, Fiji for 1,370, and Surinam for 1,233 adults. The indents of the first three colonies were smaller than those of the previous year, while those of Fiji and Surinam were appreciably larger. In the cases of Natal and Fiji, the requisitions were more than met, 123 adults being supplied in excess, but in the cases of the other three colonies, the supply fell short by 264 adults. The deficiency of 83 in the case of Surinam was made up in January of the present year. On the whole 10,410\frac{1}{2} adult coolies were supplied during the year as against 10,558 indented for.

Owing to the reduced requisitions the number of licensed recruiters decreased from 1,003 to 857, and the number of registrations from 25,613 to 17,225. Of the 17,225 emigrants, including children, registered in the districts, 14,196 reached the Calcutta depôts, and of these 11,133 were despatched to the respective colonies in seventeen sailing ships and three steamers. The number despatched in 1891 was 15,668. It is satisfactory to find that the prescribed proportion of 40 women to every 100 men embarked was more than complied with, and that in the case of Surinam the percentage of married to single

women rose from 52.5 to 64.3.

4. The North-Western Provinces and Oudh still continue to be the largest recruiting grounds for the colonies, but there is a tendency to have recourse more largely to the districts of Bengal and Bihar. Thus the proportion of emigrants drawn from the North-Western Provinces fell from 67 per cent. to  $59\frac{1}{2}$ ; Oudh contributed 22 per cent. against nearly 24 per cent. in the previous year; while the proportion of natives of Bengal and Bihar rose from 7 per cent. in 1891 to nearly 16 per cent. in 1892. The following table compares the province of registration with that of birth as declared by the emigrants:—

	The second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second secon	Bengal.	Bihar.	North- Western Provinces.	Oudh.
	1892	2,126	3,012	9,212	2 875
Number registered in	1891	2.047	3,347	15,208	5,011
Number who declared themselves to	1892	2,7	743	14,0	)28
be natives of	1891	3,4	100	13,983	5,173

Besides the four provinces indicated above, 454 emigrants declared themselves to be natives of other provinces and places, and a relatively large number is shown to have come from native States. Azamgarh, Ghazipur, Basti, in the North-Western Provinces, and Shahabad in Bihar, which stands fourth on the list with a supply of 1,177 emigrants as against 2,229 from Azamgarh, maintained their places as the chief recruiting districts. A larger number of enrigrants was registered than in the previous year in the districts of the 24-Parganas, Bhagalpur, Monghyr, Patna, and Shahabad. The district of the 24-Parganas, which shows 1,407 registrations, cannot, however, be compared with the others, owing to the fact that a large proportion of the recruiting in that district is carried on among coolies brought to Calcutta by unlicensed recruiters as free emigrants—a practice which, though not free from objections, cannot be checked.

5. A very marked advance has been made in the process of accounting for emigrants who, after being registered in the districts of recruitment, reach the Calcutta depôts. In the past year only 584 registered emigrants have not been

accounted for as against 4,753 in 1890 and 6,755 in 1891. This improvement is no doubt due to the agents visiting their mufassal depôts, and insisting on details of all coolies admitted into the depôts being registered. With the introduction of sub-depôt registers since the close of the year under review, it may be expected that every registered emigrant will be accounted for by the agencies in future. Of the registered emigrants who did not reach the Calcutta depôts, no less than 1,365 were rejected as unfit for emigration. Although this compares favourably with the figure of 1891, viz., 2,057, it seems desirable, both in the interests of intending emigrants as well as of the indenting colonies, that something should be done to ensure that none but really fit persons are selected as emigrants. As pointed out by the Protector of Emigrants, two courses suggest themselves. The first is that the Emigration Agents should appoint qualified medical examiners to test the fitness of the persons recruited prior to their being presented for registration. The other is to charge a registration fee in order to ensure a proper class of intending emigrants being placed before registering officers. If the former means cannot be adopted, it may be necessary to have recourse to the latter, but the Lieutenant-Governor would be glad if this could be avoided. point of great importance is to reduce as low as possible the number of emigrants declared unfit for despatch after arriving in Calcutta. The proportion of persons so rejected fell from 9.7 in 1891 to 8.9 in 1892, but even the latter percentage is high. The Protector rightly points out that the position of an emigrant who is rejected after admission into a depôt is one of peculiar hard-The small sum paid to him on discharge is very inadequate compensation for the breaking up of his home, the trouble he has been put to in coming, and the necessity of making a fresh start in life. Cases of this kind probably do much to deter intending emigrants, and it is to the interest of the Emigration Agents to have a trustworthy medical examination made at as early a stage of the proceedings as possible.

The Lieutenant-Governor has read with pleasure the favourable report of the Medical Inspector of Emigrants, Surgeon-Sanitation and management of Captain A. Leahy, on the general arrangements, the depôts. sanitation and management of the depôts. As compared with the previous year, the percentages of sickness and deaths were 4.44 and 0.37 against 4.67 and 0.66 respectively. The total admissions amounted to 669, and the total mortality to 56, as against 986 and 141 respectively in 1891. The chief causes of sickness were malarial fevers, respectively in 1891. chest affections, and dysentery. There were 264 cases of malarial fever, 12 of which proved fatal, 85 cases of chest affections with 24 deaths, and 89 cases of dysentery, of which one only ended fatally. The great attention paid by the Emigration Agents to sanitation accounts in great measure for the very marked decrease in the number of cases of measles, of which there were only 64 against 183 in 1891. The hospitals of the Surinam and British Guiana depôts were improved at considerable expense, and further improvements are being undertaken in the latter. At no time during the year was the embarkation or despatch of emigrants delayed by the occurrence or existence of any epidemic disease. The aggregate mortality on the voyages to the colonies amounted to 146 against 398 in 1891, and the percentage of deaths on the number embarked in Calcutta fell from 2.54 to 1.31.

7. Five thousand two hundred and twenty-five return emigrants, including 11 from Bourbon, were re-shipped in eight sailing vessels and eight steamers from the various colonies as against 4,201 in the preceding year. Of these 87 or 1.66 per cent. died on the voyage, a percentage which the Lieutenant-Governor agrees with the Protector in considering remarkably low, looking to the fact that a certain proportion of return emigrants are advanced in age and enfeebled in health. It is satisfactory to observe that among the returned emigrants none were lepers. The savings brought back averaged Rs. 156 per man as against Rs. 138 in the preceding year, Jamaica, Trinidad and Natal showing the largest averages, and Mauritius the smallest. The figures of return emigrants who have gone back to the colonies during the year may be quoted as affording some indication of the popularity of the different colonies among the emigrant classes. Out of 551 returned coolies, 333 re-emigrated to Demerara, 110 to Trinidad, 62 to Natal, 27 to Fiji, and 19 to Surinam.

8. This branch of the work of the Protector's office was efficiently conducted during the year. Such delay as occurred in administering appears to have been due to the fact that when heirs have been traced the Emigration Agents in India cannot pay to the Protector the amount standing to the credit of the estate without the sanction of the Colonial authorities. Notwithstanding this cumbrous procedure, it is stated that all colonies except Mauritius make payments within a reasonable time. Of 500 estates, valued at Rs. 70,384, which came under administration, 360, amounting to Rs. 49,772, were finally disposed of, leaving a balance of 140, amounting to Rs. 20,611, still under enquiry, for which British Guiana, Mauritius, and Fiji are mainly responsible.

9. Owing to smaller despatches the receipts derived from the consolidated

9. Owing to smaller despatches the receipts derived from the consolidated fee of Rs. 3 per head on each coolie embarked fell from Rs. 47,624 to Rs. 35,272-4, while the expenditure rose from Rs. 27,632-15-5 to Rs. 29,616-10-8. This was due to the fact that in the preceding year the amount shown as pay and allowances of Emigration officers was unusually low by reason of acting arrangements. The balance at credit of the Bengal portion of the fund at the close of the year was

Rs. 5,655-9.4 against Rs. 29,616 10-8 in 1892.

10. From the above summary it will be seen that the year 1892 was on the whole a successful one for Colonial Emigration; and the Lieutenant-Governor desires to express his thanks to Dr. Macleod, Protector of Emigrants, to Surgeon-Captain A. Leahy, Medical Inspector of Emigrants, and to the Emigration Agents to whose care and attention the good results attained were due.

ORDER.—Ordered that a copy of the Report and of this Resolution be submitted to the Government of India, Revenue and Agricultural Department, for information.

Ordered also that a copy be forwarded to the Protector of Emigrants, Calcutta, for information, and to all Commissioners of Divisions for information and circulation to all District Officers subordinate to them.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal,

# RESOLUTION ON THE ADMINISTRATION REPORTS OF THE ALIPORE AND HAZARIBAGH REFORMATORY SCHOOLS FOR THE YEAR 1892.

#### No. 1865P.

#### RESOLUTION.

JAILS.

Dated Calcutta, the 9th June 1893.

#### READ-

(1) Letter No. 5260, dated the 6th May 1893, from the Inspector-General of Jails, forwarding the Administration Report of the Alipore Reformatory School for the year 1892.

(2) Letter No. 5085, dated the 29th April 1893, from the Inspector-General of Jails, forwarding the Administration Report of the Hazaribagh Reformatory School for the year 1892.

#### Read also—

The Reports for the year 1891 and the orders of Government recorded thereon.

The Alipore School.—The daily average number of boys confined in the Alipore School rose from 142 in 1891 to 168 in 1892. Sixty-two boys were admitted during the year and 27 were released. There were no serious offences, and discipline is reported to have been well maintained. It is satisfactory to notice that, in spite of the large increase in the number of boys, the average number of punishments to each boy fell from 1.02 in 1890 and 0.66 in 1891 to 0.45 in 1892.

With an increase in the number of boys there has been an increase of Rs. 59-3 in the money rewards earned. The average number of boys entitled to marks rose from 82-16 in 1891 to 113-5 in 1892, and the weekly average earnings from Rs. 3-2-9 per head to Rs. 4-3-3. There were no escapes and no deaths during the year, and the small increase from 2-52 to 2-96 in the number of admissions to hospital is accounted for by an outbreak of chicken-pox among

the boys in the early part of the year.

2. No important buildings were undertaken, but it is reported that more workshops are urgently required. The arrangements for the work and recreation of the boys remained practically the same as in former years. At the close of 1891 gymnastic exercises were introduced into the school, and one hour's gymnastic training under a duly qualified teacher formed a part of the daily routine throughout the past year. The boys were allowed to practice as much as they pleased during their leisure hours and on Sundays, and His Honour is glad to hear that they are taking kindly to this form of exercise, which is conducive to their good health and keeps them suitably employed

during play hours.

Of the 64 boys released from the Reformatory, concerning whom reports were received from Magistrates during the year, 9 were reconvicted and sent to jail, one was reported as bearing a bad character, while the remaining 54, of whom only 2 are following the trade they learned at school, are believed to be leading honest lives. Out of 263 boys released since the opening of the school, 38 have subsequently been sent to jail, 42 have been reported as bearing bad characters, and 183 as bearing good characters. The number following the trade learned in the Reformatory is only 29. The explanation of this very discouraging fact is doubtless to be found in caste prejudices and social customs, which compel boys on their return home to follow the professions of their parents and prevent them from taking up the trades which they have learned at school. Having regard to the great variety of caste occupations in Bengal, and to the impossibility of employing boys in reformatories on more than a few trades, the difficulty indicated by these figures is probably not to be entirely overcome. Still special care should be taken to adjust the trades taught, as far as possible, to the caste requirements of the boys, so that on release they may be able to practise them.

- 4. The total expenditure for 1892 was Rs. 18,298-1-4 against Rs. 15,776-5-6 in 1891, the increase being mainly due to the large number of boys confined in the school. The cost of maintenance per head fell from Rs. 111-1-6 in 1891 to Rs. 108-14-6 in 1892. The average expenditure per head on diet was Rs. 34-9-2, compared with Rs. 32-10-3 in 1891, the increase being attributed to the higher price of rations. Arrangements have been made for the purchase and storing of supplies of grain at the cheapest seasons of the year for the use of the school, and the sanction of Government has lately been given to the construction of a godown for this purpose. The net profits from the Manufacturing Department amounted to Rs. 12,259-3-4, against Rs. 10,235-12-8 in 1891.
- 5. A proposal to amalgamate the Alipore and Hazaribagh Schools and to locate them at Hazaribagh was under consideration during the year, but was finally abandoned, the Lieutenant-Governor deciding that it would be inadvisable to make any change in existing arrangements. The Lieutenant-Governor's acknowledgments are due to the Board of Management of the School, and he is glad to notice that Mr. C. J. Courtenay has again discharged his duties as

Superintendent to the complete satisfaction of the Board.

- 6. The Huzaribogh School—The daily average population of the Hazaribagh School was 300.93 against 296.10 in 1891. Sixty-nine boys were admitted into the school, 66 were released, and 3 died. Of the three deaths, one was that of a boy, Babu Lal, who accidentally fell into the well outside the play ground and was drowned. The head warder, through whose neglect the boy was allowed to leave the play-ground, was fined half a month's pay, and the warder posted on the wall near the well was dismissed. Discipline was well maintained during the year, and the conduct of the boys is reported to have been exceptionally good. There were 266 punishments against 219 in 1891, but these were chiefly for short work, the number of offences under this head having increased from 23 to 158. The educational requirements of the school were well attended to, and there was a satisfactory increase in the number of boys who attended the night school. The daily routine was the same as in former years. A gymnasium was opened during the year, and an instructor on Rs. 10 a month has lately been appointed under the orders of Government. The general health of the boys is reported to have been good. The daily average of sick was 2.89 against 2.54 in 1891.
- 7. The total expenditure of the school in 1892 was Rs. 77-11-7 per head, against Rs. 83-3-9 in the preceding year. The cost of diet per head rose from Rs. 27-15-9 to Rs. 29-1-9, the increase being due to a rise in the cost of rice, the average price of which was 6 annas 10 pies per maund in excess of that of 1891. In his Resolution on last year's report the Lieutenant-Governor expressed a hope that greater attention would be paid to the judicious storing of food-grains at the proper season, and he is glad to notice that by the purchase of 1,000 maunds of wheat at the time of the harvest, a saving of about 5 annas a maund was effected. A new cook-shed was built during the year, and the new work-shed, which covers an area of 16,000 square feet, and in

which all the trades are now carried on, was completed.

8. The net profits on articles manufactured in the school increased from Rs. 2,746-12 in 1890 and Rs. 2,661-12-9 in 1891 to Rs. 3,437-5-8 in 1892. The packing of quinine, which was introduced in September and was carried on for the remainder of the year, is a most suitable form of occupation for young boys and will be further extended. With this exception the employment of the boys remained the same as in former years.

- remained the same as in former years.

  9. Reports regarding 96 boys released from the school were received during the year, and of these four were reconvicted and sent to jail. It is said that 10 of these boys are following the trades learned in the Reformatory, and this is the best record of any year since the opening of the institution in 1882.
- 10. Sir Charles Elliott visited the Reformatory in November last, and was favourably impressed with the bright and healthy appearance of the boys. The arrangements for work and recreation were satisfactory, and His Honour was glad to see that no serious offences had been committed, and that the number of punishments was small. The management of the school reflects

credit on Mr. Hill, the Deputy Superintendent, who is highly spoken of by the Inspector-General of Jans and by all who have visited the school.

ORDER—Ordered that a copy of this Resolution be forwarded to the President of the Board of Management of the Reformatory School at Alipore or information and communication to the Members of the Board.

Ordered, also, that a copy of the Reports, and a copy of this Resolution, be rwarded to the Inspector-General of Jails for information and communication the Superintendent of the Hazaribagh Reformatory School.

Ordered, also, that the Resolution be published in the Calcutta Gazette.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Govt. of Bengal.

## RESOLUTION ON THE REPORT ON THE LEGAL AFFAIRS OF THE GOVERNMENT OF BENGAL FOR THE YEAR 1892-93.

No. 135J.D..

JUDICIAL.

Darjeeling, the 12th June 1893.

EAD-

The Report on the Legal Affairs of the Government of Bengal for the year 1892-93. Read also—

The Reports of the two previous years, and the orders of Government thereon.

The report was due on 1st May, and was received on 30th May. The Legal Remembrancer remarks that, having regard to the unpunctuality of some districts and the references which are inevitable in the case of others, it is not possible for him to compile the statistics the report contains within 15 days from the date on which the district reports are due in his office. As it is, the figures of Government litigation from Manbhum and Lohardaga and from 15 Courts of Wards' Estates have not yet been received. This question will receive the separate consideration of Government.

2. Of the two appeals to the Privy Council which were pending at the close of last year, the case of Maharani Sarat Sundari Debi versus The Secretary of State for India in Council was disposed of by the determination of certain remanded issues by the High Court. The remaining case of Dakhina Mohan Roy Chowdhry versus Saroda Mohan Roy Chowdhry and others, minors under the Court of Wards, is still pending, but no appearance will be made for the wards, the amount at stake not justifying the outlay for costs. One fresh appeal on behalf of Government was filed towards the close of the year.

appeal on behalf of Government was filed towards the close of the year.

3. The results of Government litigation in the Civil Courts of Bengal during the year under review and the two preceding years are given in the accompanying table:—

				Δ	PPBAL6-	_	A	PPBALS-	-	•		
	ORIGINAL CASES,		ORIGINAL CASES,  Before lower Courts.  Before High Court.				lourt.	TOTAL.

#### Excluding land acquisition cases the figures are as under-

There is a considerable increase in the number of original cases of which no explanation is given, and it is clear that, except in the case of appeals to the High Court, the Government has been little more successful in its litigation than it was in the preceding year.

Of the six cases in which Government was unsuccessful in the High Court, in only one did it appear as appellant; in three of them the result was due to a Full Bench ruling setting aside the previous decision of a Divisional Bench as to the period of limitation in demands for unclaimed sale proceeds. One case related to the terms of settlement on which a resumed taluk in Kutubdia in Chittagong was sold. The facts of this case are summarised with such brevity that the Lieutenant-Governor is in doubt as to their meaning, but it seems that a principle of great importance was laid down with regard to the right of a talukdar to a permanent settlement, and His Honour would be glad to receive a special report in this case through the Board of Revenue with as

little delay as possible.

Decided in favour of Government Decided against Government Compromised, &c. Percentage in favour of Govern-ment.

By showing as one case analogous cases governed by a single decision and excluding land acquisition cases, the Legal Remembrancer shows that the percentage of Government successes in the Lower Appellate Courts and in Courts of first instance becomes 84.6 and 75.4 respectively. It is presumed that none of the cases in which Government was successful were analogous ones, as otherwise this mode of calculation is not legitimate. Apart from cases against the Railway administrations, the most important suit brought in the Court of first instance relates to a claim brought by a zamindar to receive compensation for the value of land previously occupied by public roads which were included in a large area acquired by Government for public purposes. The claim which was partially admitted by the Subordinate Judge appears, as the Legal Remembrancer observes, to be a novel one in this country, and the Lieutenant-Governor presumes that there must have been exceptional circumstances unexplained in the report which led to such an unusual decree being passed. It is satistactory to note that in only two original cases did Government appear as an unsuccessful plaintiff.

The following figures show the results of Courts of Wards' litigation during the last three years in all courts. The figures are satisfactory in themselves and as compared with previous years:—

	(1)	(2)	(3)
	1890-91.	1891-92.	1892-93.
<ol> <li>Decided in favour of Court of Wards</li> <li>Decided against Court of Wards</li> <li>Compromised, remanded, or withdrawn</li> <li>Percentage in favour of Court of Wards</li> </ol>	. 711 . 97 . 30 . 88	903 139 76	654 73 66 89·9

7. The extent to which decretal amounts due to Government have been realised is shown by the following figures:—

	1890-91.	(2) 1891-92.	(3) 1892-83.
	${f Rs.}$	Rs.	Rs.
1. Amount under realization	61,281	64,248	42,617
2. Amount realized during the year 3. Percentage of recovery	14,790 24 ₃ 7	30,333 451	12,616 294

Of the net balance Rs. 9,288 have been remitted, and further sums are said to be irrecoverable.

#### 8. The amount of wards' decrees recovered is as follows:—

	•	-	(1)	(2)	(3)
•			1890-91.	1891-92.	1892-93.
			Rs.	· Rs.	Rs.
1.	Amount under realization		11,92,016	10,95,704	9,83,675
2.	Recovered during the year	•••	1,51,504	2,30,997	1,59,600
შ.	Percentage of recovery	•••	13	21-	161

The outstanding balance still remains excessive, and it would appear that the efforts to realise it are not marked by much success. In the Tikari estate Rs. 1,15,410 are said to be under execution, and yet only Rs. 23,922 were collected during the year, and the proceedings would appear to be hopeless. The balance due to the Burdwan Raj estate has not been materially reduced. The subject of these realisations has year after year formed the subject of unfavourable comment, but there is nothing in Mr. Allen's report which affords any excuse for the bad results or throws light on the difficulties which have been before brought to notice. The Lieutenant-Governor does not know whether commission is now granted to the Nazir or others concerned in realising these outstanding decrees, and commends this question to the consideration of the Board of Revenue.

9. The Lieutenant-Governor is glad to receive the favourable report which is given of the character and qualifications of the Government Pleaders in almost every district of these provinces, and acknowledges the generally satisfactory manner in which Government litigation has been conducted.

Ordered, that a copy of the Resolution he forwarded to the Superintendent and Romembrancer of Legal Affairs and the Solicitor to Go-

vernment for information.

Ordered also, that a copy of the Resolution be forwarded to the Revenue Department of this Government and to the Board of Revenue for information.

Ordered also, that a copy of the Report and Resolution be submitted to the

Government of India in the Home Department for information.

Ordered also, that a copy of the Resolution be published in the Calcutta Gazette.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON, Chief Secretary to the Govt. of Benga!.

#### Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 10th June 1893.

No.				Rainfall at Sadar Station in inches.	Sadar Character of the weather and state and prospects of the crops.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF MAY 1893.

THE discussion of the weather experienced in Bengal during the past month is readily separated into three parts, because of the decided character of the conditions which prevailed at different times. During the first period, which was comparatively short, lasting only till the 8th, a disturbance, which originated to the west of the province, caused showery weather in all districts, and as the accompanying depression filled up rapidly, the pressure arrangement not only in Bengal, but also over the Bay, became very uniform and initiated what may be considered as the second period. This interval, which continued till the 17th, was characterised by very uniform pressure throughout, and consequently fine calm cloud-less weather. The third period, from the 17th till the end of the mouth, is notable because of the cyclone, which, forming in the south of the Bay, advanced northwards into the north-west angle, and there developed into one of the most severe experienced at the head of the Bay during the past quarter of a century. There is a very intimate connection between the conditions during the second interval and the stormy weather which followed, but they are here separated for convenience of discussion. The effect of the calm weather which always precedes a disturbance in the Bay has been frequently discussed in meteorological publications, and though allowing that the history of the cyclone should be taken up from the 8th rather than from the 17th, the present method is taken for the sake of brevity.

During the first eight days the effects of two slight disturbances were felt in Bengal. Both came from the west, and were due to depressions of considerable depth, the first of which was filling up as the month began. With an interval of two or three days only the second came, and caused a rapid fall of pressure on the 7th in the western districts, especially in Chota Nagpur. It practically disappeared on the following day, as there was a rise equally rapid in the same districts. Easterly winds with cloudy skies and numerous local storms prevailed during these early days of May, but rainfall was more general on the 2nd and again on the 7th and 8th than on the other days. Though unusually late in the scason, hail showers were reported from many places on the 7th, but this late occurrence of hail may possibly be accounted for during the present year by the very low temperature which has prevailed, and which was a very noticeable feature of the weather on the 7th in the western districts.

A noteworthy feature of the recovery of pressure in connection with both these depressions was its commencing in the north-east of the province, and from there spreading to the south-west, in consequence of which the area of low pressure was driven southwards, and the easterly circulation, instead of changing, as it would have done if the depressions had passed castwards, became even more prominent.

After the 8th pressure became very uniform, and though showers continued to fall and temperature was very low for some time, weather steadily improved. By the middle of the month fine cloudless weather prevailed, and almost for the first time during the present year heat was greater than the average for the season of the year. Over Bengal and the north of the Bay this fine weather continued till the 21st, but in the south of the Bay as well as at the

Burmah stations unsettled conditions began to appear about the 17th.

Cyclonic storm from the 17th to the 29th.—From the 17th signs of unsettled weather appeared in the stronger winds at the Ceylon stations, and in the easterly directions in Burmah, but the disturbance had at that time probably not concentrated into a well-defined storm, as vessels proceeding up the Bay experienced strong winds but variable pressure. Gradients gradually became steeper in the south of the Bay as the area of stormy weather extended northwards, and as pressure fell briskly for several days at all the coast stations, the depression steadily widened and deepened till the 21st, when its influence at the Burmah and Orissa stations became more marked. The area of low pressure within which defect was more than 15 inch then covered the whole of the north of the Bay. The sea was very rough at Diamond Island, and a fairly strong wind was blowing, but after a day or two both wind and sea began to moderate. This improvement in the cast of the Bay was only temporary; as after the storm attained to great intensity in the north-west angle, the wind again strengthened at Diamond Island. While this improvement was going on the Burmah coast, the depression had become better defined in the north-west of the Bay, and it then appeared as if the disturbance was similar in character to the ordinary small storms which occur frequently in the rainy season.

On Monday, the 22nd, pressure was rising briskly in the south-east of the Bay and changes were small elsewhere, while wind velocity was low except at Diamond Island and in Ceylon. After this the motion of the depression was slow towards the north, the centre probably passing at no great distance from the North Orissa coast. On the 23rd pressure fell rapidly at False Point, and the wind blew from the north-east with steadily increasing velocity. By the evening of this day pressure had fallen to 29 inches, the velocity of the wind rose to 40 miles an hour, and incessant heavy rain fell. At 8 A.M. on the morning of the 24th, the centre was almost east of False Point, and wind velocity was increasing at all the stations on the north-west coast as well as over Lower Bengal, but rainfall, though very heavy in Orissa and gradually extending to South-West Bengal, was very partial at stations further inland, or entirely absent. During Wednesday and Thursday the motion of the depression was very slow, and at times it appeared to be almost stationary, but it was steadily developing. On the afternoon of Thursday it seemed to be moving in a more westerly

direction so as to pass well to the west of Balasore. The wind directions at Saugor Island, Calcutta and Balasore began to change to south through east, and the strength of the wind moderated at the first two. During the evening of Thursday, however, the winds returned to their previous north-easterly direction and began to increase rapidly in velocity. On the near approach of the centre to the north coast of the Bay, pressure fell with great rapidity at Saugor Island, and reached its lowest point about 5 o'clock on Friday morning. when it was 28 423 inches. The centre must have been then a short distance to the west of Saugor Island. A hurricane began at about 4 A.M., and continued for several hours. At 5 A.M. the velocity was reported to be not less than 90 miles an hour, and the continuance of these high winds is shown by the average velocity from 8 A.M. on Friday to 8 A.M. on Saturday, being 50 miles an hour. After passing Saugor Island the centre moved more to the west, passing half-way between Calcutta and Midnepore in the early part of the afternoon. It then turned to the east and passed slowly across the central and eastern districts of Bengal, but with steadily diminishing intensity. At 8 A.M. on the 28th the centre of the disturbance was between Dacca and Sirajganj, and at that time its influence did not extend to Bihar, where pressure was falling slightly and winds were becoming easterly. the 29th a very shallow depression remained, extending over the eastern districts of Bengal and the greater part of Assam with lowest pressure between Mymensingh and Silchar. General rain was falling on the parts affected by the depression, though not very heavily, as the largest fall that was reported was under 3 inches, but with its final disappearance on the . following day very heavy rain fell at Cachar, and cloudly showery weather became general over the northern districts of Bengal and in Bihar.

The north-easterly motion of the depression had an important influence on the quantity of rain and its distribution over the northern districts. As the cyclonic circulation which prevailed over a wide area meant westerly and north-westerly directions and comparative absence of moisture even when the centre was still at a short distance from the coast. It was only after the depression filled up in Assam that rainfall became general in North Bengal

and Bihar.

Pressure.—At the beginning of the month there was defect everywhere, varying from 'I inch in the eastern districts to '17 inch in the west of Bihar. The rise that commenced on the 1st in North Bengal and spread southwards and westwards continued till the 4th, when the distribution was above the normal by '05 inch. It again began to fall slowly on the 5th and 6th, but very rapidly In the 7th, after which, as in the previous case, a rapid rise commenced in the north and spread southwards. Excess was then as much as '2 inch. From the 8th till the approach of the deep depression from the Bay small changes prevailed, mean pressure remaining considerably above the normal. From the 13th to the 21st there was a steady moderate fall; on the 22nd a slow rise prevailed even in Orissa, but on the 23rd, though pressure was still rising over nearly the whole of Bengal and the Bay, there was a rapid fall at False Point and a brisk fall at the other Orissa stations. From this date till the 29th very large changes occurred at stations near which the centre passed. Readings at Calcutta, Midnapore, Balasore and False Point fell to 29 inches and at Saugor Island on the morning of the 26th the lowest reading observed was 28'423 inches. Owing to the slow motion of the depression changes during the 26th were very small except at Saugor Island, Balasore, Midnapore: and at Sirajganj and Faridpur, where there was a rapid fall. The recovery in South-West Bengal began about 24 hours after the centre passed, but as the disturbance was rapidly moderating, the changes in the central districts were not so delayed. The rise that followed continued till there was a considerable excess at the end of the month.

Temperature. Two periods of unusually cool weather occurred during May—the one between the 4th and the 8th, and the other from the 24th to the 29th. At other times readings were more frequently below than above the normal, but from about the middle of the month till the 22nd there was excessive temperature over the greater part of the province, especially in the northern districts. While mean temperatures were below the normal, the greater part of the defect was due, not so much to the air being cool, but to the sun being obscured by clouds. This is shown in the night temperatures being only slightly below the normal, while in maximum temperature there was a very large defect. From the 4th to the 9th means were frequently between 15° and 20° below the normal in the western districts, but in the eastern half of the province defect was generally below 5°. Between the 24th and the 29th, while the cyclonic storm was passing across the province, there was again a large defect, chiefly in Orissa, South-West Bengal, and part of the central and eastern districts. In Bihar and North Bengal readings during these days never differed much from the normal. The result of these very low readings in the western districts at the beginning and end of the month is very obvious in the means for the month. The monthly mean defect for Chota Nagpur is 4.9°, in South-West Bengal 3.7°, in Orissa 2.7°, and in South Bihar 2.3° below the normal. In East Bengal and North Bihar defect is 1°, in North Bengal less than half a degree, while in Assam there is excess of 1.4°.

Rainfall.—During the disturbed weather, which continued for some days at the beginning of the month, fairly general rain fell at times, and the average fall was considerably above the normal for those days. An interval of dry weather then commenced and continued except in part of East and North Bengal till the 22nd, when the disturbance in the Bay began to cause general rain in Orissa. From the 23rd to the 25th excessive rain fell over the whole of Orissa, but especially near the coast, and the falls continued on the 26th, but were not so heavy. As the depression advanced northwards, the heavy rainfall spread gradually over South-West Bengal. In the southern half it was general and heavy from the 25th to the

27th, and in the northern half, as in all the central and eastern districts, on the 26th to 28th or 29th. In North Bengal and Bihar scattered showers fell up to the 29th, when fairly general rain was received, but in both these districts the average fall was below the normal. The average falls for fhe larger divisions are below the normal by less than half an inch in North Bengal and North Bihar, and above elsewhere by 1.67 in South Bihar, 3.07 in Chota Nagpur, 9.13 in East Bengal, 6.75 in South-West Bengal, and 19.65 inches in Orissa. The fall in Orissa is more than six times the normal and in South-West Bengal, East Bengal, and Chota Nagpur more than twice the normal.

The actual falls in Orissa vary from 10 to 44 inches; in South-West Bengal from 10 to 20 inches; in East Bengal from 10 to 35 inches. In North Bengal they are generally between 5 and 10 inches, and in Bihar and Chota Nagpur under 5 inches. The excessive character of the rainfall accompanying the cyclonic storm may be shown by quoting some of the falls in Orissa and South-West Bengal for a period of not more than 24 hours: Kendrapara and Jajpur 11 inches on the 24th; Soro 8.6 inches, and several other places more than 6 inches on the same day; Kendrapara 9.3 inches on the 25th; and Jajpur, Salipur and Chandbali 6 inches or more. In South-West Bengal the heaviest falls were on the 26th or 27th, when the following places reported a fall for one day of more than 7 inches:—Bagerhat, Jahanabad, Burdwan, Indas and Sonamukhi in the Bankura district. In East Bengal on the same days similar amounts of more than 7 inches fell in the Backergunge and Noakhali districts.

The following table gives full data for comparison of the actual and normal rainfall of the month of May for all districts of the province. The figures are derived from the average and actual rainfall of the rain-reporting stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and mouthly tables. The first column gives the normal or average district rainfall as determined from the observations of the past 15 years. The second column gives the actual district rainfall as determined from the weighted actual rainfall of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third in a slightly different form, stating as a percentage how much the district rainfall of the month varied in excess or defect from the normal:—

Percentage Table for May 1893.

* Means of 5 days. | † Mean of 6 days.

**Exploration.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period to the abnosphere is expressed at percentage, saturated air being pressure by 100. A clear sky is denoted by 0 and an overcase sky by 01 rainfall the normal mean are the numerical means or average of the rainfall in that destrict determined from the returns sent or by the subdivisional station district, i.e., from total rainfall at the subdivisional stations in the district sending in peturns divided by the number of stations. A rainy day is one on

for the week ending Saturday, the 10th of June 1893.

**Baplanation...... indicates that no rain-has fallon. If the return for any day has not by a received, the corresponding space is left blank. If any of the returns wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the deduction of a rainy day is wasned. If the CALCUTTA, the 13th June 1893.

#### SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 10TH JUNE 1893.

SETTLED weather has prevailed over the whole province throughout the week, if the occasional occurrence of local storms with rain be overlooked. These were fairly numerous

in Lower Bengal in the early part of the week, and later in the northern districts.

On the first day, Sunday, the fourth, the area of lowest pressure lay along the foot of the hills, and isobars ran almost due east and west. Gradients were steeper than usual because of an excess of nearly a tenth of an inch in Orissa and the adjacent parts of South-West Bengal and Chota Nagpur, and a similar defect in North Bengal and North Bihar. A brisk rise commenced on the 5th in North Bengal and the defect there soon disappeared, after which a steady slow rise up to the last day of the week caused an excess of from 1 inch to 2 inch in the northern districts. In consequence of these changes the area of lowest pressure was forced to the west, and winds from being south-westerly at all stations, changed to south or south-east in Lower Bengal and east in North Bengal and Bihar. These directions are fairly normal for the season, and continued unchanged till the end of the week. With the commencement of easterly winds local storms became more general in East and North Bengal, and probably owing to the scattered rainfall brought by them temperature gradually fell. In the beginning of the week temperature was below the normal only in Orissa and Chota Nagpur, but the area of relatively low readings gradually extended, and by the end of the week included all districts.

Pressure.—After the steady rise of pressure in the northern districts the distribution became much more uniform over Bengal and the Bay than is usual in the early part of June. In the extreme south of the Bay pressure was very nearly normal, but excess gradually increased towards the north, where it was in places more than 15 inch. The means for the week at the Bengal stations are all above the normal by amounts varying

from .05 inch to .12 inch.

Temperature.—As stated above, temperature was generally above the normal at the beginning of the week, but owing to local storms readings fell below the normal except at a few stations in East Bengal and the west of Bihar. Coolest weather was in the southwestern districts, and especially in Chota Nagpur. This is shown by the means for the large divisions. In Chota Nagpur mean defect is 3.8°, and in Orissa and South-West Bengal about 1°. In all the other districts except Assam there is excess; in South Bihar and North Bengal of about half a degree, and East Bengal and North Bihar of 1.7°.

Rainfall.—Showers fell occasionally in all districts, but the total falls for the week are below the normal in all districts. The showers occurred in the southern districts chiefly on the 4th and 5th or the first two days of the week, and in the north from the 6th to the 10th. The largest mean fall is 2.04 inches in North Bengal, and the only other over 1 inch is 1.12 inches in East Bengal. Chota Nagpur received on an average .83 inch, North Bihar .61 inch, South-West Bengal .52 inch, Orissa .25 inch and South Bihar .16 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 10th of June 1893:-

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore '003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.5 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a that ched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast.

METEOROLOGICAL OFFICE, GOVT. OF INDIA; Calcutta, the 12th June 1893.

[First Publication.]

AUSTRALIA-Torres strait, inner route.

Reported danger off No. 2 Claremont island.

The Portmaster, Brisbane, has given notice (No. 18 of 1893) that Mr. Daniel Sullivan, engaged in pearl-shelling, reports that he obtained a depth of 4½ fathoms at high water, on a rocky bottom, with the N.-W. end of No. 2 Claremont island bearing E. by S. ½ S about 2 miles distant, and thinks that there is not more than 3 fathoms at low water thereon.

As this danger is in the vicinity of Helms shoal, reported to lie with No. 2 Claremont island bearing S. 83° E. distant 1½ miles, Masters of vessels are hereby cautioned.

NOTICE TO MARINERS-No. 142.

[First Publication.]

JAPAN-SIMONOSEKI STRAIT.

Buoy marking Kasaze rock.

THE British Admiralty has given notice (No. 223 of 1893) that a buoy has been placed in 6½ fathoms at low water spring tides, eastward of Kasaze rock, at the west entrance of Simonoseki or Nagato strait. The buoy, conical red, and surmounted by a cone (about 141) feet above water), lies with the south-west extreme of Hamo island (Miaiko jima), N.-E. by E. E., distant 6½ cables, and cape Sizikuts, N. ½ W.

Approximate position, lat. 33° 56′ 4″ N., long. 130° 52′ 18″ E.

(2) Hayatomo strait—Fixed light on Northern shore.

Also, that on or about 1st April 1893, a light, named Danno ura, would be exhibited from a light-house recently erected on the northern shore of Hayatomo strait, Simonoseki

Danno ura light is a fixed white light, with a sector of green light, showing white from the bearing of S. 57°W., through north, to N. 41° E., green over the channel from N. 41° E. to N. 51° E., and is obscured in other directions. It is elevated 52 feet above the sea, and should be visible in clear weather from a distance of 6 miles.

The light-house, 44 feet high, is a hexagonal wooden structure, painted red and white in

Approximate position on Admiralty Charts, lat. 33°58′ 25" N., long. 130° 57′ 48" E.

Note.—Danno ura light kept in line with Kanabuse beacon light (fixed white) I ads through the fairway of Middle channel, between Middle ground (Nakanosu) red buoy and Tobigasu buoy

#### GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 143.

[First Publication.]

JAPAN-YEZO ISLAND, EAST COAST.

Go Yo Mai channel—Sunken rocks south-westward of Odoke Shima.

WITH reference to Notice to Mariners No. 44, dated 25th April 1890, issued by this office, the British Admiralty has given further notice (No. 224 of 1893) of the existence of two sunken rocks south-westward of Odoke Shima, eastern side of Go Yo Mai channel-

A rock, with a depth of 2 fathoms on it, and deep water to the south-westward, lies with cape Noyshaf (Nosapp) light-house, bearing W. by N. 3 N., distant 1 10 miles; and Odoke Shima summit, N.E. 3 E.

Approximate position, lat. 43° 22′ 25″ N., long. 145° 51′ 35″ E.

A rock, with a depth of two fathoms on it, and deep water to the south-westward, lies about 1½ cables north-north-west of rock No. 1, in a position with cape Noyshaf light-house, bearing W. by N. § N., distant 1½ miles, and Odoke Shima summit, N.E. by E. ½ E. (2)

Note.—The vicinity of the rock reported by the Mutsu-maru, viz., with cape Noyshaf light-house, bearing N.W. by W. & W., distant  $1_{10}^6$  miles, was scarched under favourable conditions by Japanese surveyors, depths of 15 to 16 tathoms being obtained in the position with 30 fathoms near, and no indication of a rock in the locality. The rock in this position has consequently been expunged from the Admiralty charts, as it is believed that the Mutsu-maru touched on the above rocks south-westward of Odoke Shima.

(Variation 5° Westerly in 1893.)

H. II. RISLEY, Secy. to the Govt. of Bengal.

# REVENUE DEPARTMENT,—(FORESTS).

# NOTIFICATION-No. 2351For.

The 11th June, 1893.—With the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to cancel the notifications of the 6th December, 1882, and 18th April, 1885, (published in the Calcutta Gazette of the 12th December, 1883, and 29th April, 1885, respectively), declaring certain tracts situated in the mahals of Angul (Orissa) to be Reserved Forests, and to substitute the following in lieu thereof:—

District.	Pargana or sub-division.		Boundaries.	REMARKS.		
Angul	Angul	Tikar-para.	North.—From a point on the boundary between Hindole and Angul, southeast of Kanja, along a new demarcated line (which for some four hundred yards runs about half a mile from the foot of the hills, and then across the hills) south of Kanja, Nuagan, Barakantakul and Nuakheta villages to a point at the foot of the hills west of Nukhripada; thence along old demarcated boundary line of Reserved Forest for three-quarters of a mile to old trijunction pillar of Reserved Forest and Ragarinara and Bhubanpur jungle mauzas; thence along a new demarcated line (passing across the hills) south of Kanta Megh to a point on the old demarcated boundary line of Reserved Forest west of Ragariapara village; thence along old demarcated boundary line of Reserved Forest to a point about a quarter of a mile south of Bhagpal village; thence along a new demarcated line running south-west and then west across the hills to old trijunction pillar of Reserved Forest to a point half a mile to the south-west of Pampasaro village; thence along a new demarcated line running across the hills to a point on the Angul-Tikarpara Road, some two miles south of Hinsrida village; thence along a new demarcated line running across the hills to old trijunction pillar of Reserved Forest and Hinsrida and Jaganathpur jungle mauzas; thence along a new demarcated line running across the hills to old trijunction pillar of Reserved Forest and Jaganathpur and Takasingha mauzas.  West.—Prom above point along a new demarcated line (running across the hills) off the villages of Takasingha, Nuabhuin, and Kulangi, to a point on the junction line of the Bagmunda and Tikarpara Reserved Forests; thence along the old demarcated boundary line between the Bagmunda and Tikarpara Reserved Forests; thence along the old demarcated boundary line between the Bagmunda and Tikarpara Reserved Forests; thence along a new demarcated line to a point situated on the Angul-Tikarpara road, about a quarter of a mile; thence along a new demarcated line to a point situated on the Angul-Tikarpar	The following interior villages and hamlets, with the cultivation and waste lands attached thereto, have been excluded from the Reserved Forest and separated therefrom by a demarcated line on all sides, distant not less than 500 yards from the limits of permanent cultivation:—  Chhotkai. Taluka.  Bolong.  Jokabo. Talisara.  Labangi.  Kotarangia.  Raigada.  Narmi.		

District.	Pargana or sub- division.	Name of Forest.	Boundaries.	REMARKS.
	•		quarter of a mile south of Bodakheta village; thence along that road itself for about half a mile to a point north of Gopalpur village; thence along a new demarcated line (running across the hills) to the east of Gopalpur and Purnakot villages to a point on a stream to the south-east of that village; thence down the above stream for about two hundred feet; thence along a new demarcated line (running across the hills) to the south of the above two villages to a point on the Augul-Tikarpara road; thence the above road for about a mile and a half to a point north of Hatibari; thence along a new demarcated	
	•		line (running across the hills) to the north and east of Hatibari village, and to east of Molia village, and joining the Mahanadi river at the old trijunction pillar of the Reserved Forest and Tikarpara mauza.  South.—The Mahanadi river to the boundary of Daspalla.  East.—The boundary between Angul and Daspalla, Narsinghpur and Hindol to the starting point.	
Angul	Angul	Bag-munda.	North.—From a point on the boundary between Angul and Athmalik along a new demarcated line (running across the hills) west of Kotlabhuin and Daleki villages to a point on a stream; thence down the above stream for a quarter of a mile; thence along a new demarcated line (running a cross the hills) south of Dalasinga village to trijunction pillar of Dalasinga and Thakuli mauzas; thence along a new demarcated line (passing round three sides of Bagmunda village and running across the hills) to the old trijunction pillar of the village of Kunuri and the Reserved Forest; thence along old demarcated boundary line of Reserved Forest to a point situated about half a mile south-east of the village of Ullaberi; thence along a new demarcated line (running across the hills) south and east of the villages of Nuapara and Hinjadola to the trijunction pillar of Hinjadola and Tabada villages.  East.—From the above trijunction pillar, along old demarcated boundary line of Reserved Forest, to a point where the footpath from Nuapara crosses the stream west of Jaganathpur; thence along a new demarcated line (running across the hills) south to the AngulTikarpara road; thence along a new demarcated line (running across the lills) south to the AngulTikarpara road; thence along a new demarcated line (running across the	The following interior villages and hamlets, with cultivation and waste lands attached thereto, have been excluded from the Reserved Forest, and separated therefrom by a demarcated line on all sides distant not less than 500 yards from the limits of permanent cultivation:  Salar.  Bodokheta.  Tarwa.
			demarcated line (running across the hills) in a south-easterly direction to a point on the stream flowing south-west of Kulangi village, where it meets the new demarcated boundary line of the Tikarpara Reserved Forest.	{

District.	Pargana or sub- division.	Name of Forest.	Boundaries.	REMARKS.
Angul	Angul	Durgapur	South.—From the above point along western boundary of the Tikarpara Reserved Forest to a point on the Angul-Tikarpara road about half a mile to the north of the village of tropalpur, whence the boundary of the Tikarpara Reserved Forest branches off from the road in the form of a domarcated line eastwards; thence along the old demarcated boundary line of the Roserved Forest as far as its junction with the Purnakot-Bagmunda road; thence south along a new demarcated line to a point on the Angul-Tikarpara road; thence along the old demarcated boundary line of the Reserved Forest (following the base of the hills) to a point about half a mile north-east of the village of Majhipara; thence a new demarcated line (running across the hills) to the Mahanadi river; thence the Mahanadi river to the boundary between Angul and Athmalik.  West.—The boundary between Angul and Athmalik.  North.—From a point situated on the road leading from Durgapur to Kurara along the old demarcated boundary line of the Reserved Forest to trijunction pillar of Gopibalabhpur and Nainiehor mauzas; thence cast along a new demarcated line of 30 chains to a point on the old demarcated boundary line of the Reserved Forest north of Raijharan village; thence south and east along the old demarcated boundary line of the Reserved Forest to the trijunction pillar of Kankarai and Raijharan mauzas.  East.—From above point along the old demarcated boundary line of the Reserved Forest to the trijunction pillar of Kankarai and Raijharan mauzas.	
	/	•	demarcated boundary line of the Reserved Forest to the trijunction pillar of Lakhmiballabhpur and Bara-Kerjang jungle mauzas.  South.—From above point along the old demarcated boundary line of the Reserved Forest to the trijunction pillar of Jarpara jungle mauza and Durgapur-Tangrisai on the road near Kusumghati.  West.—From above point along the old demarcated boundary line of the Reserved Forest round three sides of the village of Durgapur-Tangrisai to a point situated on the Mondapada; thence a new demarcated line running northwest for about half a mile to the top of Montoprogria hill; thence the same line continued west for some 20 chains, and then south-west for half a mile to the Dandaragria hill; thence the same new demarcated line running north-west over the hills to the starting point.	

<b>.</b>	Pargana or	Name		•
District	sub- division.	of Ferest.	Boundaries.	REMARKS.
Angul .	Angul	Simuli- pathar.	North.—From a point on the Angul- Athmalik boundary along old demar- cated boundary line of the Reserved Forest in an easterly direction to a point at the foot of Kisinda hill; thence a	The following interior villages and hamlets, with the cultivation and waste
	•.	•	new demarcated line south to a point on the Japijhoran stream; thence down the above stream to junction with old demarcated line of Reserved Forest; thence along the latter to a point on the road leading from Durgapur to Naopada.	lands attached thereto, have been excluded from the Reserved Forest and separated therefrom by a demarcated line
	•		East.—From above point about 8 chains along the road from Naopada to Durgapur; thence a new demarcated line (running across the hills) in the direction of Bakla village and descending again to the trijunction pillar of Durgapur and Dahurisai mauzas.  South.—From above point along the old demarcated boundary line of the Reserved Forest to a point north of Kalara village; thence a new demarcated line (running across the hills) north of the villages of Katra and Kandkurara to the junction of the Athmalik boundary with the Sambalpur road.  West.—Boundary between Angul and Athmalik.	on all sides distant not less than 500 yards from the limits of permanent cultivation: Simulipathar. Sugolasar.
Angul	Angul	Katara	North.—From a point near Chhatabor on the Angul-Athmalik boundary along the old demarcated boundary line of the Reserved Forest to a point west of Sauria village; thence along a new demarcated line (running over the Dantoria hill) to a point on the old demarcated boundary line of the Reserved Forest near Para-Kumarsinga village.  East —From above point along the old demarcated boundary line of the Reserved Forest up to the base of the Thekibari hill; thence along a new demarcated line (running across the hills) west of Para village to a point on the road leading from Para to Roadasinga.	
Angul	Angul	Antulia Tabada.	South.—From above point along the old demarcated boundary line of the Reserved Forest to its junction with the Angul-Athmalik boundary.  W.est.—Boundary between Angul and Athmalik.  North.—From a point on the Angul-Athmalik boundary along a new demar cated line south of Roadasinga village to the junction of the latter with the old demarcated boundary line of the Reserved Forest; thence the old boundary line to the trijunction pillar of Para and Roadasinga jungle mauzas.	•

District,	Pargana or sub- division.	Name of Forest.	Boundaries.	Remarks.
			East.—From above point along the old demarcated boundary line of the Reserved Forest to the trijunction pillar of Sitakulai and Tabada jungle mauzas.  South —From above point along the old demarcated boundary line of the Reserved Forest to the trijunction pillar of Hinjaloi and Lakhanpur mauzas.  West—From above point along the old demarcated boundary line of the Reserved Forest to the point where it meets the road from Antulia to Ugi; thence along a new demarcated line (running across the hills) enouncling three sides of the village of Tabada to a point on the same road; thence west along a continuation of the same new demarcated line to the Athmalik boundary; thence along the Athmalik boundary to the starting point.	
Augul	Angul	Kanlei	North and East.—From a point on the Angul-Rerhakhol boundary some two miles south-west of the village of Kanloi along a new demarcated line which, after running east for some 3 chains, here joins the old demarcated boundary line of the Reserved Forest; thence along the latter to a point south of Kanloi village; thence along a new demarcated line (running across the hills) of about three-quarters of a mile excluding the spring and village deities from the Reserve, and joining the old demarcated boundary line of the Reserved Forest again to the south-east of Kanloi village; thence along the latter to its junction with the Madulia river; thence along the Madulia river; thence along the Madulia river to the Athmatk boundary.  South—Boundary between Angul and Athmatk.  West.—Boundary between Angul and Rerhakhol.	•

H. H. RISLEY, Secy. to the Govt. of Bengal.

#### NOTIFICATION-No. 2957F.

# CHARITABLE ENDOWMENTS ACT, 1890.

In the matter of Sreemutty Brohmomoye's Hindu Orphan Fund in Calcutta.

The 19th June 1893.—Whereas an application has been made to the Government of Bengal by Babu Money Lal Mullick, of No. 81, Lower Chitpore Road, in the town of Calcutta. Zemindar (hereinafter referred to as the Donor) that, with a view to "creating a permanent endowment fund of Rs. 25,000 for the support of the above institution, he Government Promissory Note of the 4 per cent. loan of 1854-55, described in the se edule hereto, of which the Donor is the absolute owner, may be vested in the Treasurer of Charitable Endowments for the Lower Provinces upon the following terms, that is to say-

I.—That the endowment to be thus created shall be called in memory of the Donor's mother "Sreemutty Brohmomoye's Hindu Orphan Fund," and that its object shall be the provision of a suitable monthly grant-in-aid to Hindu male orphans in and about Calcutta, who are unable to maintain and educate themselves for want of means.

II.—That the Trustees to be appointed under section 5 (1) of Act VI of 1890 to administer the trust shall be-

> (1) A Government official to be nominated for the purpose from time to time by the Lieutenant-Governor of Bengal for the time being.

> (2) The President for the time being of the British Indian Association or such one among the Vice-Presidents of that Association as may from time to time be nominated for the purpose by the Committee of that Association.

(3) The Acharja for the time being of the Adi Brohmo Somaj.

(4) The Donor or Founder of the said endowment, Babu Money Lal Mullick, or in his absence such person as he may nominate in writing to act as his delegate for the time being and from and after the death of the said Money Lal Mullick, his grandson Suttopreo Mullick, for his life, and after his death the senior then living of the grandsons now living of the said Money Lal Mullick in succession during their respective lives, and after the death of all such grandsons then the senior member of the family of the said Money Lal Mullick then living. Provided always that if the President or Vice-President (as the case may be) of the said British Indian Association or the Acharja for the time being of the said Adi Brohmo Somaj or either of them shall at any time hereafter refuse or decline or become incapable to act as Trustees or Trustee, or if any of the said official appointments shall at any time hereafter be determined and cease to exist, then and in every or any of such events happening, it shall be lawful for the said Money Lal Mullick during his life-time and from and after his death for the continuing Trustees or Trustee to appoint another person or persons to be a Trustee or Trustees in the place and stead of the person or persons so refusing or becoming incapable to act, or whose official appointment shall have so ceased to exist as aforesaid, and every such appointment shall be notified in the Calcutta Gazette, and from and after the publication of such notification the person or persons so appointed shall be and become a Trustee or Trustees jointly with the continuing Trustees or Trustee.

III.—That the duties of the said Trustees shall be as follows, that is to say, they shall appropriate and apply the interest of the said Government security for Rs. 25,000, which shall be paid to them by the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal, as and when the same accrues due in paying for or towards the support as well as education of each of such number of destitute or indigent Hindu male orphans in and about Calcutta as the funds in the hands of the Trustees will admit monthly sums or spants-in-aid of not less than Rs. 2 nor more than Rs. 4 in amount according as the Trustees may deem proper. That such orphans shall be selected from time to time as occasion may arise by the said Trustees or any two or three of them, but that no orphan shall be cligible for election unless he can produce a certificate signed by two respectable residents of his neighbourhood testifying to his good character and to his being a worthy object for charity, and that it shall be incumbent upon the Trustees from time to time to make enquiries into the circumstances of each recipient of the charity, and that they shall be at liberty to continue the payments to each recipient for so long as they shall think fit, and at any time to revoke or reduce the allowances if they shall consider just cause for so doing exists.

IV.—That the Trustees may hold meetings for the despatch of business at such times and places and may adjourn and otherwise regulate such meetings as they think fit and determine the quorum necessary for the transaction of business. Questions arising at any meeting shall be determined by a majority of votes, and in case of an equality of votes the Chairman shall have a second or casting vote.

V.—That the Trustees may elect a Chairman of their meetings. If no such Chairman is elected or if he is not present at the time appointed for holding the same, the Trustees present shall choose one of their number to be Chairman of such meeting.

VI.—That minutes shall be made in books to be provided for that purpose of the names of the Trustees present at each meeting and of all resolutions and proceedings of the Trustees. Any such minute signed by any person purporting to be Chairman of any meeting shall be receivable in evidence of the facts therein stated without further proof.

Notice is hereby given that an order is proposed to be made by the Government of Bengal after the expiration of one calendar month to be computed from the first publication of this notice, Asting the said Government security described in the schedule hereto in the said Treasurer upon the terms aforesaid.

Any objections to the proposed order or suggestions thereon may be transmitted in writing to the Secretary to the Government of Bengal, Financial Department, before the 21st day of July 1893.

J. A. Bourdillon,
Offg. Secy. to the Govt. of Bengal.

CIVIL BUILDINGS.

The 19th June 1893.

No. 166.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose. viz., for the construction of a Second Munsif's Court house at Kandi, in the village of

Kandi, pargana Futtehsing, district Murshidabad, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 15 cottahs and 10 chitaks of standard measurement, bounded on the south by the public road to the Munsif's Court, on the north by the arable land of Bhagwan Shaha, Michoo Mandal, and Golam Mandal and mulberry land of Golam Mandal, on the west by the arable land of Dhan Das and Mati Lal Karmokar, and on the east by the existing Second Munsif's Court, jama land of Mati Lat Karmokar and the pleader's room, is required within the aforesaid village of Kandi.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all

whom it may concern.

Calcutta, the 20th June 1893.

No. 169.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for additions and alterations to the Rassa Distillery in the village of Punja Talliviz., for additions and alterations to the Rassa Distillery in the village of Punja Talliganj, pargana Magura, district 24-Parganas, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 1 bigha 7 cottas of standard measurement, bounded on the north by the land previously acquired for the Rassa Distillery, on the east by the Tally's Nala, on the south by the remaining land of Kinooram Halder and Debendro Nath Chowdhury, and on the west by the land and dwelling-house of Debendro Nath Chowdhury, is required within the aforesaid village of Punja Talliganj.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all

whom it may concern:

F. J. JOHNSTONE, Secy. to the Gort. of Bengal.

# REVISED WATER-RATE RULES FOR THE MIDNAPORE CANAL.

#### The 19th June 1893.

No. 162.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act 114 (B.O.) of 1876, the Hon'ble the Lieutenant-Governor is pleased to pass the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These fules and rates will supersede those now in force.

The 22nd and 29th March, and 5th, 12th and 19th April 1893.

A draft of the rules and rates was published in the Calcutta Gazette of the dates noted in the margin as Notification No. 75, dated 20th March 1893.

> C. W. ODLING, Secy. to the Gort. of Bengal.

The Divisional Canal Officer is responsible for maintaining the canal in an efficient state of repair, for providing drainage channels where necessary, and generally for all engineering work involved in its management, as well as for the distribution of water to lessees. The word "canal" is here used as defined in section 3 of the Act.

The Deputy Collector is responsible for the assessment and collection of water-rates

accruing to Government from the canal.

3. Water shall not be distributed otherwise than on the application of a lessee, or to a person in whose favour a provisional license under rule 15 has been issued. Such application may be made verbally or in writing to any subordinate in charge of that part of the canal from which water is required.

4. If any lessee apply for water to the Deputy Collector or one of his subordinates verbally, he shall be directed to address himself to an irrigation officer or subordinate. If he makes such an application in writing, his petition shall be forwarded direct by the zilladar, to whom it is addressed, to the Subdivisional Canal Officer in charge of that part of the canal from which the patitioner's village is supplied.

The Divisional Canal Officer shall map out the irrigable area into blocks in accordance with the natural features of the ground, and so determine that the whole block shall be irrigable from one outlet or from one set of outlets. So far as may be practicable, the blocks shall be separated by drainage lines.

6. Each block determined as above shall be numbered and recorded with its irrigable

area in registers to be maintained by the Divisional Canal Officers and Deputy Collector. The blocks shall also be marked on maps to be maintained by the same officers.

- 7. Leases for not more than five years may be granted for the whole irrigable area of a block, or, subject to the provisions of Rule 13, for definite parts of a block, under the following conditions:-
  - I .- Ordinarily the whole irrigable area of any village, so far as situated within the block, must be included in the lease.

11.-All leases within one block shall be granted, so that they shall expire on the

same date. III .- In order to equalise the areas to be dealt with in each year, the date of expiry of the leases in each block shall be determined by the Divisional Canal Officer in consultation with the Deputy Collector, so that, as fan as practicable, one-fifth of the total area usually irrigated may fall out of lease in each year.

- 1V. No permit shall be granted, when the supply of water must of necessity be delivered across an unleased area, unless a village-channel exists, which, in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.
- The rates to be charged for water supplied between June and November, whether by flow or lift, to lessees on application shall be-

For a term of five years—Re. 1-8 per acre for each season.

For one year or for water supplied on a provisional license for which a permit for a term of years is not subsequently issued, Rs. 3 per acre.

Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develop the system of blocks as explained above, shall be charged Re. 1-8 per acre only. Otherwise, in addition to the rate of Re. 1-8 mentioned above, an extra rate of 12 annus per acre shall in the first year only be charged on leases for less than five and more than one year.

For the supply of water, when available, for winter crops, a rate of Rs. 2-8 per acre

per season shall be charged.

10. For the unauthorized use of canal water a rate of Rs. 5 per acre, or such less rate

ns may be sanctioned by the Deputy Collector, shall be charged.

11. Application for water-leases under section 74 of the Act shall be presented to the zaladar of the division in which the applicant's land lies.

Every application for a water-lease shall contain the following particulars:-

- 1.—Name and residence of applicant.
  2.—Name of pargana, mahal and village in which the land to be irrigated is situated. 3.—Total area for the irrigation of which the application is made and its boundaries,
- and if the lands to be irrigated lie in separate chaks, the name of each chak. 4.—Names of the raiyats whose lands are to be irrigated, and the quantity of land held by each.

5.—Name of the canal and number of distributary from which water is required.

6.—Signatures of the applicants.

A separate application must be presented for lands in each village, but telesibilaida or other lands lying within the village boundary at the time of survey may be included.

Before a permit for a term of years is granted, the written consent of the Divisional Canal Officer shall be obtained, but permits for one year only and provisional licenses may be assued with the written assent of the Subdivisional Canal Officer. The Deputy Collector shall on the day of issue forward a copy of all permits granted to the Divisional Canal Officer.

Existing leases may, with the written consent of the Divisional Canal Officer, he extended for not more than three years, without enquiry or re-measurement, payments being made in

accordance with the existing assessment.

15. When a water-lease is granted, a kabuliyat shall be taken in a form approved by Government, and a "permit" shall be given to the lessee or lessees in a form similar to that prescribed in Schedule C of the Act. Pending the completion of a lease, the zilladar magassue a provisional license for the supply of water to an area covered by an application.

16. On the issue of a permit or provisional license, the zilladar shall forward to the Subdivisional Canal Officer direct a requisition requesting him to supply water to the lessee on application. This requisition shall be kept by the Canal Officer till January 1st next following, and shall then be returned to the Deputy Collector. On the back should be noted the several dates on which the village was supplied with water. A fresh requisition shall be issued on or before June 1st, and returned on or before January 1st, each year, till the lease expires.

17. When it comes to the knowledge of the Subdivisional Canal Officer that canal water has been taken without authority, he shall hold a local investigation and transmit the coord thereof to the Deputy Collector. Separate proceedings shall be taken in the case of

each village irrigated without authority.

18. On receipt of the record mentioned in Rule 17, and after hearing any objection which may be raised, the Deputy Collector shall determine whether waterrates can be legally charged, and if so, he shall proceed to assess, at the rate provided it rule 10, the

hand irrigated without authority.

The statements of the amounts demandable for water-rates leviable under the rules in force shall be prepared under the supervision and signature of the Deputy Collector in such form as shall from time to time be sanctioned by the Lieutenant-Governor. Persons charged under rule 10 or 18 shall be served, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of the Act if they desire to do so.

20. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer, with the concurrence of the Collector, to direct

that the lease shall be cancelled with effect from the 1st of June next following.

The rates for water supplied from June to November shall in each season fall due on the 1st January following, but the Deputy Collector may require one-half of the rates due on applications filed after the 1st of September to be paid in advance, and may refuse to issue a permit for more than one year. The rates for water supplied for winter crops shall fall due an the 1st April following.

Water-rates imposed under rule 10 or 18 shall fall due as soon as the assessment is made, and shall be realized at once.

23. The Superintending Canal Officer may, with the concurrence of the Collector, direct

the Deputy Collector to-

1.—Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realizing water-rates until all the arrears of water-rates due are paid up, and also, if specially so ordered, unless half the amount due under new applications is paid in advance. An order under this rule shall be

in force for the time stated therein, which shall not exceed three years.

II.-Cancel any five years lease if on the 1st of June of any year water-rates to the

extent of half the demand for one year are in arrears.

Remission of water-rates, either in whole or part, as the case may require, shall be granted by the Deputy Collector for-

I.—Errors in the assessment of rates.

II.—Injury to the crop on a leased area caused by deficient supply of water, provided a written application for remission has been made 15 days at least before the crop

In regard to applications under II, the written opinion of the Divisional Canal Officer

shall be obtained and form part of the record of the case.

25. The Deputy Collector, with the written consent of the Divisional Canal Officer. may grant remissions of water-rates, either in whole or part, for injury to the crops on leased areas caused by excess of water due to deficient drainage.

26. The Deputy Collector may, with the written assent of the Divisional Canal Officer, commute rates charged under rules 10 and 18 to those chargeable for water supplied on application, provided that a lease either for a term of years or for the season has been subsequently executed for the lands in question.

**2**7. Remissions on other grounds than the above require the sanction of Government.

In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Collector.

29. Before awarding compensation under section 16 of the Act, or making a reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opinion shall form part of the record of the proceedings.

30. The Deputy Collector may distribute amongst village mookhyas, who give efficient assistance in collecting water-rates, and generally in his operations under Act III (BC.) of 1876, a commission calculated in such manner as he may think fit, provided the total amount paid shall not exceed 6 pies in the rupee on the total water-rates collected during the year.

#### IRRIGATION.

# The 19th June 1893.

No. 163 Notification.—Declaration No. 337, dated the 29th November 1892, for the acquisition of the land situated in the village of Suktagur, pargana Silimabad, in the district of Backergunge, which was published at page 1065, Part I of the Calcutta Gazette

C. W. Oding, Secy. to the Govt. of Bengal.

#### No. 2119, dated Bombay Castle, the 16th June 1893.

• From—W. L. HARVEY, Esq., I.C.S., Under-Secretary to the Government of Bombay, General Department,

To-The Secretary to the Government of Bengal, Marine Department.

In continuation of my telegram of the 10th instant, I am directed to forward herewith, for the information of the Government of Bengal, copy of a Resolution of this Government, No. 2116 of to-day's date, and of the notification issued thereunder, regarding the enforcement of Quarantine Rules at Aden, Perim, and the Somali Coast against arrivals from Arabian Ports.

# NOTIFICATION.

#### GENERAL DEPARTMENT.

Bombay Castle, the 16th June 1893.

No. 2116.—In exercise of the power conferred by Act I of 1870, the following rules for quarantine against cholera have been made by the Government of Bombay with the

previous sanction of the Governor General in Council: they have effect from the 9th instant in the Ports of Aden, Perim, and the Somali Coast as a temporary measure :-

I .- The Commander of every vessel, including buggalows or other native craft, arriving from Arabian Ports shall, before entering the harbour, indicate by signal the port from which such vessel has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or

boat in the harbour.

III .- Immediately on arrival the Commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vesser shall anchor at such place as may be pointed out by the port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival, or for the shorter period prescribed in Rule IV, and undergo disinfection, which should apply as well to crew, passengers, effects, and susceptible goods.

IV.—If the Health Officer of the Port has sufficient evidence that no cases of a sus-

picious nature have taken place on board during the voyage, and if the vessel is besides in good hygicnic condition, the duration of the quarantine will be diminished according to the

following scale :-

After eight day	s of voyage	1		Six days	of quarantine.
Do. nine	ditto			Five	ditto.
Do. ten	ditto			Four	ditto.
Do. eleven	ditto			Three	ditto.
Do. twelve	ditto	***		Two	ditto.
Do. thirtoen	ditto	and upwards	•••	Twenty-fou	r hours of quarantine.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the pro-

hibitions wovided for in Rule III.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the

spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX .- All yessels arriving at Aden, Perim, and the Somali Coast which may have communicated with vessels coming from Arabian Ports shall be subjected to the same quarantine

as vessels arriving at Aden, Perim, and the Somali Coast from Arabian Ports.

X .- All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their bills-of-health.

By or fer of His Excellency the Right Honourable the Governor in Council,

G. W. VIDAL,

Acting Chief Secretary to Government.

# The 20th June 1893.

No. 52 Marine .- The following telegram, dated the 19th June 1893, from the Government of Bombay, is published for general information.

> C. W. ODLING, Secy. to the Govt. of Benyal.

Copy of a telegram, dated the 19th June 1893, from the Government of Bombay to Government of Bengal, Marine Department.

RESIDENT, Bushire, telegraphs :- Five days' quarantine imposed on arrivals from Bussorah.

# JAIL DEPARTMENT.

No. 7268, duted the 19th June 1893 -Babu Basanta Kumar Sen made over charge of the Khulna Jail to Babu Hurry Churn Sen on the forenoon of the 22nd May 1893.

A. U. LARYMORE, For Inspr.-Genl. of Jails. Bengal.

# CIVIL MEDICAL DEPARTMENT, BENGAL.

No. 6253, dated 14th June 1893.-Assistant Surgeon Hera Lall Dutt is allowed love

for six months under article 369 of the Civil Service Regulations.

No. 6271, dated 15th June 1893.—Assistant Surgeon Guru Nath Sen, of the Utterpara Dispensary, is allowed leave for three months, under article 369 of the Civil Service Regulations, with effect from the afternoon of the 26th April 1893.

No. 6273, dated 15th June 1893.—Assistant Surgeon Surut Lal Basu is appointed to

the temporary medical charge of the Utterpara Dispensary in the Hooghly district, during the absence, on leave, of Assistant Surgeon Guru Nath Sen, or until further orders.

No. 6341, dated 17th June 1893.—Assistant Surgeon Debendra Nath De having return-

ed from leave on the forenoon of the 12th May 1893, the unexpired portion of leave granted him in Medical Department Notification No. 1344, dated 31st January last, is cancelled.

No. 6376, dated 19th June 1893 .- Assistant Surgeon Jogendra Nath Basu is appointed to do supernumerary duty at the Medical College Hospital, Calcutta, with effect from the afternoon of the 13th June 1893.

> J. G. PILCHER, F.R.C.S., Surgeon-Colonel, Inspr.-Genl. of Civil Hospitals, Bengal.

# Sheriff's Office, the 7th June 1893.

NOTICE is hereby given that the Third Criminal Sessions of the year 1893 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William, and the places subordinate thereto, will be holden at the Court-house, in the Town of Calcutta, on Monday, the tenth day of July next, at 11 o'clock in the forenoon, and so on from day to day, until the said Sessions be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Sessions be present then and there to prosecute.

R. D. MEHTA, Sheriff.

# NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 910B.

Notice is hereby given that the Seventh Sale of Opium, the Provision of 1891-92, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 3rd July 1893, at 11 A.M., and will comprise 3,612 chests, viz.—

Opium Ditto	manufactured ditto	Patna Factory Ghazeepore Factory		1,927 1,715

Total 3,642

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 24th November 1892, and published in the Government and Exchange Gazettes, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 8th and 18th July 1893, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 r.m. of Saturday, the 8th July 1893, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 r.m. of Tuesday, the 18th July 1893.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazeepore Factories will be brought to sale down to December next about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circum-

*stances render it expedient to do so :-

DATES.	Manufactured at the Patna Fac- tory; about chests.	Manufactured at the Chazcepore Factory; about chests.	Total; about chests.
On or about Wednesday, 2nd August 1893 On or about Friday, 1st September ,, On or about Thursday, 5th October ,, On or about Wednesday, 1st November ,, On or about Friday, 1st December ,,	1,927 1,927 1,927 1,927 1,927 9,635	1,715 1,715 1,715 1,715 1,715 1,715	3,642 3,642 3,642 3,642 3,642

'J. A. BOURDILLON, Offg. Secy. to the Gort. of Bengal.

#### NOTIFICATION.

No. 2087 L.S.-G.—The 17th June 1893.—It is hereby notified for general information that, in exercise of the power vested in him by section 143, clause 2 of the Bengal Local Self-Government Act III of 1885, the Lieutenant-Governor confirms the bye-laws set forth below which have been framed by the District Board of Jessore under section 139, clause 1 of the said Act.

Bye-laws relating to roads, tanks, water-channels, framed by the District board, Jessore, under Section 139 of the Bengal Local Self-Government Act, III of 1885.

1. No person shall build, cultivate, graze cattle, cut and remove grass, shrubs, trees, or in any manner whatsoever encroach upon or cause damage in, on, or to any building, road, channel, watercourse, tank, the lands attached thereto, or the slopes thereof, and belonging to, vested in, taken over by, or placed under the control and administration of the District and Local Board under the provisions of sections 73, 74, 75 and 76 of the Local Self-Government Act. The penalty for infringement shall be a fine not exceeding Rs. 20.

2. Whoever causes the destruction of, or damage to, any tree planted on a District or Local Board road sides, or on the mounds of Board's tank, or in the garden, or to any gabion erected for the protection of the same, or whoever removes any railing from bridges or bricks from the masonry in the parapets, walls or posts, &c., erected on a Beard's road or

mile-posts along the road sides, be liable to a fine not exceeding Rs. 10.

3. No person shall destroy or damage, or cause to be destroyed or damaged, wholly or partially in any manner, any tree on any public road or on its slopes, herms, or side lands, or remove any tree or branches thereof from any such road without written permission of the District or Local Board having jurisdiction. Penalty for infringement shall be a fine not exceeding Rs. 20.

exceeding Rs. 20.

4. Whoever without the permission of the District or Local Board having jurisdiction, widens, deepens, or otherwise damages or disfigures any drain, side exceptations, or borrow-

pits at the side of any public road, shall be liable to a fine not exceeding Rs. 50.

5. No person shall cast nets for fishing purposes from parapets of bridges and culverts, shall construct dams, fix stakes, or place fishing nets or apparatus across or m any channel, watercourse, or tank aforesaid. The penalty for infringement shall be a fine not exceeding Rs. 10.

6. Whoever pastures cattle or beasts of any kind on any road or on the berm, side or slope thereof, or in the compounds of the Inspection or Dak Bungalows, or whoever tethers cattle or other beasts thereon, or within reach thereof, shall be liable to a fine of Rs. 5.

No person in charge of an elephant shall allow that elephant to pass over any bridge or culvert on or over any road, channel or watercourse aforesaid, unless the said bridge or culvert be constructed of arched masonry.

8. Whoever stacks or exposes paddy, straw, jute, timber or bricks either to dry or for sale, or for any other purpose on any District or Local Board road or village road, or on the

berms or slopes of such road, shall be liable to a fine onet exceeding Rs. 25.

9. Whoever in possession of or having control over any trees, bamboos, shrubs or sencings overhanging any public tank or any public road, its slopes, berms, or side excavations, does not, on a requisition signed by the Chairman of the District or Local Board, cut or trim the same in such a manner as he shall be required to do in such notice, shall be liable to a fine not exceeding Rs. 50, and to a daily fine not exceeding Rs. 2, until such requisition be complied with.

Whoever makes any encroachment on any public road or on slopes, berms or side land, thereof by constructing a building, wall, shed or but or any other structure, or by cultivating or preparing for cultivation any part thereof, shall on conviction be liable to a fine not exceeding Rs. 50, and to a further fine not exceeding Rs. 5 for every day during

which offence is continued after he has been convicted of such offence.

11. Whoever deposits any rubbish or any other offensive matter, or casts or burns or buries any dead body on any district or village road, or the slopes or berms of such road, shall be liable to a fine not exceeding Rs. 25.

Whoever shall ease himself on the crest or berm of any road or within its boundary,

shall be liable to a fine not exceeding Rs. 10.

Whoever washes or bathes in any tank or at any well set apart for drinking or culinary purposes under section 90 of the Bengal Local Self-Government Act III of 1885, or washes any cattle or any other animal, or fouls the water or the slopes of any tank or well, shall on conviction be liable to a fine not exceeding Rs. 50.

14. Any one making or causing any obstruction in or to any waterway or drain or channel running alongside of any district or village road, or in the immediate vicinity of any bridge or culvert constructed or being constructed on any such road so as to injure or

tend to injure such structure or road, shall be liable to a fine not exceeding Rs. 50.

15. Any person passing over or driving any animal or vehicle over a road, bridge, culvert or canal while in course of construction or repair, affected by flood or otherwise rendered unfit for traffic, and closed for such traffic under the orders of the Chairman of the District or of any Local Board, so as to injure the same, shall be liable to a fine not exceeding Rs. 10, in addition to any compensation for the damage caused by him which may be awarded by a Court of competent jurisdiction, provided that a passage is given to the traffic through another part of the road or otherwise.

Leplanation-Orders passed by the District Engineer, in anticipation of the sanction of the Chairman of the District Board or any Local Board in emergent cases, will have the force of orders passed by the Chairman of such Board.

16. No cart shall pass over the metalled portion of any road when by a notice of the District Board cart traffic is allowed by the cutcha portion and disallowed over the pucca portion of the read. Penalty for infringement shall be a fine not exceeding Rs. 20.

17. Every person carrying bamboos in a cart shall do so in such a manner as to

prevent them scraping the roadway. The penalty shall be a fine not exceeding Rs. 5.

18. Whoever fails to observe the rules of the road by not keeping on the left while riding or driving, or fails to carry a conspicuous light when driving in a dark night on any part of any public road passing through a village or town, or being the driver of any elephant or camel, and being required by the rider or driver of any horse to remove such elephant or camel to a sufficient distance from such road, shall fail to remove his elephant or camel with reasonable promptitude, shall be liable to a fine not exceeding Rs. 20.

19. No person shall leave unfenced or unprotected his tank along the district or village

For infringement of this rule he shall be liable to a fine not exceeding Rs. 25. road. For infringement of this rule ne snall be hable to a fine not exceeding Bungalow of the 20. No person shall light fires near a wooden bridge or Inspection Bungalow of the light to a fine not exceeding Rs. 25. For infringement of this rule he shall be liable to a fine not exceeding Rs. 25.

21. No person shall leave any cart or carriage on any public road so as to cause inconvenience and obstruction to the public traffic except for the time occupied in loading or unloading it. The penalty for infringement shall be a fine not exceeding Rs. 10.

22. No person shall without good and sufficient reason allow any moveable property to remain on any road so as to obstruct traffic on the road. The penalty for infragement

shall be a fine not exceeding Rs. 20.

23. No bricks or wood or other things shall be deposited on any public road or on the sides or slopes thereof for more than a reasonable time without the permission of the officer in charge of the road. The penalty for infringement shall be a fine not exceeding Rs. 20. Penalty for continued infringement after notice shall be a fine not exceeding Rs. 5 daily.

24. All owners and drivers of carts and other vehicles loaded with bricks and other

materials shall be responsible for their being so secured that the conten's thereof may not fall down on any public road. The penalty for infringement shall be a fine not exceeding

No person shall expose or place any article for sale in any bazar or market in the vicinity of a public road, or collect or gather any substance there, so es to interfere with the traffic of the road. Penalty for infringement shall be a fine not exceeding Rs. 10.

26. No person shall steep any jute, hemp or bamboo in any roadside excavations or tank, khal, or any reservoir belonging to the District or any Local Board of the District. The penalty for infringement shall be a fine not exceeding Rs. 20.

#### The Indian Law Reports.

Published under Authority.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly pirts, published as soon as possible after the first of each month at Calcutta, Madras Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The saiss heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

vinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Sceretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

----

#### Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register stheir names after that date will understand that copies will be supplied only if available.

#### Notice.

Notice is hereby given that the terms for the purchase of publications from the Bengal Secretarint Press, except for Government offices or offices under the central of Government Officers are strictly cash and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the function.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices, and for those forwarded by the Official Assignce cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bongal Secretariat.

Remittances in postage stamps should be accompanied by a addition of one anna in the rupes on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAN, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at MESSES. THACKER, STINK AND CO., Covernment Place, Calcutta.

# RESOLUTION ON THE ANNUAL REPORT OF THE ROYAL BOTANIC GARDEN, CALCUITA, FOR THE YEAR 1892-93.

#### FINANCIAL DEPARTMENT-MISCELLANEOUS.

Darjeeling, the 13th June 1893. RESOLUTION No. 2875Mis.

#### READ-

The Annual Report of the Royal Botanic Garden, Calcutta, for the year 1892-93. The Report for the year 1891-92, and the Government Resolution thereon.

The report, which is one of considerable interest, shows that a steady advance was made during the year in improving the garden both as a scientific centre and as a pleasant resort for the public. At the commencement of the year the season was abnormally dry, and although this had the effect of destroying a number of palms and other out-door plants, these losses were repaired to a great extent before the cold season began. The herbarium continues to receive special attention; more than 15,000 specimens were added to it during the year, among which may be mentioned a large collection of plants from the Royal Herbarium at Kew and the several herbaria in Europe, as well as from Melbourne, Poona, Singapore, Pahang and other States in the Straits Settlements, North Borneo, Penang, Perak, Dehra Dun, Peshawur, Manipur, Assam,

and Egypt. To the contributors of these specimens, including Dr. Cooke, Messrs. Ridley, Haviland, Curtis, Wray, Gamble, Clarke, Sconce-Elliott, and. Sir Henry Collett, the thanks of Government are due. Arrangements were also made through the direct agency of the garden officials for continuing the work of collection in Assam, Burma, and the Andaman Islands. Furthermore, Mr. Gammie (Junior), of the Government Cinchona Plantation, was specially deputed under the orders of Government to make a botanical exploration of the less known parts of Sikkim and the Tibetan frontier: the results of his exploration will be embodied in a special report which is in course of preparation. The fourth volume of the Garden Annals was in preparation, and will be published in the current year. The preparation of the fifth volume is also in progress. Both Dr. King and Dr. Prain contributed valuable papers on botanical subjects to Scientific Societies in Bengal and Bombay:

2. The Lloyd Botanic Garden in Darjeeling suffered slightly from hail.

3. The Lieutenant-Governor's thanks are again due to Dr. King for his efficient management of the garden, and to Dr. Prain, the Curator of the Herbarium, who officiated for him during his absence on furlough for seven months.

ORDER —Ordered that a copy of this Resolution and of the Report be submitted to the Government India, in the Revenue and Agricultural Department, for information.

Ordered also that a copy of this Resolution be forwarded to the Superintendent, Royal Botanic Garden, for information.

By order of the Lieutenant-Governor of Bengal,

#### J. A. BOURDH LON,

Offg. Secretary to the Government of Bengal. .

No. 16G., dated Sibpur, near Calcutta, the 11th May 1893.

From—Brigade-Surgeon Lieutenant-Colonel G. King, M.B., F.R.S., C.I.E., Superintendent, Royal Botanic Garden, Calcutta,
To—The Secretary to the Government of Bengal, Financial Department.

I have the honour to submit herewith the one hundred and sixth Annual Report of the Royal Botanic Garden.

## ANNUAL REPORT OF THE ROYAL BOTANIC GARDEN, CALCUTTA, FOR THE YEAR 1802-93.

When the year opened, the garden was suffering from one of the severest droughts which has been experienced for many years. This drought had caused the death of a number of outdoor plants, and especially of palms, and had affected the orchids so that the show of bloom (in spite of the increased number of plants) was the poorest known for years. The drought continued during the months of April and May; and until the monsoon broke it was necessary to employ a very large proportion of the staff of coolies in carrying Although dry, the latter part of the hot season had, however, rather a moderate temperature, and the rainy season was favourable; so that the effects of the six months of extreme dryness had been to a great extent recovered from before the cold season began. The latter was the pleasantest which has been experienced in Calcutta within the memory of the oldest inhabitant, and it was in consequence a particularly favourable one for the annuals which form so attractive a feature in the garden during February and March. The expenditure of labour in watering during April, May and June interfered a good deal with the completion of the programme for road-making which had been laid out for the year. A great deal, however, was accomplished in the improvement and remetalling of the avenues in the Palmetum. The roads are no doubt the weak feature in the garden at present, and much remains to be done to bring those

in the central part of it into really good condition. Were mere remetalling all that had to be done, the task would be a simple one; but, owing to the changes of level which were caused by throwing the garden into undulations while it was in process of being laid out afresh some years ago, the levels of many of the older roads must now be altered, and the earthwork which has thus in most cases to precede remetalling adds greatly to the cost of, and lengthens the time taken to effect, the improvements. Towards the end of the year an additional grant of Rs. 5,000 was made for garden improvements, and this was spent chiefly in burning jhamma for road metal to be used during the current year, and in providing bricks for building huts for the garden coolies who have for years past been very badly housed. Although the river did but little visible injury to the bank during the year, it was discovered, when the rainy season had ended, that at one point considerable erosion has occurred, and that the previously sloping bank near the pumping station has been scooped out into a deep hole. I fear there may be serious mischief at this point before long. The conservatories continue to be in a satisfactory condition, the plants in them having suffered comparatively little from the drought of the early part of the year. During the year the collection of aquatic birds on the lake near the orchid house was increased by a gift of water-fowl from Mr. Thiselton Dyer, C M.G., F.R.S., Director of the Royal Garden, Kew.

2. Economic plants.—The usual amount of attention was given to the cultivation and distribution of plants of economic interest. As many as possible of the plant producing sisal hemp (Agave rigida, var, sisalana) were distributed during the year. The plants thus distributed were obtained from America through the good offices of the Director of Kew. Large numbers of the large-leaved mahogany were issued for planting in avenues in cantonments and civil stations. Rheea plants were also issued as asked for. The interest in rheea cultivation is of a very flickering sort, and at present it has almost died out in the neighbourhood of Calcutta. Plants of the cola-nut tree (Cola acuminata) were given out as far as the limited stock permitted. I regret to say that all my efforts to introduce the cultivation of the Japanese paper mulberry have failed. A small plantation is, however, kept up to meet any future demand. As the Japanese mulberry yields a most beautiful fibre, which is naturally so white that it requires very little beaching, it seems a pity that

no wealthy landowner has taken up its cultivation on a large scale.

3. Herbarium. - Work in the Herbarium went on as usual during the year. botanical references having been answered and plan's named for correspondents in increased numbers. Specimens to the number of 15,750 were received from various sources, while 8,787 specimens (all carefully named) were issued to various botanical institutions throughout the world. The plants thus issued belonged largely to families of which either Dr. Prain or myself have recently made particular studies. Foremost amongst the institutions to whom this Herbarium is indebted for contributions during the year is the Royal Herbarium at Kew, the Director of which contributed 2,200 specimens. Next in numbers is the collection of Western Indian species received from Dr. T. Cooke, C.IE, Principal of the College of Science, Poona. Dr. Cooke's contribution (which contained 1,559 specimens) is a peculiarly acceptable one, as heretofore the fibra of Western India had been but poorly represented here. To Mr. H. N. Ridley, Director of the Botanic Garden, Singapore, we are indebted for interesting collections (numbering 1,424 specimens) from Pahang and other States under the protection of the Government of the Straits Settler ents. Mr. G. D. Haviland sent no less than 1,144 specimens from Settler ents. North Borneo; while smaller collections were received from Mr. Curtis, Forest Department, Penang (269 specimens); Mr. L. Wray, junior, of the Government Museum, Perak (221 specimens); Mr. J. S. Gamble, Director of the Forest School, Dehra Dun (195); Sir Henry Collett, K.C.B., Peshawar (76). Mr. C. B. Clarke, late of the Indian Educational Department, to whom the Herbarium is already deeply beholden, continued his generous contributions by sending during the year 606 specimens collected by himself, chiefly in the jungles of Manipur and Assam. Mr. Scott-Elliot, a gentleman wid has travelled much in the interests of Botany, sent as a contribution from Egypt 121 plants. The Directors of Herbaria in Europe contributed as follows: - Imperial Garden,

Berlin, 849 specimens; Herbarium Imperial Botanic Garden, Vienna, 600 specimens; Imperial Garden, St. Petersburg, 218; Royal Garden, Leiden, 24; while from the University of Melbourne there were received 417 specimens. The recipients of named plants distributed from the Herbarium during the year are to a great extent the same as the donors. A full list of them will be found in the sixth appendix to this report.

4. Bolanical collection.—Through the direct agency of the officers attached

to this Garden the following were received:-

Mr. R. Pantling, orchids of Sikkim ... 1,500
Mr. G. Gammie, from Independent Sikkim ... 1,021
E. H. Man, Esq., c.i.e., Andamans collections ... 867
Dr. Prain, from North Bengal ... 68
Native Collectors, Botanical Survey of Burma ... 1,064
Ditto ditto ditto of Assam ... 852

The collections made by Mr. Gammie were the result of a botanical excursion to some of the less known parts of Independent Sikkim and of the Tibetan frontier, on which he was specially deputed with the sanction of Government. They contain many rare plants of much interest. Mr. Gammie was absent for four months. His first excursion extended through the Singalelah Range to its origin in Kinchinjunga. In the vicinity of Kinchinjunga itself Mr. Gammie was, on account of the great inclemency of the weather, able to remain only a few days. He next travelled across Sikkim to Tumloong, from whence he followed up the Tista to Chungtam. From thence Mr. Gammie explored the Lachung valley as far as the Donkia La, which was the northern limit of his He spent two months in forming collections in this valley, and then ascended to Thanka La, and also to Ghora La at the head of the Sebu valley, one of the few tracts in this region which Sir Joseph Hooker was unable to visit during his sojourn in the Eastern Himalaya in 1849-50: From Lachung Mr. Gammie returned to Tundoong; and from thence he traversed the Chola range, visiting the Chola, Yak-la, and Zey-lap-la passes. He returned to the cinchona plantation by the military road from Gnatong to the Tista bridge. Mr. Pantling's collections consisted exclusively of orchids, of many of which he has prepared most admirable drawings which I trust it may some day be possible to publish. The collections from the Andamans have been made by two Burmese, who have worked under the supervision of Mr. E. H. Man, C.I.E., whose efforts to help in the exploration of these islands have been most disinterested and laborious, and to whom this garden is very deeply indebted. Native collectors were sent as usual to Assam and Burma, and they brought back fairly good collections of common plants. Owing to my absence on furlough during seven months of the year, no botanical tour was made either by Dr. Prain or myself.

5. Publications.—During the year Dr. Prain contributed to the journal of the Bombay Natural History Society a paper on the botany of the Lactadives, founded on a collection of plants made in these islands by Dr. A. Alcock, Surgeon Naturalist to the Indian Marine surveying ship Investigator. He also contributed to the Journal of the Asiatic Society of Bengal a paper on the Flora of Narcondam and Barren Island, based on collections made in these islands by himself two years ago. In the same journal Dr. Prain published accounts of a new species of Mezoneuron and of two new species of Pedicularis. In the Annals of Botany a paper appeared by him on the synonymy of Anthocoma flavescens; while in Hooker's Icones plantarum he published descriptions and figures of three new species of plants. The fourth volume of the Garden Annals was under preparation during the year, but it will not be ready for publication until the current year. Considerable progress was also made in the preparation of the fifth volume. A paper giving a detailed systematic account of all the members of the natural family of Anonacew indigenous to British India was published by myself in the Journal of Asiatic Society of Bengal.

6. Library.—A few books were purchased and a number were rebound. The whole library was gone over and carefully poisoned with a solution in alcohol of corrosive sublimate, which our experience shows to be by far the

best preventive of the ravages of the book maggot.

7. Interchange of plants and seeds.—The distribution lists are attached as appendices to this report. They show a total of 13,585 plants and 1,061 packets of seeds received, and of 43,619 plants and 5,072 packets of seeds sent out during the year.

out during the year.
• 8. Lloyd Botanic Garden, Darjeeling.—This branch institution was for the first nine months of the year under the charge of Mr. W. A. Kennedy, and during the remaining three (while Mr. Kennedy was on privilege leave) Mr. G. A. Gammie acted as its Curator. The garden escaped locusts, but suffered

slightly from hail.

9. The budget allotments both of the Calcutta and of the Darjeeling gardens were spent almost to the full; as was also a supplementary grant of Rs. 5,000 given for improvements in the former. The estimated revenue for the Lloyd Botanic Garden, Darjeeling, was Rs. 900, and that for the Royal Botanic Garden Calcutta was Rs. 1,000; total Rs. 1,900. This total sum of Rs. 1,900 was revised by the Accountant-General, and raised by that officer to Rs. 2,000, which sum was accepted by Government as estimated revenue for the two gardens for 1892-93. The actual realizations were, for the Darjeeling garden Rs. 785 and for the Calcutta garden Rs. 1,618; total Rs. 2,403.

Rs. 2,000, which sum was accepted by Government as estimated revenue for the two gardens for 1892-93. The actual realizations were, for the Darjeeling garden Rs. 785 and for the Calcutta garden Rs. 1,618; total Rs. 2,403.

10. I was absent in Europe on furlough during seven months of the year, and my duties were performed during my absence by Dr. D. Prain. Mr. R. L. Proudlock was Curator, and Mr. G. T. Lane, Assistant Curator of the Calcutta garden during the year. And they as well as Messrs. W. A. Kennedy and G. Gammie in the Darjeeling garden carried on their respective duties to the satisfaction both of Dr. Prain and myself. The head-writer, Babu G. C.

Datta, and the office and garden staff have also worked well.

11. Details of the receipts and of the distribution of seeds, plants, and Herbanium specimens will be found in the six tabular returns which are sent as appendices to this report.

#### RESOLUTION ON THE BUDGET ESTIMATES OF THE COMMISSIONERS OF THE PORT OF CALOUTTA, FOR THE YEAR 1893-94.

#### No. 1471Marine.

#### GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

Dated Calcutta, the 15th June 1893.

#### RESOLUTION.

#### READ-

A letter No. 3682, dated the 30th March 1893, from the Vice-Chairman of the Commissioners of the Port of Calcutta, submitting for sanction the budget estimates of the Commissioners for the year 1893-94.

A general summary of the budget estimates submitted by the Commissioners is subjoined:-

	REVENUE ACCOUNTS.		Estimate for 1893-94.	Estimate for 1892-93.
	Receipts.		${f Rs.}$	Rs.
Par	II.—Inland Vessels' Wharves III.—Strand Bank Lands IV.—Port or Harbour Maste	r's	11,84,250 4,59,000 1,68,815	4,40,000 1,70,015
"	$\begin{array}{cccc} \textbf{Department} & \dots \\ \textbf{VITramway} & \dots \\ \textbf{VIIPort Approaches} & \dots \\ \textbf{VIIPort dues} & \dots \end{array}$	•••	5,07,597 3,00,000 8,000 4,75,000	
75	Total VIII.—Kidderpore Docks Special Toll*	•••	31,02,662 83,000 8,50,000	26,47,056 8,09,000
	Total	•••	40,35,662	34,56,056
	Expenditure.			
Par	II.— Inland Vessels' Wharves III.— Strand Bank Lands	••	9,74,914 3,85,810 98 <b>,9</b> 13	9,29,852 3,84,363 99,539
>>	IV.—Port or Harbour Master	ß	5 19 950	# 91 004
"	VI.—Tramway	•••	5,13,352 2,35,682 4,84,652	5,31,224 2,18,317 4,79,638
,,	T7TTT	••	26,93,323 13,64,898	26,42,933 10,50,012
	Total	••	40,58,221	36,92,945
	Estimated balance on 1st April 1893		•••	Rs. 4,43,030

ated balance on 1st April 1893

The Kidderpore Docks have not at present been utilized to any extent by the Shipping Companies, and a difficulty has consequently arisen in connection with their working. The subject is receiving the careful consideration of the Government and the Commissioners. The budget estimate as submitted includes a sum which will admit of measures being taken to maintain the water level by pumping, and to keep the gates and sluices in working order, and the machinery and works generally from deteriorating, and in such a state that the graving dock can be used when required. With regard to the Traffic Establishment, provision has been made up to the end of May.

#### RECEIPTS.

Part I.—Jetties.—The receipts are taken at Rs. 50,000 less than those of 1892-93. The decrease is due to the general depression in trade. The actual decrease is estimated at Rs. 1,10,000, but an increase is expected in the Petroleum Wharf and Tea Warehouses.

PART II.—Inland Vessels' Wharves.—The receipts are taken at

R). 19,000 over last year's estimate. The increase is based on actuals.

5. PART IV .- Port or Harbour Master's Department .- During the current year the probable receipts from mooring hire were reduced by Rs. 45,000, as it was anticipated that the opening of the docks would take vessels out of the stream. This anticipation not having been realised, the estimated receipts during 1893-94 have been raised to Rs. 2,50,000. As there are reductions on the receipts under certain other heads, the net increase amounts to Rs. 10.806.

6. Part VII.—Port Approaches.—The receipts are taken Rs. 2.000 over

those of last year's estimate.

7. PART VII.—Port Dues.—These are shown in the budget under the

head Port approaches, and are expected to produce Rs. 4,75,000.

8. PART VIII.—Kidderpore Docks.—The receipts are estimated as follows:-

Receipts from				•••		Rs. 75,000 2,000
Import	•••		•••	•••		2,000
Export	•••	•••	•••	•••		
Dock dues						
Proportion of receipts for towing vessels by hopper-barges						6,000
				Total	•••	83,000

This shows a decrease of Rs. 7,26,000, as compared with the estimate sanctioned last year. The decrease is due to the fact that the docks have not, as already explained in paragraph 2, been used to the extent which was anticipated when the estimate for last year was sanctioned.

9. The special toll under sections 108 and 109 of the Act is not shown in the Commissioner's budget, but it has been ascertained that the receipts will

probably amount to Rs. 8,50,000.

Particulars.

#### EXPENDITURE.

10. Part I.—Jetties.—The estimated expenditure amounts to Rs. 9,74,914 as against Rs. 9,29,852 in 1892-93. The principal items under which there has been an increase are given in the following statement:

	Proportion of Establishment, Working Expenses and	Rs.		
	repairs to dredgers	13,807	over last year'	s estimate.
	Proportion of salaries of Engineering Establishment	6,602	ditto	ditto
•	Repairs to Jetties, Sheds, Tramway & Compound	46,700	ditto	ditto
	Working Expenses	7.578	ditto	ditto

Increase in expenditure.

The increase under the head "Repairs" is due to the provisions for metal-

ling jetty yard, renewing decayed beams and planks on jetty head, and improving the lines in the jetty yard.

11. PART II.—Inland Vessels' Wharves.—There is an increase of Rs. 12,087 under this head. Of this sum, Rs. 4,963 is provided under the head "Proportion." tion of Establishment, Working Expenses, and Repairs to Dredgers," Rs. 3,301 under "Proportion of Engineering Establishment," and Rs. 1,445 under "Proportion of Salaries of Traffic Department."

There is a decrease of Rs. 9,200 under the head "Repairs" and of Rs. 1,440 under the head "Working Expenses," the nett increase being Rs. 1,447.

12. Part IV.—Port or Harbour Master's Department.—There is, as compared with last year, a decrease of Rs. 17,872 in this estimate. This is due to a decrease of Rs. 11,494 under the head "Proportion of Salaries—Control," and of Rs. 20,220 under "Renewal of Block." There has been several small increases under the various other heads, thus making a net decrease of Rs. 17,872.

13. PART VI.—Tramway.—Under the head "Proportion of Salaries of Engineering Establishment" a new provision of Rs. 6,420 has been made. There is an increase of Rs. 2,890 under the head "Proportion of Salaries of Traffic Department," of Rs. 2,188 under the head "Salaries," and of Rs. 5,086 under

the head "Working Expenses." There is a small decrease under two other

items, the net increase being Rs. 17,365.

14. Part VII.—Port Approaches.—There is an increase of Rs. 5,014 under this head, as compared with the last year's estimate. The principal items of increase are "Proportion of Municipal Taxes and Repairs to Dockyard" and "Working Expenses." Under the first head there is an increase of Rs. 1,001, and under the second of Rs. 3,850.

15. PART VIII.—Kidderpore Docks.—The estimated expenditure on the

Kidderpore Docks is shown below:—

-					${f Rs.}$
Proportion of Salaries-	-Contro	ol	•••		26,369
Ditto of Dredger	Expens	08 ···	•••	•••	26,534
. Ditto of Engineer	ing Est	tablishment			19,257
Ditto of Municipa	l <b>T</b> axes	and Repairs to	Dockyard		" <b>4,820</b>
Ditto of Salaries of	f Traffi	e Department			5,745
Salaries of Establishme	$\mathbf{nt}$	•••	•••		<b>2</b> 2,000
Working Expenses	•••	•••		•••	1,25,173
Interest on Dock loan		•••	•••	•••	11,35,000
		Ī	<b></b>	•	
		'	Total	•••	13,64,898

In this estimate Rs. 22,000 have been included providing for the traffic establishment required for the Docks for two months. The question as to the establishment required for the remainder of the year has been reserved for future consideration.

The estimated expenditure on the Kidderpore Docks is thus Rs. 12,81,898 in excess of the receipts, and to make up the deficit the special toll estimated to produce Rs. 8,50,000 has been imposed. As mentioned in paragraph 2 of the Resolution, the Commissioners are considering whether it is not possible to attract traffic to the Docks and so to diminish the heavy drain on the port resources caused by the excess of working expenses over the receipts which, apart from the graving dock, are taken as practically nil.

17. Subject to the remarks contained in the foregoing paragraphs, the Lieutenant-Governor, in pursuance of the powers vested in him by section 71 of the Calcutta Port Act, 1890, approves the estimate of income and expenditure

of the Commissioners for the year 1893-94.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

#### 1165

# ADMINISTRATION REPORT OF THE BENGAL METEOROLOGICAL DEPARTMENT FOR THE YEAR 1892-93.

No. 2337Agri.

THE following report is published for general information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

The 15th June 1893.

Secretary to the Govt. of Bengal.

It has been explained in previous reports that the Government of Bengal has decided that the ordinary Administration Report of the Meteorological Department shall be only a brief summary of the more important facts of each year, but that in every third year the report shall be exhaustive, and shall deal not only with the facts of the year of the report, but with the triennial period ending with that year. The last full report was for the period 1887—90, and two brief reports have since been issued in 1891 and 1892, and hence the present report will be a summary of the work for the three years 1890—93.

During the official year just closed the Department was in my charge, and I was also in charge of the Department for the previous two years, except for a period from April 9th to November 26th, 1890, when I was absent on furlough and when Mr. C. Little officiated for me. The changes in the administration of the Department during the year 1892-93 have been small, and have not involved any alteration in the principles of its working, and they have consisted practically entirely in the gradual development and extension of the system, which has now been introduced for some time, with a view of making it more perfect and more generally useful. Indeed, the same statement may be made with reference to the working for the previous two years also, and no radical changes have been introduced throughout the triennial period.

The number of meteorological observatories submitting reports to the Bengal Meteorological Department on the 31st of March 1893 was 68, or two less than the number at the close of the previous year. This decrease of two observatories was due to the fact that the observer at the voluntary observatory at Kalimpong has declined to work any longer without being paid, and hence the work at that station has been temporarily suspended, though the instruments, shed, etc., are still at Kalimpong. Also in the case of Fort Tregear the observatory, instruments, etc., were destroyed by fire during the year 1891, and the observatory has been closed either temporarily or permanently. On the other hand, on the creation of the new district of Palamau in Chota Nagpur it was decided to commence a meteorological observatory at the head-quarters station of Daltonganj, and hence during the year a new shed was built there and instruments supplied to it, and indeed at the close of the year all the necessary arrangements had been made for this observing station, and observations from it will commence early in the year 1893-94. Thus, it will be seen, there has been little practical diminution in the number of meteorological stations in the province, but that if another voluntary observer can be secured for Kalimpong, the number of observatories will be the same as before, and for the reason that Daltonganj will be a fully equipped observatory, while Fort Tregear was only partially equipped, there will be really a distinct gain.

In connection with this subject it may be remarked that for several years there had been an observatory at Pedong on the Sikkim frontier which had sent in its observations direct to the Meteorological Reporter to the Government of India, and that during the year as Father Desgodins, who was the voluntary observer there, was under orders to proceed to Hong-Kong, arrangements

were made to transfer the instruments to Guntok in Sikkim, under the superintendence of the Political Officer of Sikkim, and when the new observatory is started it will probably be placed under the Bengal Meteorological Department. Father Desgodins by his most accurate and painstaking work at Pedong, which has now extended over a good many years, has laid the Department under a great obligation to him.

The following table will show the names and distribution of the observatories sending in reports to the Bengal Meteorological Office at the close of the

year 1892-93:-

lst cless observatory.	2nd class observatories.	3rd class observate	ries.	Voluntary observatories.	Other observatories reporting to the Department, but not under direct control of the Department.

† This observatory is not under the control of this Department. It is under the direction of Mr. J. V. Juggarow of Vizagapatam.

In order that it may be seen that the number of observatories working under the Bengal Meteorological Reporter is well maintained, the following table is appended showing the number of observatories working in connection with the Bengal Office in each of the past three years:—

1890-91.	1891-92.	1892-93.
1st Class Imperial        1         2nd       ,,        15         3rd       ,,        31         Voluntary        6         Other stations reporting for the storm-warning service only        16*	1st Class Imperial        1         2nd       ,,       ,       15         3rd       ,,        38         Voluntary        8*         Other stations reporting       for the storm-warning       service only        8	1st Class Imperial 1 2nd ,, ,, 15 3rd ,, ,, 38 Voluntary ,, 6* Other stations reporting for the storm- warning service only 8
Total 69	Total 70	Total 68

* This number includes Vizagapatam.

The standard of work at the observatories generally throughout the year has been good, though in a few cases the reverse has been the case, and some stations have done exceedingly badly. So far, however, as can be judged, the quality of the work in 1892-93 has been about equal to, but prob-

judged, the quality of the work in 1892-93 has been about equal to, but probably not superior to, that of former years. The two methods by which the character of the work carried on at the observatories is judged, are, first, by the critical examination and comparison of the observations taken at each station with those at neighbouring stations, and when the various observations taken daily throughout Bengal are reduced and charted, the accuracy of this method of comparison or check is very great. The second method of judging of an observatory is naturally by visits of inspection, which are generally arranged so that the observers are quite unaware of the probability of the inspection.

This enables the Inspector to see the observatory in its normal working condition without any previous preparation on the part of the observer, and from this the Inspector can at once judge of the nature of the work which is being sent in from the observatory. In the following remarks both these methods of judgment are kept in view, but the results of the inspections are also separately and the second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second sec

rately described later on.

First class observatory.—The only observatory of this class is at Calcutta (Alipore). It is not under the Bengal Meteorological Department at all, but is under the control of the India Reporter, and is under the direct charge of the Second Assistant to the Meteorological Reporter to the Government of India, who is stationed at Calcutta throughout the year. The observations made at the Alipore Observatory are, however, supplied daily to the Bengal Reporter, and have been, throughout the year under review, of a high-order of accuracy. As, however, the observatory is not under the control of the Bengal Department, its working cannot be criticized or reviewed.

Second class observatories.—There are fifteen second class observatories under the Bengal Reporter, but of these three are in Assam and one in Burma, and they are, therefore, somewhat difficult to inspect from Bengal. Of the remaining eleven in Bengal, five were visited during the year, namely, Bankipore, Darjeeling, Darbhanga, False Point, and Hazaribagh. The work at these observatories can therefore be tested by both the methods previously described.

In the case of the Bankipore or Patna Observatory, which was visited twice during the year, the instruments were found in good order, and throughbut the year the observer has sent in excellent observations. The Darjeeling Observatory was also found to be in good order, and for the greater part of the year sent in very careful and good observations. For a short period, during the absence of the regular observer on leave, the work was not very trustworthy, as the officiating observer was either somewhat careless or he did not thoroughly understand his work. Darbhanga, when visited, was found to be only in fair The observations sent in from Darbhanga throughout the year have been good, and hence this station is now working fairly satisfactorily, and is in great contrast to its condition as described in 1890-91. In the year 1891-92 a decided improvement had taken place in this observatory, and the improvement has not only been maintained in 1892-93, but its condition in this year has been much better than in either of the two previous years. A visit was paid to False Point in April 1892, and the observatory was found to be in most excellent order, and its condition reflected great credit on both Mr. Sparkes, the superintendent, and on Mr. Naylor, the observer. The observations during the year have also been most carefully and accurately made, and the only point on which perhaps a little more care ought to be taken is in the accurate framing of the weather telegrams. It is highly satisfactory to find that the False Point Observatory is kept up to such a high standard, for this forms one of the most important stations in the working of the Storm Signal Service. Hazaribagh was visited in March 1893, and was also found in very good order. Throughout the whole year the observer at this station has done excellent work, and his observations are always very reliable.

The condition of the remaining six second class observatories in Bengal, of the three in Assam and one in Burma, can only be judged by the critical examination of the observations sent in, as it was found impossible to visit them. Taking the Bengal stations first, Berhampore has well maintained the reputation gained in previous years of being one of the most trustworthy stations in the province, and throughout the year the observations submitted by Babu Mahchdra Nath Roy have been extremely accurate. The same may also be stated of Burdwan, which is one of the most satisfactory observatories in Bengal, and the observer, Babu Mokhoda Prosad Roy Chowdhury, takes the greatest care in his work, and his observations are most trustworthy. The observatory at Chittagong, on the other hand, has not been so satisfactory, and for a considerable portion of the year inaccurate observations were frequently submitted, and altogether the observatory gave a good deal of trouble. Indeed, for the last three years the Chittagong observatory has been in an unsatisfactory condition. In 1890-91 and 1891-92 more mistakes were made by the observer at Chittagong than at almost any other observatory in Bengal, and careless work was again submitted in the earlier part of this year. During the later months of 1892-93,

however, a new observer has taken charge of the Chittagong Observatory, and since his arrival the accuracy of the work has greatly increased, and the observatory appeared at the close of the year to have again been in satisfactory condition. The observations sent in from Cuttack during the year have been good, though not of the exceptional accuracy of some of the other stations. Dacca has sent in particularly good observations throughout the year, and its condition has been, so far as can be judged, excellent. In the case of Saugor Island, which is, again, one of the most important stations in the working of the Storm Signal Service, scarcely a single error has been detected throughout the year, and this observatory continues to maintain its position as one of the three or four most satisfactory observatories in Bengal. On every occasion when extra observations are required during stormy or suspicious weather, they are sent in most promptly, and in consideration of the large amount of extra work which is thrown on this observatory, an allowance of Rs. 15 a month was granted to a signaller in the Saugor Island Télegraph Office for helping in the meteorological work. This allowance was granted from 1st June 1892.

In the case of the three Assam stations, Dhubri has continued to send in very accurate observations throughout the year, and the observatory has maintained its previous reputation. In the case of Sibsagar, however, which was formerly one of the most satisfactory stations in the province, there has been a great falling off. So far as can be judged without a visit of inspection, the observer there now appears to be exfrenely careless in his work, for his observations neither agree with those of the other stations in Assam made at the same time, nor do they at all agree with observations made under similar circumstances at Sibsagar for many previous years. It also appears probable that the barometer and perhaps other instruments have been allowed to get out of order; and during the year a new barometer was sent to that station, and comparative sets of observations with three barometers were allowed to go on for some months. Up to the present time, however, the exact cause of these errors has not been ascertained, and it is believed they are mainly due to the want of attention and to the carelessness of the present observer. The condition of the Silchar Observatory has been fairly good throughout the year, and the observations generally sent in have been accurate.

For some years the observers at Sibsagar and Silchar have been paid small monthly allowances for taking observations of earthquakes. The seismographs, however, which were provided by the advice of the Geological Department, have not answered their purposes at all satisfactorily, and they practically never record earthquake shocks even when unusually severe. Hence the allowances for the charge of these instruments were withdrawn towards the close

of the year.

In the case of the Akyab Observatory in Burmah, the observations which have been sent in throughout the year have been fairly accurate, and, so far as

can be judged, the observatory is in very good condition.

Third class observatories (including the observatories at the coast ports in the Bay of Bengal, directly under the Bengal Reporter, and one or two others reporting for the Storm Signal Service).—Twenty of the observatories under this head were visited during the year, and of these fourteen were in the province of Bengal and six were on the coast of Madras, at stations which report observations in connection with the Storm Signal Service. Taking up, first, the case of the observatories that were visited, Barisal Observatory in previous years had been in charge of a subordinate in the Public Works Department; but as the office of that department in the station was closed, the observatory was transferred to the signaller attached to the local post and telegraph office. In Max 1892 the station was visited to complete the removal of the instruments to the post office, and on the inspection the instruments and observatory generally were found to be in very bad condition. The observations sent in, too, from Barisal were very carelessly made almost throughout the year. Buxar when visited was found to be in excellent order, and throughout the year the observations have been very accurate. Chaibassa was in good condition when visited; but the barometer had gone out of order, and hence the observations submitted from this station were untrustworthy, to a great extent probably, from the defect in the barometer. Chapra was found in excellent condition, and the observations sent in have been accurate for practically the whole year.

tinajpur when visited was in fair order, and the observations sent in have oaly been of tolerable quality: Gaya was visited and was, as has been the case in previous years, not in satisfactory order, and the observer is still careless in his work and sends in poor observations. It has been found necessary to change the site of the Gaya observatory, as a new masonry erection over a well has been built close to the thermometer shed and rain-gauge, and the exposure of the thermometers and rain-gauge had been thus entirely altered, and in the case of the rain-gauge it was quite overshadowed by the new building, so that it was absolutely impossible for rain coming from certain directions to get to the gauge at all. Jalpaiguri at the time of inspection was in moderate order only, and a good many mistakes have also been made in the observations sent in. Jessore when visited was, on the whole, in good condition, and the begrvations sent in during the year have been accurate. Krishnagar Observatory was in excellent condition when inspected, and the observer, Babu Peari Lal Ghosh, has sent in very accurate observations. Motihari was generally in very good order, but the observations sent in were only fairly accurate. Muzaffarpur, as in the case of previous inspections, was found in bad order when visited, and the observer, Babu Jogendra Chandra Chatterjee, takes apparently no interest whatever in his work. His observations have also been decidedly inaccurate throughout the year. He was fined Rs. 5 for his carelessness and for the bad condition in which he has kept the observatory. Noakhali when inspected was in fair order, but the observations sent in were very unreliable, and it was found that the observer did not take his observations at the correct time. Hence the old observer was dismissed and a new man appointed on probation. Purnea has given great trouble during the greater part of the year, and the observer was one of the most incompetent, and the observatory generally was about the worst in the whole of Bengal. The man was fined, and his pay was finally stopped for two months; but it was only when a new observer was appointed to the station that the observations became at all reliable. Rangpur when visited was found in moderately good order only, but on the whole the observations sent in during the year have been satisfactory.

In the case of the six stations on the Madras coast which were visited during the year, Coconada was found in most excellent order, and has sent in most accurate observations throughout the year. The condition of the observatory reflected great credit on the superintendent, Captain Wickes, and on the observer. Mr. C. Gaëtane. Cuddalore was in fair order only, and the observations recorded have been of moderate accuracy. Gopalput has sent in very accurate observations in almost all cases. The observatory at Madras stationed at the Port Office, was also in very good order when inspected, and the observations have been also accurate, and the same is the case with Nellore

which was visited by the Madras Meteorological Reporter.

*In the case of Vizagapatam, a visit was paid to that station in April 1892; but the observatory being a voluntary one entirely unconnected with the Department, it was not inspected in the ordinary way, but the Reporter was courteously shown over it by the proprietor, Mr. Narsingrow. It is much to be regretted that since this visit Mr. Narsingrow has died rather suddenly; but the observatory is still being maintained and carried on by his son Mr. Juggarow. By the death of Mr. Narsingrow a loss has been created, for Mr. Narsingrow had for many years done most excellent voluntary work in meteorological matters in connection with the Meteorological Department.

Throther observatories were not able to be visited during the year 1892-93, and hence it is only possible to judge of their condition by the observations sent in. Excellent observations have been submitted by Bogra, Gnatong, Midnapore, Naya Dumka, Pamban, and Tavoy; good work has been submitted by Arrah, Balasore, Bankura, Bassein, Comilla, Malda, Mymensingh, Rampur Boalia, Ranchi, and Sirajganj. Rather indifferent work, with a considerable number of mistakes, has been submitted from Puri; while very bad and

untrustworthy work has been sent in from Dehri and Faridpur.

Raniganj Observatory, on the whole, has not worked satisfactorily throughout the year, and at present it is in temporary charge of the nazir of the Subdivisional Officer's Court. The subordinate of the Medical Department who had formerly charge of the Raniganj Observatory, gave absolutely no satisfaction, and at the request of the Medical Department he was relieved of the work. Up to the present time, however, it has not been found possible to make satisfactory permanent arrangements. When inspected in March 1892, Raniganj Observatory was found in fair order.

In the case of Dehri, which has now been sending in bad work for the past three years, the fact was reported to the Bengal Government, and it was suggested that the medical subordinate at that station, who is the meteorological observer, should be removed to some other station, and this is about to be carried out.

Owing, also, to the abolition of the Dacca Division of the Public Works Department during the year, the observatories at Faridpur and Mymensingh, which were formerly superintended by officers of that Department, had to be transferred—at Faridpur to the superintendence of the District Engineer, and at Mymersingh to the superintendence of the Chairman of the District Board.

Voluntary observatories.—The work done at the voluntary observatories is generally reviewed separately; but in the case of the most important of them Vizagapatam, it has already been referred to. Gnatong, which was at first a voluntary observatory, is now paid, and has also been discussed. In the case of Shortts' Island, the observer, Mr. Tasker, continues to send in most valuable observations, particularly in the case of stormy weather, and he was awarded Rs. 60 during the year from the Storm Observation Fund by the Meteorological Roporter to the Government of India for his excellent work. In the case of the other three voluntary spervatories, Tura, Demagiri, and Lungleh, the observations which have been sent in have been of comparatively little

value, as they appear to be generally very carelessly taken.

While considering the subject of the work done at the observatories, it will be desirable to mention that the system by which inward-bound vessels passing Saugor Island telegraph to the Calcutta office the meteorological observations taken daily on board the Pilot vessels at the Sandheads by means of a single hoist of four flags, has continued to answer very satisfactorily, and the code devised for this purpose is working very well. The number of such telegrams received during the year was 343. It will, however, be seen that there would be many days in the year on which the observations from the Pilot brigs as sent in this way would not reach the Meteorological Office. Hence special post-card forms were prepared during the year, and one of these is filled up daily on board the Pilot brigs with the day's observations, and these are despatched to Calcutta by the first inward-bound steamer after the observations are made. These, therefore, serve not only to complete the record of the observations made at the Sandheads, but the post-cards also serve as a check on the accuracy of the telegraphic messages which are received.

In addition, too, Mr. Marshall, the special Pilot of the British India steamers running between Calcutta and Rangoon, has favoured the Department throughout the year, by telegraphing to Calcutta from Rangoon a description of the weather experienced on the voyage. These telegrams have been sent for the greater part of the year by a code which was, in the first instance, prepared for telegraphing the description of the weather in the Bay from the Calcutta office to Rangoon, Madras, etc. A brief reference to this code was made in the Administration Report for 1889-90, and it is again referred to later on under the head of the daily reports. The thanks of the Meteorological Department are due to

Mr. Marshall for his valuable aid.

During the year under review also the Hon'ble J. L. Mackay, of Messrs. Mackinnon, Mackenzie and Company, the managing partner of the British India Steam Navigation Company, suggested that the captains of their vessels navigating the Bay of Bengal would be willing to aid the Department by telegraphing the nature of the weather they had experienced on their reaching that The offer was greatefully suggested that and the code will be seen to be a second of the code will be seen to be a second of the code will be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be seen to be see port. The offer was gratefully accepted; and the code referred to in the last paragraph was taken as the basis to work on. It was then specially modified to meet the circumstances of such voyages; and the system was then introduced in January 1893. In the case of vessels reaching such ports as Madras, Calingapatam, Gopalpur, Rangoon, etc., after having passed across the Bay of Bengal, the captain of the vessel telegraphs to the Calcutta office a complete description of the weather he has experienced, one or two code words being sufficient to describe the weather on each day of observation. In the case, too, of a vessel reaching Calcutta, similar information is supplied to the Meteorological Office, but by specially prepared post-cards instead of by telegraph. This system has now been in force for several months, and has worked very smoothly

and successfully, and very valuable information is thus received. The Meteorological Department is thus very much indebted to Mr. Mackay for his help in this matter.

Mr. Mackay has also further favoured the Department during the year by the great assistance he gave during a tour of inspection by the Bengal Reporter, and also on another tour by the India Reporter. It will be seen under the head of the inspection of observatories that during the year I inspected most of the observatories on the west coast of the Bay which report in connection with the Storm Signal Service, and it was only by the great courtesy of Mr. Mackay and of Captain Phillips of the S.S. Chindwara that I was able to visit all these observatories when travelling up the Bay in the same steamer, every facility being given, under Mr. Mackay's orders, for the landing at each port where there is a meteorological observatory and for the inspection required. In this way also Mr. Mackay has again conferred a great favour on the Meteorological Department.

In connection with the previous criticism of the work sent in from the various observatories, a table is given below showing the names of the observers at all the observatories in Bengal, and for the sake of comparison the table has been completed for the triennial period. In this table also the allowance drawn by each observer is stated, and from the last column can be seen the exact class of work done at each observatory, i.e., whether only one observation at 8 A.M. is taken daily, as indicated by "A," or whether three sets of observations at 8 A.M., 10 A.M., and 4 P.M. are taken, as indicated by the letter "B," etc. A complete statement of the work at the observatories is therefore indicated in the last column of this table:—

In order, also, that it may be seen at a glance what has been the character of the work at the various observatories working in connection with this Department for the past three years, the following table has been prepared, and the work in each year has been classed under the four headings of "very good," "good," "moderate," and "very bad." It will be seen that such observatories as Berhampore, Burdwan, Coconada, Dhubri, Hazaribagh, and Saugor Island have been in the front rank throughout the three years, with such observatories as Akyab, Bogra, Buxar, False Point, Gopalpur, Jessore, Krishnagar, Midnapore, Naya Dumka, Nellore, Pamban, Patna, and Silchar running them very close; while, on the other hand, the observatories at the following stations have been very bad or bad almost throughout the three years:—Chaibassa, Chittagong, Comika, Dehri, Faridpur, Gaya, Muzaffarpur, Noakhali, Purnea, and Raniganj:—

Table showing the general character of each observatory and of the work sent in from it during the triennial period 1890—93.

nspection of observatories.

The following observatories were inspected during the year 1892-93:—

Bankipore (twice). Barisal. Buxar. Chaibassa. Chapra. Coconada. Cuddalore. Darjeeling.	Darbhanga. False Point. Gopalpur. Gaya. Hazaribagh. Jalpaiguri. Jessore. Krishnagar.	Motihari. Muzaffarpur. Nellore. Noakhali. Purnea. Rangpur. Vizagapatam.
Darjeeling. Dinajpur.	Krishnagar. Madras (Port Office).	,

Of these, two were inspected by Lala Hem Raj, the Personal Assistant to the Meteorological Reporter to the Government of India, viz.—

#### Chaibassa and Purnea:

three by Mr. Gilliland, the then Officiating Assistant Meteorological Reporter to the Government of India, viz.—

Noakhali, Barisal, Jessore;

one by Miss Pogson, Meteorological Reporter to the Government of Madras, viz., Nellore; six by Mr. Little, Assistant Meteorological Reporter to the Government of India, viz.—

Patna, * Motihari, Chapra, Muzaffarpur, Hazaribagh, Darbhanga,

and the rest by myself.

The following is the result of inspection of the observatories. They are arranged according to the class of observatory, i.e., into second class and third

class, and also alphabetically.

Second class.—Bankipore was visited by me on the 31st October 1892. At the time of my inspection I found the bulbs of the wet bulb hygrometer and the wet minimum thermometer almost dry. This was due to observer's not using a sufficient number of threads and to his not keeping the water bottles full of water. In other respects the observatory was in a satisfactory condition. It was again inspected by Mr. Little, Assistant Meteorological Reporter to the Government of India, on the 18th March 1893. He remarks:—"The observer is well able to do the work, and seemed to be very reliable. I examined the clerk of the medical school who takes the readings when required. He also knew how to read the instruments accurately."

Darjeeling was inspected by me in October 1892, when the observatory was found in a satisfactory condition. A large number of comparative readings of the observatory barometer and the standard taken from Calcutta showed that the correction of the observatory instrument has slightly changed, having

decreased from +.022'' to +.013''.

Darbhanga was inspected by Mr. Little in March 1893, when he found the observatory in good order.

False Point was inspected by me in April 1892. The instruments were all in good condition. Mr. Sparkes, the Lighthouse-keeper, takes great interest in the meteorological work. Mr. Naylor, the observer, understands his work well, and takes the observations quickly and accurately. The observatory is an excellent one for forecasting purposes. The only drawbacks are the slightly defective exposure of the wind instruments to north-east and the distance of the lighthouse (where the observatory is situated) from the sea, which renders' it practically impossible to give the condition of the sea.

Hazaribagh was inspected by Mr. Little on 14th and 15th March 1892. He found the instruments all in good order. The observer was punctual in taking his observations, and seemed thoroughly able to do the work required

of him.

Third class.—Burisal was visited by, Mr. Gilliland (the then Officiating Assistant Meteorological Reporter to the Government of India) in May 1892. The primary object of the inspection was the removal of the barometer from a godown belonging to the Public Works Department. The barometer was removed to a room of the local post-office. The observer, who is a signaller of the Barisal Post-office, was also thoroughly trained. At the time of Mr. Gilliland's inspection, the observatory was found to be in a very bad condition. The instruments were found all dirty and neglected, and the bulb of the wet bulb thermometer thickly encrusted in dust. Grass had grown up all round the rain-gauge to a height of 6 inches to 8 inches above the top, and some of the blades were found actually overhanging the mouth of the rain-gauge.

Buxar was visited by me on the 31st October 1892, when the observatory was found to be in a very satisfactory condition. The observatory keeps up its good reputation under the observer, Babu Baikanta Nath Guha.

Chaibassa was visited by the Personal Assistant to the Meteorological Reporter to the Government of India on 21st January 1893. The chief object of the visit was to ascertain the cause of persistent discrepancies found in the barometric readings reported by the observer. The comparative readings which the Personal Assistant took of the observatory barometer and the standard instrument taken from Calcutta, disclosed the fact that the correction of the observatory barometer had changed considerably. The former correction was — 005", while it had changed to + 015", i.e., a difference of 020" had taken place.

Chapra was visited by Mr. Little on 20th and 21st March 1893. instruments were all found in good condition. The observer could read the

barometer accurately but slowly.

Coconada was visited by me in April 1892. This was the first time that this observatory was visited by an officer of the Meteorological Department since its establishment in 1880. The observatory is situated at the Port Office, about  $\frac{3}{4}$  mile from the sea, and there are only a few single-storied buildings and trees between the sea and the Port Office. The site is, a good one. The barometer is suspended in the Port Officer's room in very good light. It was clean, perpendicular and in good condition. The shed instruments were all clean and in good condition. The wind instruments are on a mast and platform to the north and east of the Port Office. The anemometer is placed on the highest part of the erection, and the wind vane is to the west of the The observer is sharp and intelligent, and does his work quickly and accurately. He keeps the observatory and the instruments in excellent order, and I was much pleased both with the observatory and with the observer. Captain Wickes, the Port Officer, takes the greatest possible interest in the work of the observatory, and hence keeps it in excellent condition. There is telephonic communication with the lighthouse, and by this the state of the sea, which is reported in the weather telegrams, is ascertained daily.

Cuddalore was visited by me on the 14th April 1892. The barometer is placed in the sorting room of the post and telegraph office in a cage; but it is in bad light, and it is very difficult to read it correctly. The mercury in the cistern was very much oxidized, and the whole scale for reading the instrument was abnost black with oxidation. The instrument was therefore changed by another barometer. The thermometer shed, which is outside the postal and telegraph office, is surrounded on all sides by high trees, and hence the

exposure is by no means satisfactory. The wind instruments are placed on the roof of the post-office, but the position is not at at all satisfactory, as there are high trees on all sides (except to the west). The exposure of the wind instruments and the thermometer shed is hence very objectionable. The condition of the wet bulb hygrometer and the wet minimum thermometer was far from satisfactory, as the muslin and thread were dirty and the bulbs were encrusted. The tube of the funnel of the rain-gauge was found almost choked The observer, though careless in several respects, was found to be intelligent, and seemed to understand his work well.

Dinajpur was visited by me on the 21st October 1892, when I found the instruments in good condition except the dry minimum thermometer, which had a deposit of one degree of spirit in the upper part of the tube. The observer was found to have finished his 8 A.M. observations considerably before 8 o'clock, probably soon after 7-30 A.M. The observer was severely reprimanded for this want of punctuality. The correction of the barometer was found to have changed from + 009" to +018," and this new correction was adopted

from 1st January 1893.

Gaya was visited by nie on the 30th October 1892. The barometer was found out of the perpendicular and the thread and muslin attached to the bulbs of the wet bulb thermometer appeared not to have been changed for a considerable time. A small new pucks erection—the Grierson memorial well has been built to the east of the observatory at about 15 vards distance, thus affecting the exposure of the shed to a very large extent. Another site was selected in consultation with the Civil Surgeon, Gaya, and arrangements made to remove the shed to the new site as soon as possible. The position of the rain-gauge also was extremely bad, and it was arranged to remove it to another site.

Gopulpur.—An attempt was made to visit this observatory on the 22nd April 1892. On arrival at Gopalpur the surf was running very high, and it was quite impossible to land the standard barometer in safety. Hence the

inspection could not be made.

Gopalpur itself is almost entirely on the seashore. About 20 or 30 miles inland there is a range of rather high hills which extend perhaps 30 or 40 miles to the north of the station, when they appear to cease. The height of these hills, I should think, is at least 4,000 feet in parts, and they would form an obstacle in the path of a storm, and would probably tend to deflect it northwards.

The position of the observatory and of the anemometer could be seen The anemometer is at the end of the pier and has a splenfrom the steamer. did exposure, and the observations at this station ought to give early and reliable indications of any bad weather in the Bay by the change of wind direction and by wind velocity, &c.

Jessore was visited by Mr. Gilliland on 28th May 1892. With the exception of the dry minimum thermometer, which had a small deposit of spirit behind the brass fastener at the end of the tube, all the instruments were in fairly good condition. The regular observer was on leave, and the officiating man was examined by Mr. Gilliland and found to be intelligent, punctual, and to know his work well.

Jalpaiguri was visited by me on the 7th October 1892. The instruments were all in good condition. The wind vane, however, was wrongly fixed, as the north pointer was about 15° to the west of true north. This defect has since been remedied.

Krishnagar was visited by me on the 6th October 1892, when the observatory was found to be in a very good condition. The wind vane was found to have become utterly useless, and was replaced by a new one sent from Calcutta.

Madras (Port Office) was visited by me on the 11th, 12th, and 13th April The barometer is in a pucka room of the Port Office on the third storey. The thermometer cage is under a wooden-roofed verandah, freely exposed to the The wind instruments are on a staging above the barometer room, and are therefore at a very considerable elevation above the ground. instruments which are in use at the observatory were found to be in good order and very clean. The observer is sharp and reads his instruments accurately and quickly. The Officiating Port Officer, Captain Creagh, takes great interest in the work of the observatory.

Muzasfarpur was visited by Mr. Little on 23rd March 1893. He remarks:—
"The dry thermometers were in good order. The thread and pieces of cloth of the wet thermometers were dirty and no doubt partially dry when the observer began to take the readings. As I approached the shed, he poured some of the water from the bottles over the bulbs, and almost immediately took the readings. The bottles were dirty, the water being discoloured by green fungus, and the bulbs were encrusted. The anemometer seemed to be in want of oil. There was no receiving bottle within the rain-gauge. A bottle that the observer said had been sent with the instruments must have been intended for the rain-gauge. I put it in." As the result of this inspection, the observer was fined as. 5 for his want of attention to the work.

Motihari was visited by Mr. Little on the 22nd March 1893. The bulb of the wet bulb thermometer was slightly encrusted. The wind vane is old and

was found to be useless. Everything else was in good order.

Nellore was visited on the 6th, 7th, and 8th August 1892 by the Meteorological Reporter to the Government of Madras. The barometer was found defective and was changed by another. Miss Pogson thus speaks of the observer:—"Mr. Conn, the Telegraph Master, reads and takes his observations most carefully and accurately, and is, in my opinion, one of the best and most conscientious observers. The general condition of the observatory was most satisfactory and highly creditable to Mr. Conn."

Noakhali was visited by Mr. Gilliland on the 24th May 1892, when he found all the instruments (except the anemometer) in good order. When taken to pieces the anemometer was found perfectly clean, but the horizontal shaft was not fixed true in its bearings, and the upper brass cylinder enclosing the vertical steel rod which carries the cups, was not quite vertical. The defects were remedied. The observer was taking his time from the telegraph office

clock, which was about 30 minutes fast.

Purnca was visited by the Personal Assistant to the Meteorological Reporter to the Government of India. He remarks:—"The jail hospital assistant does the work of observation. He had never had any proper training in the work, and was hence reading the barometer and anemometer by erroneous methods. The columns of the spirit thermometers were broken into fragments and the observer, although aware of the defects, did not know how to rectify them." The observations of this observatory were very unsatisfactory for some time past, and the result of the inspection shows that the erroneous readings were due to the ignorance of the observer as to the proper method of reading the instruments.

Rangpur was visited by me on 22nd October 1892. The condition of the anemometer was extremely bad, as it was not oiled for more than 11 months. The dial plate was loose and the shot was firmly fixed on the cup by hardened oil. The bulb of the wet bulb thermometer at its bottom was badly encrusted. The bottle was only half full of water, and the muslin and thread were dirty, as they had not been changed for some time. His method of measuring rainfall was also incorrect. The observatory was therefore in a very bad condition

when inspected.

The following table will show the observatories which have been inspected in each of the three years 1890—93. Twenty-five visits of inspection were made in the year 1890-91; in the following year twenty-three visits of inspection only could actually be made, one of them being made by the Madras Reporter; and in 1892-93, twenty-six inspections were made, as indicated previously. The number of inspections made is certainly not so large as is desirable, but, as pointed out in previous Administration Reports, it is practically impossible to do more than is done. The Bengal Reporter, who is mainly responsible for inspecting the Bengal stations, is also responsible for warning the ports all round the Bay of Bengal of the occurrence of storms throughout the year, and hence he can only leave Calcutta during the brief intervals when severe storms are not expected. In addition to this the Bengal Meteorological Reporter is only a half-time officer, and he has to attend to his duties at the Presidency College during the greater part of the year. Hence he is only able to inspect during

the college vacation, and further only during the parts of the vacation when weather is fairly settled in the Bay of Bengal:—

Under the circumstances explained previously it will be seen that the work of observatory inspection by the Bengal Reporter is attended with considerable difficulty. Hence it is necessary to state that, during the triennial period under review, the observatories in the following table, which are under the direct control of the Bengal Meteorological Reporter, have not been inspected. Of these observatories, Chittagong, Comilla, Faridpur, and Sibsagar are in urgent need of inspection:—

List of observatories that could not be inspected during the past three years.

Akvab.	Saugor Island.	Tavoy.
Balasore.	Faridpur.	Pamban.
Burdwan.	Midnapore.	Dhubri.
Chittagong.	Mymensingh.	Sibsagar.
Comilla.	Naya Dumka.	Silchar.
Dacca.	Sirajganj.	

The number of instruments broken or allowed to get out of order may be looked on as a test of the care with which an observer does his work. Hence a table is appended

below showing the various instruments which have been issued to all the observatorics under the control of the Bengal Reporter during the past three years:—

List of instruments issued to the Observatories in Bengal and Assam during 1890-91, 1891-92, and 1892-93.

New equipment.

A large amount of attention has been paid to the rainfall-recording stations in Bengal during the past year with a view of improving the registration and of filling up gaps which had previously existed.

The following new stations were started during 1892-93:-

	District.		Station.
Cuttack Midnapore Chittagong		•••	Pal Labara. Panskura. Kodala. Fenoa. Mirsarai. Chandpur.

The total number of rainfall stations in Bengal on the 31st March 1863, was 276.

Considering the number of stations which record rainfall only, the following figures will show the steady increase which has taken place in their number during the past six years:—

Year.				Stations.	-		Stations.	
			1		li	<del></del>	;	
1887-83	•••	•		250	1890-91	•••	}	257
1888-89	•••		•••	255	1891-92	•••		267
1889-90	•••		•••	258	1892-93	•••		276

It was stated in the Administration Report for 1891-92 that a system of inspection of rain-gauge stations had been introduced, under which various District Officers, Magistrates, Deputy Magistrates, Civil Surgeons, etc., when on tour in their districts inspect the rain-gauges and report the results of the inspections in form in which definite questions have to be replied to direct to the Meteorological Office. During the year 1892-93, 58 rain-gauge stations have thus been inspected, and in the majority of cases the rain-gauges have been found in good order. In other cases defective instruments were found, which have been changed, and in some the exposure of the sites of the rain-gauges was bad, and these have also been changed. In addition, too, during the past year, the officer in charge of each rain-gauge in the province was required to fill in the answers to a considerable series of carefully prepared questions as to the dimensions of the rain-gauge and the accuracy of its measurements and of the measuring glass used with it, and also questions dealing with the site and exposure of the instrument. A rather large number of defective instruments and of extremely bad exposure of rain-gauges are thus brought to light, and in all cases, as far as possible, these defects have been remedied, and it is hoped that the registration of rainfall is now on a satisfactory footing.

The daily and weekly rainfall returns have been received from these very numerous stations with very commendable punctuality throughout the year, and, so far as can be judged by the critical examination of the figures sent in, the statistics are in almost all cases fairly accurate and reliable.

On the whole there has been no practical change in the nature of the reports issued during the past year from those in former years. These reports consist of those issued

daily, weekly, monthly, and yearly, and of certain special reports.

Daily reports.—Two daily reports are issued by this office—the first, which deals with the interorlogy of the Bay area only, is published daily throughout the year, Sundays and holidays included. This report contains the 8 A.M. observations made at twenty-eight stations round the Bay and it is lithographed and consists of a chart representing the Bay area with isobars, &c., the reduced observations received from the twenty-eight stations, and also a brief report as to the character of the weather. The report is lithographed in the Moteorological Office, and is issued daily at about 10-45 A.M. Absolutely no change has been made in this report during the past year, and it was issued to thirty subscribers paying Rs. 6 per quarter, and to forty-seven Government officers without charge. There was a small balance of Rs. 429-15-0 in connection with the fund on account of this report at the close of the offical year (1892-93).

This report is maintained specially with reference to the working of the Storm Signal Service, and it is on these observations that the storm forecasting work is carried on. After the report has been written, special telegrams are

^{*} Mohagama was abolished and Belbodda started in its place.

*[* 

dispatched to the various ports describing the weather in the Bay on that day at 8 A.M. Two classes of messages are sent; first, by means of a specially prepared code, the general weather conditions, the wind direction and velocity, the state of the sea, and the changes in barometric pressure are telegraphed for each of eight sections into which the Bay has been divided, to such ports as Rangoon, Madras, Negapatam, and Coconada throughout the year, and to Akyab and Chittagong also during certain seasons of the year. In the case of Chittagong, which is newly added to this list, the Port Commissioners of that place asked to be supplied with this information from 15th of May to 15th November in each year, and the Commissioners obtained the sanction of the Government of Bengal to defray the cost of the telegrams from the port funds. The first of these telegrams sent to Chittagong was despatched on November 3rd, 1892.

This code was modified and improved very considerably during the year, and by the modification much fuller information can be given than was previously the case. The code is indeed now working very satisfactorily.

Further weather information is also sent by telegram immediately after the preparation of the daily report to certain stations. This information is sent by a new code which was described in the previous Administration Report, and is used to communicate weather information to ships at a distance from the shore. Each flag in the commercial code of flags has been given a distinctive meteorological meaning, and the Bay has been divided for the purpose of this code into four sections, and by telegraphing the designation of four flags or by hoisting four flags at any signal station, any passing vessel within view of these flags is able to ascertain the state of the weather in each of the four sections of the Bay. Telegrams giving this information are now daily sent to Saugor Island, Madras, and Rangoon. The first use of this code was made at Saugor Island on 1st May 1892, and since that date every vessel which passes out to sea is supplied by the flag signals with a knowledge of the weather conditions of the whole of the Bay. If the vessel passes out at about 11 A.M. or later, it receives a statement of the weather in the Bay on the same day at 8 A.M.; but if the vessel is proceeding to sea before 11 A.M., the information provided will have reference to the previous day. At first this plan was tried experimentally for six months, but it gave so much satisfaction to the commanders of vessels, pilots, etc., that it has, with the usual courtesy of the Telegraph Department, been made a permanency. In order, also, to carry out this system, the Port Commissioners of Calcutta provided the four sets of flags required for the signalling purpose at Saugor Island, and also from the 1st of April 1893 they will pay an allowance of Ro. 1 per month to each of the five menial servants or khalasis at Saugor Island who are engaged in the duty of hoisting the flags to the passing vessels. This system of flag signalling has proved most successful.

of flag signalling has proved most successful.

The second daily report deals with the province of Bengal and Assam, and this was published during the past year from 24th April to 12th November. The only changes made in this report were two in number. In the first place advantage was taken of the opening of a telegraph office at Naya Dumka to add this station to those already included in the report. In addition, too, when Gnatong was converted from a voluntary station to a regular paid observatory, the daily observations were ordered to be telegraphed to Simla for the India Weather Report and to Calcutta for inclusion in the Bengal Report. The first telegram was sent in on 1st October 1892. This report, therefore, now includes daily telegraphic observations from one of the highest telegraphic and meteorological stations in the world.

During 1892 this daily report was circulated to 16 subscribers, each paying Rs. 2-8 per month, and also to 106 Government officials, who receive the report free of charge. It was mentioned in the last Administration Report that, at the request of the Calcutta Chamber of Commerce, a scheme had been submitted to that body for improving the daily report issued by this office by, to a great extent, amalgamating the two daily reports above described, and by providing certain additional information for the tea and indigo districts. It appears, however, that the proposal did not meet with approval, for up to the present time the Chamber has taken no further action in the matter, and has indeed not expressed its opinion on the scheme at all.

In the case of the weekly and monthly reports published in the Calcutta Gazette and of the Annual Report on the Meteorology of Bengal published in the Bengal Administration Report, there have been no changes to record, except that Gnatong has been added to the list of reporting stations; and in the case of these reports, and also of the two daily reports, they have been printed and published at the required dates and periods, without any failure whatever, throughout the whole year.

A summary of the meteorological condition during the monsoon season of 1892 was also published in the Calcutta Gazette, and monthly charts, representing the various rainfall statistics throughout the monsoon season, have been

submitted to Government and furnished to the Sanitary Commissioner.

Storm signals.—The working of the system of storm signals has remained quite unaltered during the past year and, indeed, during the triennial period the only change introduced was the extension of the storm-warning system to Narayanganj in November 1891. The signals selected for that port are similar to those in use at Chittagong and at the Orissa ports, and these significations

were arranged to be also almost similar in character.

The year 1892 was on the whole not a stormy one, and there was only one very severe storm and one rather severe storm. The first was noticeable as forming in the extreme north-west angle of the Bay in the first ten days of June, and for becoming rather rapidly of great severity though small in diameter. It first advanced in a northerly direction, and it at one time appeared probable that it would advance direct up the Hooghly to Calcutta; but it changed its direction to the north-west or west on nearing the land, and struck the coast about midway between Saugor Island and Balasore. It then recurved and vecred rapidly away in a west-north westerly direction. It gave a small storm wave on the Balasore coast.

The second storm of note occurred in October, and was also decidedly severe though small. It was remarkable for the great rapidity with which it crossed from the east to the west of the Bay, the average velocity equalling about 18 miles an hour. It struck the coast near Coconada, and it was also remarkable for the almost complete absence of any indication of its approach

towards the west coast of the Bay.

The other storms occurring during the year were generally of minor

importance.

The dates of the principal storms and barometric depressions occurring during the year are given in the first of the two following tables, and the action taken in the matter of issuing storm warnings and hoisting storm signals is indicated in the second of these tables:—

Table giving a brief statement of the storms which affected the Bay of Bengal coasts during the year 1892.

No. of storm.	Period of depression or storm.	Character of storm.	Coast affected.
1.	May 24th to 26th	Two feeble depressions forming, one north of the Andaman Sea, and the second off Orissa coast; both disappearing on reaching the coast.	Burma coast and Orissa ceast, respectively.
2	June 7th to 11th	Small storm formed off South Orissa coast, moving northwards and intensifying rapidly into a severe cyclone in the north-west angle of the Bay. It reached the land between Saugor Island and Balasore.	Bengal and Orissa coasts.
3	July 4th to 10th	Small storm forming off the Gan- jam coast, intensifying moderately and advancing north-westward, crossing the coast near Balasore on the 10th.	Orissa coast.
4	August 24th and 25th and 28th to 31st.	Slight to moderate depression forming off the west coast of Bay, crossed the coast near Puri.	Ditto,
5	September 9th to 10th	Small storm formed off the Orissa coast, crossed the coast south of False Point on the 9th.	Ditto,

No. of storm.	Period of depression or storm.	Character of storm.	Coast affected.
6	September 21st to 22nd	Small storm formed in centre of Bay, moving slowly westwards, passed inland between Coconada	Madras coast.
7	October 16th to 17th	and Masulipatam on the 21st. Shallow depression overlying centre and south of Bay, moving towards Madras coast; crossed coast near	Ditto.
8	Do. 18th to 20th	Nellore on the 17th.  Small but severe storm forming probably in Andaman Sea mear Burna coast, marching westwards rapidly towards the Circars coast near Coconada on the	Burma and Madras coast.
9	Do. 27th to 29th	20th.  Moderate barometric *depression advancing to west coast in west-north-west direction, intensifying slowly, reaching the coast between Nellore and Masulipatam.	Madras coast.
10	November 28th to December 3rd.	Barometric depression in centre of south of the Bay, advanced towards the west coast, but filled up before it reached the land.	South Madras coast.

Table showing the action taken by the Calcutta Meteorological Office in warning the coasts affected by the storms enumerated in the previous table.

The Meteorological Office staff has remained practically unchanged throughout the year. The Head-clerk, Babu Fanindra Mohan Basu, has continued to superintend the office in a most efficient manner, and under his able superintendence the office has worked very smoothly and very efficiently, and this has enabled the numerous reports, returns, maps, etc., published by this Department to be issued punctually and with great regularity throughout the year.

METEOROLOGICAL OFFICE;
CALCUTTA,
The 25th April 1893.

ALEX. PEDLER, F.R.S., F.I.C., F.C S.,

Meteorological Reporter to the Government of Bengal.

### REPORT ON THE CALOUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1892.

#### MUNICIPAL DEPARTMENT-MEDICAL.

No. 2089Medl.

Calcutta, the 19th June 1893.

RESOLUTION.

#### Read-

The Report on the Calcutta Medical Institutions for the year 1892.

## Read also-

The Report for the year 1891 and the Resolution recorded upon it.

During the year 1892 the public health was slightly better in the town of Calcutta and the amalgamated area than in the previous year, which was one of unusual mortality throughout the province; the general death-rate in those two areas having been 27·1 and 34·8 respectively, against 27·9 and 39·4 in 1891. In Calcutta the number of deaths from cholera, bowel-complaints, and fever show a decrease, while those from small-pox and other causes show a slight increase. In the amalgamated area also cholera, fever, and small-pox appear to have been less prevalent, but mortality from bowel-complaints and other causes was greater than in the previous year. In Howrah the recorded death-rate has risen from 18·29 to 23·68, the increase being distributed over all the heads except small-pox and other causes. The deaths from cholera and fever increased by 281 and 369 respectively, the number of deaths from cholera having been greater than in any of the previous ten years.

2. The following table shows the number of indoor and outdoor patients treated in all the hospitals and dispensaries of the metropolis during the past

two years :-

The total number of outdoor patients treated is larger by 6,954 than in 1891. The increase is said to be due to the opening of an outdoor dispensary attached to the Campbell Hospital, in which no less than 11,470 patients were treated. There has been a falling off in the number of in-door patients which was insignificant everywhere except in the Campbell Hospital, where the numbers receded from 9,088 to 8,551 awing to the opening of the out-door dispensary mentioned above. In the Police and the Mayo Hospitals there was a decrease of 423 and 128 respectively. All the other institutions, however, received a larger number of in-patients than in the previous year.

Of the total number of persons treated during the year, 154,492 were adult males, 37,707 adult females, and 59,784 children, against 153,705, 34,678, and 56,753 respectively in 1891. The statistics according to race show that there was an increase of all classes of patients except Hindus. The increase of European patients is said to be due chiefly to the increased population of the port, brought about by the stagnation of trade and the large number of vessels detained in the river, and to the popularity of the out-door department of the Eden Hospital. The number of Hindu patients decreased in all the hospitals except Howrah, the total falling off being 3,155; but the year 1891 showed an advance of 7,297 upon the figures of 1890, and the fluctuation in 1892 is probably fortuitous.

The rate of mortality among the inmates of the medical institutions was practically the same as in several past years, viz., 12.7 per cent. The death-rate as usual was highest in the Campbell and Howrah Hospitals, where panper and moribund cases are sent for treatment. The death-rate among children was lower than that among adults which is 60 per cent. higher than

the average rate of English Hospitals.

There was a slight increase in the small-pox cases treated in the hospitals, the numbers being 35 against 21 in the provious year. All of these cases were admitted in the Campbell Hospital and 10 of them proved fatal. This the Inspector-General of Civil Hospitals thinks is indicative of the absence of protection by vaccination in at least half the number of cases. afford grounds for further conclusions, the Lieutenant-Governor desires that the nulinber of patients who can be seen by their marks to have been vaccinated, or inoculated, or to have had small-pox, and the preportion of deaths among them, should be stated in future reports. Results so remarkable have been obtained from observation of an outbreak of small-pox in the Dacca Jail during 1892, that His Honour desires that particular attention should be given to recording the past medical history of small-pox patients, and the previous efforts, if any, made to protect them. Seven hundred and nine persons were admitted to hospital during 1892 suffering from cholera, which in 425 cases proved fatal, giving a ratio of nearly 60 per cent. The mortality among European patients treated for this disease was higher in the General Hospital than in that attached to the Medical College. The Lieutenant-Governor is glad to find that there were no cases of cholera among the patients in the Presidency General and the Campbell Hospitals, but the Medical College and the Howrah General Hospitals did not enjoy this immunity, 6 and 4 cases respectively having occurred in those institutions. These cases are said to have been due chiefly to contaminated food obtained by the patients from outside the Hospital. There was a considerable decrease in the admissions for dysentery and diarrhera, but the mortality shows a higher percentage. Malarial fever also was responsible for fewer admissions than in the previous year, though it is by far the most common disease in the Lower Provinces. The number of cases of venereal disease rose from 11,886 to 13,072. The Inspector-General of Civil Hospitals remarks that the "statistics of the Presidency General Hospital are significant of the greater prevalence of syphilis in the quarters frequented by European sailors." The figures produced in the report, however, show that the increase is slight, and there is a decrease in cases of secondary syphilis compared with the average of the last five years. The admissions for leprosy fell from 134 to 94, of whom all but six were received in the Campbell Hospital. Dr. Pilcher objects to the treatment of lepers in the same ward with other patients, thiefly, it is understood, on account of the loathsomeness of the disease, for the danger of contagion according to the conclusions of the Leprosy. Commission is very small, and he suggests that, when the new Leper Asylum is opened, they should not be admitted to the hospitals. If, however, the hospitals were closed to them, and they were all forced into the Leper Asylum, the accommodation which it is proposed to provide in that institution would be quite in-The total number of cases of enteric and remittent fever treated in all the hospitals during the year was 12 and 1,215 respectively against 26 and 1,188, the corresponding figures of the previous year. Of the 12 cases of enteric fever, 6 are shown as having occurred in the Medical College Hospital, 5 in the Presidency General Hospital, and 1 in the Howrah General Hospital.

absence of this disease from the institutions, where only native patients are received, is noticeable, especially in connexion with the belief entertained by some that the natives of this country are to a great extent free from this disease. But Dr. Pilcher remarks that this does not set aside the conviction of many careful European and Native observers that enteric fever often attacks natives of this country. The difficulty of distinguishing it from remittent fever renders any definite opinion on this subject at present impossible. The Sargeon-General with the Government of India recently enjoined extreme care in the diagnosis of the disease, in the hope that some day the key to the difference between the two diseases may be found.

6. The total number of major operations performed in all the institutions shows an increase of 1,182. The increase is said to be due in a great measure to a common class of operations (tapping for hydrocele) which have hitherto been classed at the Medical College Hospital as minor operations having under recent orders been included under this head. It is satisfactory to notice the general reduction in the percentage of death after operation from 4.5 to 3.78, and the fact that in the Howrah General Hospital it fell from 8.23 to 3.01. This result is said to be due to the care and thoroughness with which the details of antiseptic surgery have been carried out. The number of dental operations performed was 2,362 against 2,275. There was a considerable increase in the number of Europeans who sought relief for dental diseases, while the number of Eurasians fell from 894 to 760. This result hardly bears out the remarks made in paragraph 45 of the report for 1891, that the teeth of mixed are more prone to

decay than those of unmixed races.

7. In the Eden Hospital 1,609 women and children were treated against 1,811 in the previous year. Of these, 832 were Europeans, 746 Hindus or Mussulmans, and 31 belonged to other classes. The daily average attendance of Europeans shows the large decrease of 33 per cent. The reduction in the number of admissions of European and native patients is attributed by Dr. Joubert to the opening of the out-door department. There were 28 deaths among Europeans and 67 among natives, as compared with 32 and 65 of the previous year. The number of confinement cases rose from 501 to 542, the mortality among this class of cases being 26 against 21 in 1891. The number of cases of septicæmia also rose from 24 to 31, giving a percentage of 5.7 on confinements as against 4.7 in 1891: of these 21 proved fatal. These figures show that the precautions reported as having been taken against the occurrence of this disease have unfortunately not had much effect, and the Lieutenant-Governor would again dwell on the necessity of using all possible means to minimize the chance of its appearance or extension in the hospital. His Honour has already suggested that isolation is the best way of treating it, and if funds can be provided, the necessary steps will be taken to erect a separate ward for the treatment of this discase.

The steady increase in the number of out-patients treated in the Shama Churn Law Eye Infirmary points to the growing popularity of the Institution. The principal operations performed were extraction of lens, iridectomy and excision of the eye-ball. The operations for cataract were successful in 61 per cent. of the cases which compares unfavourably with the results in the Howrah Hospital, where the operations were successful in 87 per cent. of the cases treated.

9. In the Ezra Hospital, which is intended chiefly for the sick of the

Jewish persuasion, 1,555 out-patients and 350 in-patients were treated, the daily average attendance being 10.6 and 16.91 respectively against 12.63 and 16.73 in 1891. These low figures hardly bear out the Inspector-General's remarks

that the Institution has fulfilled the beneficent object of its founder.

The nursing arrangements of the Medical College and General Hospitals continue to work satisfactorily: grateful testimony to the efficiency and skill of the nurses is frequently received, and the Lieutenant-Governor desires to place on record his appreciation of the good work done by them. Two trained European nurses have been employed in the Howrah General Hospital, but they are not connected with the Hospital Nurses' Institution. Fourteen pupil nurses and eight pupil dhais, passed out of the Eden Hospital.

11. The invested capital belonging to the hospitals remains the same as in

1891, viz., Rs. 5,83,000, of which more than half belongs to the Mayo Institu-

The receipts from paying patients and the miscellaneous receipts are this year shown separately for the first time, which accounts for the apparent

falling off in receipts from Local Funds.

The total income excluding the opening balance amounted to Rs. 4,83,559 against Rs. 4,80,174, and the total expenditure excluding the amount invested was Rs. 4,73,056, which exceeded the amount expended in 1891 by Rs. 3,613. The increase was distributed over all the heads of expenditure except repairs and buildings. The cost to Government shows a reduction of Rs. 6,549, while the receipts from local sources increased by Rs. 9,934, chiefly owing to larger receipts from the Port Dues Fund and from paying patients. In the Medical College Hospital the cost of diet increased by Rs. 5,070-4-11, which is said to be due to higher rates and larger issues of diet. The average cost of the daily diet was annas 7-23 for Europeans, and annas 3-35 for natives.

12. In the Resolution on the report for 1891, the Lieutenant-Governor commented on the variations in the cost of diet at the different hospitals, and on the absence of any explanation of the fact. The matter has not been lost sight of during the year past, and it has been shown that the circumstances of the different institutions vary so materially that uniformity in the matter of average expense is very difficult to attain. In the Presidency General Hospital the patients are all Europeans, and a considerable number are paying patients. In the Howrah General Hospital and in the Medical College Hospital both Europeans and natives are treated. In these circumstances, it will be sufficient to publish side by side the average cost of diet of European and native patients at each institution, and the Lieutenant-Governor relies on the Inspector-General to keep the expenditure under this and other heads to the lowest point compatible with complete efficiency. There has been an advance in the cost of

native diet everywhere, and in that of European diet at the Medical College Hospital only.

- 13. In the Medical College Hospital a new latrine block has been erected, and improved arrangements have been made for the supply of drinking water. Two rooms were constructed for the Registrar's office and the Medical officer's board-room, and other minor improvements have been effected. All of them were much needed, and the Lieutenant-Governor is glad that they have been carried out.
- 14. The existing provision for meeting the medical wants of the town has more than once been declared to be insufficient by the Local Government, and this opinion was endorsed by the Government of India in July 1892. Accordatingly, after the close of the year under review, a Committee was appointed to report on the necessity for providing further accommodation and the localities where it should be afforded. They have suggested the establishment of a hospital at Bhowanipur, and four out-door dispensaries in Wards Nos. 3, 19, 20, and 22 respectively: their proposals have received the full assent of Government, and the difficulty of providing funds for the work alone retards is commencement.
- 15. The report brings into striking prominence the insignificant extent to which the medical charities of Calcutta are supported by voluntary contributions. Out of a total income of rather more than five lakhs of rupees, as much as Rs. 3,15,000 were contributed by Government, while the subscriptions from Europeans and Natives aggregated only Rs. 11,818 and Rs. 1,371 respectively. In other words, out of every Rs. 100 spent in 1892 on the Medical Institutions of Calcutta, the proportion voluntarily contributed by those whose countrymen form 81 per cent. of the patients treated was less than five annas. The Lieutenant-Governor would be glad to see part of the great stream of native charity turned into this most useful channel.
- 16. The thanks of the Lieutenant-Governor are due to Surgeon-Colonel Pilcher for a clear and concise report, and for the promptitude with which it has been submitted.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal. .

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M. SATURDAY. THE 17TH JUNE 1893. •

THE most noticeable feature of the weather during the past week is the recommencement of south-west monsoon conditions. This was brought about by a disturbance which had been forming for some days during the previous week in the south of the Bay, and which at the beginning of the present week was probably causing squally weather in the extreme south. The depression steedily developed, wind velocity increased daily at Diamond Island, but pressure changes were very small at all the coast stations. The depth of the depression and the intensity of the disturbance were to a large extent due to the very high and increasing pressure in Bengal and the north of the Bay, and the effect of this was seen in the rapidity with which the disturbance moderated when the high pressure began to give way. On the 12th the low pressure area covered the greater part of the Bay, and within that area readings were below 29.65 inches, but at the coast stations there was no defect. On the following day the distribution was almost the same, there being a slight fall in the south of the Bay and a slow increase in the north, but on the 14th the fall became brisk in Madras and the Circars, and the depression was shown as over the west of the Bay. This was followed on the 15th by a very rapid fall in the Circars, and some time in the night of the 15th the depression crossed the coast between Coconada and Vizagapatam. By the time the centre reached the coast there was every sign that the depression was becoming more diffused and at the same time filling up Under these conditions the stormy weather moderated very rapidly, but for two or three days afterwards strong winds and a rough sea prevailed along the west coast as far south as Masulipatam.

While the depression was still over the sea, showery weather was being experienced in many parts of Bengal. But this rainfall was caused by local thunderstorms and was consequently scattered and irregular. On the 13th in Orissa, and on the 13th and 14th in most of the other districts, there was a marked falling off in the rainfall, the showers being neither so heavy nor so general, but after the depression crossed the coast, and winds became more southerly, ordinary monsoon weather became general in all districts except North Bilbar, where only scattered showers were received up to the end of the week. During the first two days southerly winds prevailed in Lower Bengal, but as the depression developed, these southerly directions changed to east, and the circulation in Bengal formed part of the cyclonic system in connection with the depression.

It is remarkable that the setting in of the monsoon weather in Bengal should have become established at a time when pressure was considerably above the normal in all districts. Throughout the week there was a large excess in places, and at one time it was almost as much as a quarter of an inch.

Pressure.—As just stated, pressure readings were above the normal throughout the week, and steadily increased till the last two days, when they fell moderately fast. Means are everywhere above the normal by amounts between 'l inch and '15 inch except in Orissa,

where excess is less than '1 inch.

Temperature. Owing to the cloudy weather which was fairly general, temperature was below the normal in all districts except East Bengal and latterly part of North Bengal, where there was a small excess. The largest defect was in Chota Nagpur, where it was steadily 5° or more, and from there it diminished in all directions. The means for the large divisions are below the normal by amounts ranging from 1° in North Bengal to 5.9° in

Chota Nagpur, except in East Bengal, where there is excess of nearly 1°.

· Rainfall.—As the depression never was near the province, rainfall during the week was fairly evenly distributed. Though occurring in most districts as local showers, the amounts were at times rather heavy, and only two districts have received less than their normal falls. These are East Bengal and North Bihar; the defect in the latter is only a fifth of an inch, but in East Bengal it is as much as 2.99 inches. The two districts which were most under the inches of the disturbance are Orissa and Chota Nagpur, where there has been excess of 1.07 inch and 1.54 inches respectively. In South-West Bengal, North Bengal and South Bihar the falls are almost normal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 17th of June 1893:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86,

formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning.

# JAPAN-SIMONOSEKI STRAIT.

Buoy marking Kasaze rock.

THE British Admiralty has given notice (No. 223 of 1893) that a buoy has been placed in 63 fáthoms at low water spring tides, eastward of Kasaze rock, at the west entrance of Simonoseki or Nagato strait. The buoy, conical red, and surmounted by a cone (about 143 feet above water), lies with the south-west extreme of Hamo island (Miaiko jima), N.-E. by E. E., distant 61 cables, and cape Sizikuts, N. 1 W.

Approximate position, lat. 83° 56′ 4″ N., long. 130° 52′ 18″ E.

(2) Hayatomo strait—Fixed light on Northern shore.

Also, that on or about 1st April 1893, a light, named Danno ura, would be exhibited from a light-house recently erected on the northern shore of Hayatomo strait, Simonoseki strait :-

Danno ura light is a fixed white light, with a sector of green light, showing white from the bearing of S. 57°W., through north, to N. 41° E., green over the channel from N. 41° E. to N. 51° E., and is obscured in other directions. It is elevated 52 feet above the sea, and should be visible in clear weather from a distance of 6 miles.

The light-house, 44 feet high, is a hexagonal wooden structure, painted red and white in

horizontal bands.

Approximate position on Admiralty Charts, lat. 33° 58′ 25″ N., long. 130° 57′ 48″ E.

Note. - Danno ura light kept in line with Kanabuse beacon light (fixed white) leads through the fairway of Middle channel, between Middle ground (Nakanosu) red buoy and Tobigasu buoy.

#### GOYERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 143.

[Second Publication.]

JAPAN—YEZO ISLAND, EAST COAST.

Go Yo Mai channel-Sunken rocks south-westward of Odoke Shima.

With reference to Notice to Mariners No. 44, dated 25th April 1890, issued by this office, the British Admiralty has given further notice (No. 224 of 1893) of the existence of two sunken rocks south-westward of Odoke Shima, eastern side of Go Yo Mai channel—

A rock, with a depth of 2 fathoms on it, and deep water to the south-westward, lies with cape Noyshaf (Nosapp) light-house, bearing W. by N. 3 N., distant  $1_{10}^9$  miles; and Odoke Shima summit, N.E. 3 E.

Approximate position, lat. 48° 22′ 25" N., long. 145° 51′ 35" E.

(2) A rock, with a depth of two fathoms on it, and deep water to the south-westward, lies about  $1\frac{1}{3}$  cables north-north-west of rock No. 1, in a position with cape Noyshaf light-house, bearing W. by N.  $\frac{3}{6}$  N., distant  $1\frac{8}{10}$  miles, and Odoke Shims summit, N.E. by E.  $\frac{1}{6}$  E.

Note.—The vicinity of the rock reported by the Mutsu-maru, viz., with cape Noyshaf light-house, bearing N.W. by W. ½ W., distant 1% miles, was searched under favourable conditions by Japanese surveyors, depths of 15 to 16 tathoms being obtained in the position with 30 fathoms near, and no indication of a rock in the locality. The rock in this position has consequently been expunged from the Admiralty charts, as it is believed that the Mutsumaru touched on the above rocks south-westward of Odoke Shima.

#### NOTIFICATION.

#### The 27th June 1893.

• No. 53 Marine.—The following communication, No. 2160, dated the 20th June 1893, from the Government of Bombay, is published for general information.

C. W. Opling, Secy. to the Goot. of Bengal.

No. 2160, dated Bombay Castle, the 20th June 1893.

From-W. L. HARVEY, Esq., Under-Secy. to the Govt. of Bombay, General Dept., To-The Secretary to the Government of Bengal.

In continuation of my telegram of the 15th instant, I am directed to forward herewith, for the information of the Government of Bengal, copy of the Resolution of this Government, No. 2157 of to-day's date, and of the notification issued thereunder, regarding the enforcement of quarantine rules at Aden, Perim and the Somali coast against arrivals from all the ports of the Hedjaz and Yemen as far as Babelmandeb and from Bussorah, Fao and Muhamrah.

#### NOTIFICATION.

# GENERAL DEPARTMENT.

#### Bombay Castle, the 20th June 1893,

No. 2156.—The following telegram from the Political Resident, Persian Gulf, dated 16th instant, is published for general information:—

"Five days' quarantine imposed on arrivals from Bussorah."

Bombay Castle, the 20th June 1893.

No. 2157.—In exercise of the power conferred by Act I of 1870, the following Rules for Quarantine against Cholera have been made by the Government of Bombay with the previous sanction of the Governor-General in Council: they have effect from the 14th instant in the Ports of Aden, Perim, and the Somali Coast as a temporary measure:—

I.—The commander of every vessel, including buggalews or other native craft, arriving from the ports of the Hedjaz and Yemen as far as Babelmandeb, and from Bussorah, Fab and Muhamrah shall, before entering the harbour, indicate by signal the port from which such vessel has come.

Il.—Such commander shall not, except as hereinafter provided, allow any communication either with the pilot boat, except orally, or with the shore, or with any other vessel

or boat in the harbour.

III.—Immediately on arrival the commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vessel shall anchor at such place as may be pointed out by the Port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival, or for the shorter period prescribed in Rule IV, and undergo disinfection which should apply as well to crew, passengers, effects, and susceptible goods.

IV.—If the Health Officer of the Port has sufficient evidence that no cases of a suspicious nature have taken place on board during the voyage, and if the vessel is, besides, in good hygienic condition, the duration of the quarantine will be diminished according to the

following scale:-

Six days of quarantine. After eight days of voyage ditto Five ditto. Do. nine • • • Do. ten ditto Four ditto. . . . Three Do. eleven ditto ditto. ... Two ditto. Do. twelve ditto • • • Do. thirteen ditto and upwards Twenty-four hours of quarantine.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the

prohibitions provided for in Rule III.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the

spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be

subsequently removed by members of their crews.

IX.—All vessels arriving at Aden, Perim, and the Somali Coast, which may have communicated with vessels coming from the ports of the Hedjaz and Yemen as far as Babelmandeb and from Bussorah, Fao, and Muhamrah shall be subjected to the same quarantine as vessels arriving at Aden, Perim, and the Somali Coast from the ports of the Hedjaz and Yemen as far as Babelmandeb, and from Bussorah, Fao and Muhamrah.

X.—All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their bills-of-health.

By order of. His Excellency the Right Hon'ble the Governor in Council,

# CIVIL MEDICAL DEPARTMENT, BENGAL

• No. 6447, dated 21st June 1893.—Assistant Surgeon Amrito Lal Mozumdar •of the Serajgunge subdivision and dispensary is appointed to do supernumerary duty at the Medical College Hospital, Calcutta, until further orders.

# EDUCATION DEPARTMENT, BENGAL.

# Subordinate Educational Service.

The 20th June 1893.—Babu Madhu Sudan Rao, Head Master of the Ravenshaw Collegiate School, Cuttack (class V and officiating in class IV), is appointed to be Deputy Inspector of Schools, Balasore, vice Babu Rajendra Nath Banerjea, transferred.

Babu Rajendra Nath Banerja, B.A., Deputy Inspector of Schools, Balasore (class V), is appointed to be Head Master of the Raveushaw Collegiate School, Cuttack, vice Babu

Madhu Sudan Rao, transferred.

The 21st June 1893.—Babu Nilmani Bhattacharjea, a Sun-Inspector of Schools under the District Board of Birbhum (class VI), has been granted by the Board privilege leave of absence for one month, with effect from the 8th May 1898.

C. A. MARTIN,
Offg. Director of Public Instruction, Bengal.

#### NOTIFICATION.

In Government of Bengal Notification No. 9T.G., dated the 2nd May 1893, the public were informed that the University of London had acceded to the request of the Government of India that the Intermediate Examination in Arts and the B.A. Examination of that University may be held in Calcutta.

For the information of the general public it is hereby notified that the following is the

prescribed course of studies for each of those examinations:-

# INTERMEDIATE EXAMINATION.

Candidates shall be examined for a Pass or for Honours in each of the following subjects:—(1) Latin; (2) either the French or the German language; (3) English language, literature, and history; (4) mathematics; and for a Pass only in Greek.

Every candidate must state upon his Form of Entry whether he intends to compete for Honours in any subject or subjects; and if he does so intend, must specify the subject

or subjects.

No candidate will be allowed to take both the Pass and Honour papers in the same subject; but every candidate must take the l'ass papers in those subjects in which he does not offer himself for Honours.

# EXAMINATION FOR A PASS.

# CLASSICS.

#### THE LATIN LANGUAGE.

Two Latin subjects, one in prose, the other in verse; to be selected two years previously by the Senate from the works of the under-mentioned authors:1

Vergil ........The Eclogues; or two Books of the Georgies; or two Books of the Æneid.

Horace......The Odes and Epodes; or the Satires; or the Epistles.

Ovid ...... Fasti, two Books.

Cicero .......One of the Orations; or one Book from any of the Philosophical or Rhetorical Works.

Livy.....One Book.

Tacitus......One Book of either the Annals or the Histories.

#### HISTORY.

History of Rome to the Death of Augustus.

The papers in Latin and Roman History shall contain passages of the specified Author with simple passages of Latin from books not previously named, to be translated into English; short passages of English to be translated into Latin; and questions in Grammar History, and Geography.

GREEK.3

One Greek subject to be selected two years previously by the Senate from the works the under-mentioned authors, together with easy questions in Grammar:

Homer.....One Book.

### Aschylus.....

| Comparison of the Dramatists of these Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramatists of the Dramati

Herodotus ..... One of the shorter, or a portion of one of the longer Books.

Xenophon ..... One Book.

#### THE ENGLISH LANGUAGE, LITERATURE, AND HISTORY.

The Grammatical Structure of the Language: Composition. Other special subjects to be defined two years previously.

[Now-The Examination in History will be confined to a limited period to be prescribed in each year as eane of the special subjects; such period, as a rule, coinciding with the defined period of English Literature.]

The LATIN Subjects for 1894 will be—

* Tacitus, Histories, Book I.; Horace, Epistles (not including the Ars Poetica).

* Special stress is laid on accuracy in the Answers to the Grammar questions and on the correct rendering of English

Every candidate must take the Pass Paper in Greek; there is no Examination for Honours in this language.
The GREEK Subject for 1894 will be—
Herodotus, Book VIII.

The English Subjects for 1894 will be—
History of England from 1558 to 1603.
History of England from 1558 to 1603.
History of England from 1558 to 1603.
History of England from 1558 to 1603.

Chaucer: House of Fame, and Squire's Tale.
Spenser: View of the Present State of Ireland.
Shakespeare: King Henry V. and As you like it.
There will also be set for translation a simple passage of Middle English from an unnamed book.

#### THE FRENCH OR THE GERMAN LANGUAGE.

Translation into English, with questions in Grammar.

#### MATHEMATICS.

#### ARITHEMETIC.

The Ordinary Rules of Arithmetic.
Vulgar and Decimal Fractions.
The Rule of Three and its Applications. Simple and Compound Interest. Present Value, Discount and Annuities. Extraction of the Square Root.

#### Algeura-

The ordinary Rules of Algebra.

Reduction and Manipulation of Algebraical Fractions.

Ratio, Proportion, and Variation.

Permutations and Combinations. Arithmetical and Geometrical Progressions. Simple and Quadratic Equations. Determination of Common Factors. The Theory of Indices. The nature and use of Logarithms.

#### GEOMETRY.

The Relations and Properties of Similar Rectilinear Figures.

The Elementary Properties of the Plane, including those of the Angles made by Planes with Right Lines and with each other.

The Elementary Properties of the Sphere, including those of the Great and Small Circles on the Surfaces of Spheres.

The Mensuration of the Simpler Plane and Solid Figures, including that of the Circle, the Sphere, the Cylinder, and the Cone.

Elements of Co-ordinate Geometry, in Rectangular and Polar Co-ordinates, as far as the Equations and Properties of the Right Line and Circle.

#### TRIGONOMETRY.

The different Measurements of Angles, and the Ordinary Relations of their Trigonometrical Ratios.

The Elementary Formulæ connecting the Trigonometrical Ratios of two or more Angles.

The solution of the several cases of Plane Triangles, including the determination of

The determination of the Heights and Distances of Inaccessible Objects.

Candidates shall not be approved by the Examiners unless they have shown a competent knowledge in

> Latin and Roman History; 1.

2.

Greek; Either the French or the German Language: 3.

4. English Language, Literature and History;

Mathematics.2

# EXAMINATION FOR HONOURS.

· Any Candidate who presents himself at the Intermediate Examination in Arts for examination may be examined for Honours in (1) Latin, (2) English, (3) French, (4) German, and (5) Mathematics.

Candidates for Honours in LATIN shall be examined in the following subjects3:-

THE LATIN LANGUAGE.

Terence.....Andria; Adelphi. Catullus ... Clarendon Press Selections. Vergil. Horace. Juvenal .....Satires I., III., VII. Cicero......Pro Murena; Pro Cluentio; Philippies I., II.; De Oratore; Ad Atticum I. to IV.
Livy .....XXII., XXIII. Tacitus ..... Annals I. and II.

¹ Pass candidates can obtain credit for only One of these Languages.

² For a complete Time-table of the Examination see pages

³ The List of Honours Subjects will be revised at intervals of five years. The next Revised List will be published in 1894 and will take effect in 1896.

# Composition in Latin and English.

Latin Prose. Translation: Retranslation.

Analysis of any of the subjects selected for examination; Original Composition upon questions arising out of the Classical Authors selected for examination.

The Papers in Latin shall contain passages of the ancient Authors to be translated into English, and passages of English to be translated into Latin. The papers shall also contain questions in Grammar, History, and Geography.

For this Examination four Papers shall be set; of which two shall be given on the first day of the Examination (at the same times as the Pass Papers in Latin), and the other

two on Friday in the same week.

Candidates for Honours in English shall be examined in the Elements of Anglo-Saxon Grammar, in subjects to be defined two years previously, and in original Composition upon questions arising out of the Authors selected for examination.

For this Examination four Papers shall be set; of which two shall be given on Wednesday in the first week of the Examination (at the same times as the Pass Papers in English),

and the other two on Monday in the following week

For the Examination for Honours in French two Papers shall be set; of which one shall be given on the afternoon of Tuesday in the first week of the Examination (at the same time as the Pass Paper in French), and the other on the morning of Tuesday in the following week.

For the Examination for Honours in German two Papers shall be set; which shall be given on the morning and afternoon of Wednesday in the week following that in which the

Examination commences.2

Candidates for Honours in MATHEMATICS shall be examined in the following subjects:-

Algebra. Theory of Equations. Plane Trigonometry. Spherical Trigonometry

Pure and Co-ordinate Geometry of two Dimensions, up to and including the properties of the Conic Sections.

Differential Calculus.

Integral Calculus.

Statics of Material Particles, of Rigid Bodies, of Flexible Cords, and of Elastic Beams.

Kinetics of Material Particles.

Hydrostatics of Gravitating Fluids.

For this Examination four Papers shall be set; of which two shall be given on Thursday in the first week of the Examination (at the same times as the Pass Papers in Mathematics), and the other two on Thursday in the following week.

The Examination shall be conducted in the following order :-

	Pass.	Honours.
Mon	TDAY.	•
	Moining, 10 to 1 Latin	Latin. Latin.
<b>D</b> UE:	SDAY	
	Morning, 10 to 1. Greek.	
	Afternoon, 2 to 5. {French German}	French.
WEI	DNESDAY.	
	Morning, 10 to 1. English Language and Literature	English. English.
Thu	RSDAY.	4,
	Morning, 10 to 1. Arithmetic and Algebra	Mathematics.
FRID		
	Morning, 10 to 1.  Afternoon, 2 to 5.	Latin. Latin.

¹ The I

The Pass Subjects; and in addition:
History of England from 1603 to 1625.
History of England Interactive during the same period.
Succet: Anglo-Saxon Primer. (Clarendon Press.)
Bacon: Advancement of Learning.
Shakespeare: King Lear and Cymbeline.
There will also be set for translation a simple passage of Anglo-Saxon Prose from an unnamed book.

2 Candidates for this Examination will not be allowed to take the Pass Paper in German.

#### TONOTIDE

•
English.
French.
•
German.
German.
•
Mathematics.
MathematicsMathematics.

#### B.A. EXAMINATION.

Candidates shall be examined in the following Branches of Knowledge; Branches I., II., and III. being compulsory, but an option being allowed between Branch IV. and Branch V.1:-

Latin with Roman History (Two Papers).

Greek, with Grecian History (Two Papers).

III. One of the following Languages: - English, French, German, Italian, Arabic, Sanskrit. (Two Papers in each.)
Either Pure Mathematics, or Mixed Mathematics. (Two Papers in each.)

Mental and Moral Science (Two Papers).

#### I. LATIN.

The Latin Language; with Grammar, History and Geography, as follows:a) Two subjects, one in Prose the other in Verse, to be selected two years previously by the Senate from the works of the following authors2:-

Cicero...One of the Orations, or one Book from any of the Philosophical or Rhetorical works, or one Book from the Letters.

Liry.....One Book.

Tacitus...One Book of either the Annals or the Histories.

Veryil ... The Eclogues and two Books of the Georgies, or the Georgies, or four Books of the Æneid.

Horace...The Odes or Epodes, with one Book of the Satires or Epistles.

Terence...One Play.

Juvenal. Two (or three) Satires.

(b) Questions in Grammar; with passages for Translation into English from Books not previously named, and passages of English to be translated into Latin.

Note. - Special stress is laid on this part of the Examination.

· (c) Outlines of Roman History to the Death of Domitian, with a special knowledge of some limited period of political and literary history to be announced two years previously 3; and Geography.

#### II. GREEK.

The Greek Language; with Grammar, History, and Geography as follows:-

(a) Two Subjects, one in Prose the other in Verse, to be selected two years previously by the Senate from the works of the following authors4:-

> Herodotus .....One Book. Thicydides ..... One Book.

Xenophon ..... I'wo Books from any of his larger works, or the Occomomics, or the Hiero and Agesilaus.

Demosthenes...One of the longer or three of the shorter Public Orations; er two of the Private Orations.

Isocrates .....One Oration.

Lysias.....Two Orations.

Plato ......Apology of Socrates, and Crito; or one of the longer and two of shorter Dialogues.

Candidates will be required to mention the Optional subjects they select. If Italian, Arabic, or Sanskrit be selected,

Two Calendor Months' Extra Notice must be given.

The LATIN Subjects for 1894 will be—
Ciesro, Ad Atticum, Book IV.; Terence, Phormic.

The Periods of Roman History for 1894 will be—
From the Death of Sulia to the Battle of Philippi.

The GREEK Subjects for 1894 will be—
Aristophanes, Vespee (Holden's or any other expurgated text); Demosthenes, Adv. Leptinem.

U 74315

Homer .....Six Books.

Sophocles ... One or two Plays, to be selected from the works of these Dramatists. Euripides

Aristophanes Questions in Grammar, and passages for Translation into English from Books not previously named.

Note.—Special stress is laid on this part of the Examination.

(c) Outlines of Greek History to the Death of Alexander, with a special knowledge of some limited period of political and literary history to be announced two years previously1:. and Geography.

## III. ENGLISH, FRENCH, GERMAN, ITALIAN, ARABIC,

#### SANSKRIT.2

THE ENGLISH LANGUAGE AND LITERATURE.

History, structure, and development of the English Language.

Anglo-Saxon Grammar and Translation.

Other Special Subjects to be defined from time to time.3

THE FRENCH, THE GERMAN, OR THE ITALIAN LANGUAGE.

Translation, Retranslation, and Grammar.

THE ABABIC OR THE SANSKRIT LANGUAGE.4

Translation from Arabic or Sanskrit into English, with questions in Grammar.

#### IV. MATHEMATICS.5

#### (a) PURE MATHEMATICS.

The Subjects prescribed for the Intermediate Pass Examination; (See page 2) with the addition of the following:-

#### ALGEBRA.

Theory of Indices, Radicals, and Surds. Theory of Imaginary Quantities. Binomial Theorem and its applications.

Theory of Logarithms and Exponentials.

De Moivre's Theorem, and its applications. Ordinary Formulæ connecting the sides and Angles of Spherical Triangles.

Solution of the several cases of Spherical Triangles, including the determination of their Areas.

#### GEOMETRY.

Theory of Harmonic Section and its Applications.

Central and Focal Properties of Conics, by Pure and by Co-ordinate Geometry.

Theory of Poles and Polars with respect to Conics.

#### (b) MIXED MATHEMATICS.

#### DYNAMICS.

Composition, Resolution, and Equilibrium of Forces acting at a Point. Composition, Resolution, and Equilibrium of Forces acting in a Plane. Composition, Resolution, and Equilibrium of Forces acting in Parallel lines.

Centres of Gravity of Rigid Bodies.

The Mechanical Powers.

Nature, Intensity, and Transmission of Pressure in Liquids. Pressure of Liquids in Equilibrium under the action of Gravity.

Equilibrium of Solids floating or immersed in Gravitating Liquids.

Specific Gravities of Substances, Solid and Liquid.

•Measures of velocity, Acceleration and Force.

Acceleration of Masses under the action of Forces.

The Periods of Greek History for 1894 will be—
From 404 B.C. to 338 B.C.

Candidates can obtain credit for only One of these Languages.

The English Subjects for 1894 will be—
History of English Literature from 1360 to 1400.
Sneet: Anglo-Saxon Reader, Extracts XV.—XX., with Grammatical Introduction.
Barbour: Brus, Books I. to VI. inclusive. (Early English Text Society, Extra Series.*)
Chancer: The Tale of Melibeus, and the Parson's Tale.
William Morris: Jason.
There will also be set for translation a simple passage of Anglo-Saxon Prose from an unmamed book.

See the First Note on page four.

Candidates chossing Mathematics can obtain credit for only One of the two divisions of the subject.

Undergraduates only may obtain this book at a greatly reduced price on individual application to the Seciety's Printers, Mesers Clay & Sons. Bungay, Suffolk.

The Laws of Rectilinear Motion.

Rectilinear Motion of Particles under the action of Gravity. Composition and Resolution of Velocities and Accelerations.

Free Motion of Projectiles under the action of Gravity.
Circular Motion of Particles, Harmonic Vibrations and Centrifugal Force.

Vibrations of Simple Pendulums in small Circular Arcs.

Theory of Dynamical Work, Energy of Position, and Energy of Motion.

#### ASTRONOMY.1

Points of Lines, Planes, and Circles of the Celestial Sphere. Phenomena depending on the Earth's Rotation round its axis. Phenomena depending on the Earth's Revolution round the Sun. Phenomena depending on Change of Place on the Surface of the Earth. Determination of Time and Place on the Surface of the Earth. Determination of the Magnitude and of the Figure of the Earth. Determination of the Distances of the Moon, Sun, and Planets. Kepler's Laws of Planetary Motion, and their Consequences. Refraction and Aberration, as affecting Astronomical Observation.

#### V. MENTAL AND MORAL SCIENCE.2

#### Psychology.

Scope and Method. General Analysis and Classification of Mental facts. Consciousness; Self-conscious: Attention.

Sensation and Movement. The Senses. Sense-perception.

Representative Imagination; Memory; Expectation. Laws of Association.

Fundamental process of Intellect.

Abstraction and Generalization; Conception, Judgment, and Reasoning. Language as expressive of Thought, Intellectual Construction.

Feeling and its expression. Pleasure and Pain. Emotions and their classification.

Action, Instinctive and Voluntary. Appetite and Desire. Motives; Deliberation; Choice; Freedom of Will.

Belief and Knowledge. Self and External World. Relations of Mind and Body.

First Principles and Laws of Thought. Logical use of Language. Terms; Categories and Predicables. Formal Division and Definition.

Propositions and their import. Forms of Immediate Inference.
Syllogism and other varieties of Formal Reasoning. Fallacies.
Functions of Syllogism; Trains of Reasoning; Demonstration and Necessary

Relation of Induction to Deduction; Ground of Induction; Causation; Analogy. Observation and Experiment; Experimental Methods; Deductive Method; Explana-

tion, Hypothesis; Chance and Probability. Naming, Definition, and Classification in Science.

Springs of Human Action and their mutual relation. The Moral Faculty.

The Good or ultimate End of Action. Moral Obligation. Standards of Right and
Wrong. Sanctions of Morality. The Individual and Society.

Duties and Virtues.

The Examination shall be conducted in the following order :-

Morning, 10 to 1. Afternoon, 2 to 5. Latin and Roman History.

Morning, 10° to 1. Afternoon, 2 to 5. Greek and Greeian History.

WEDN SDAY.

Morning, 10 to 1.

Afternoon, 2 to 5.

Mathematics, or Mental and Moral Science.

#### · THURSDAY.

Morning, 10 to 1. The Languages specified under Branch III.

Afternoon, 2 to 5.

A copy of the Government of Bengal notification No. 9T.G., dated the znd May 1893,

is printed below for ready reference:-

The University of Loudon has acceded to the request of the Government of India that the Intermediate Examination in Arts and the B.A. Examination of the University may be held in Calcutta. These examinations begin each year on the third Monday in July and the fourth Monday in October respectively.

¹ A knowledge of Spherical Geometry, but not of the Trigonometrical formulæ for the solution of spherical Triangles, will

be required.

The questions in Mental and Moral Science will have no special reference to the writings of any one author
The questions in Mental and Moral Science will have no special reference to the writings of any one author
or school of authors. In matters of opinion Answers will be judged according to their accuracy of shought and

2. As it is necessary that applications for permission to appear at these examinations should reach the University of London four mouths before the date of the examination, candidates for examination must submit their applications to the Director of Public Institution in the first week of January for the Intermediate Examination, and in the first week of

April for the Bachelor's Degree Examination.

3. For each examination a fee of £5 (five pounds sterling) will be charged. Each applicant will be required to remit in the first week of June for the Intermediate Examination, and in the first week of September for the Bachelor's Degree Examination, the sum of Rs. 100 (one hundred rupees) to the Director of Public Instruction either by money-order or by a note or notes for that amount in a cover registered and insured, or to pay the said amount in person to the Director. The £5 (five pounds sterling) fee will subsequently be paid by Government to the University, and the difference between the sum of one hundred rupees and the equivalent of five pounds sterling at the current rate of exchange for postal money-orders, or such rate as may hereafter be determined, will be returned to the candidate.

DARJEBLING,

C. A. MARTIN, LL.D.,

The 7th June 1893.

Offg. Director of Public Instruction, Bengal.

Orders by the Vice-Chancellor and Syndicate of the Calcutta University.

1. The following revised lists of text-books have been prescribed for the Law Examinations of 1895:-

#### B.L. EXAMINATION, 1895.

- 1. The Principles of Jurisprudence; the History and Constitution of the Courts of Law and Legislative Authorities in India.
- 2. The Law relating to Persons in their Public and Private Capacities, including the Law of Testamentary Succession.

3. The Law of Property, including the Law relating to Land Tenures and the Revenue Laws.

4. The Law of Property, including the Laws of Transfer, Prescription, and Pre-emption.

The Law of Contracts and Torts.

Maine's Ancient Law; Markby's Elements of Law (third edition); Student's Austin's Jurisprudense by Campbell, omitting Parts IN and III; Cowell's Tagore Law Lectures, 1872.

Stephen's Blackstone, Book I, Book III, Chapters 1—4, Book IV, Part I, Chapters 2 and 6; Act IX of 1875 (Majority); Act VIII of 1890 (Guardians and Wards); Act IX of 1879 (B.C.), Parts I, II, and VII; Act III of 1881 (B.C.) (Court of Wards); Act III of 1872 (Civil Marriage); Act X of 1865 (Succession Act), except Parts III—V, XXX, XXXI, and XXXV—XL; Act XXI of 1870 (Hindu Wills Act), except the portions of the Indian Succession Act omitted from the study of the Act; Act V of 1881 (Probate); Act VII of 1889 (Succession Certificate); Mayne's Hindu Law and Usage, Chapter XI (Wills); Ameer Ali's Students' Manual of Mahomedan Law, Part II, Chapter III (Wills).

homedan Law, Part II, Chapter III (Wills).

Stephen's Blackstone, Book II, Introduction, and Part I, Chapters 3—9, 15, 16, 20, and 23, and Book II, Part II, Cuapters 1, 2, and 4; Regulations I, VIII, XIX (Sections 1—7), and XXXVII (Sections 1—6, 10, 12, 15) of 1793; Regulation VIII of 1819; Regulation XI of 1825; Act XI of 1850, omitting Sections 4, 16, 40—52, and 56—62; Act VII of 1880 (B.C.); Act VIII of 1885, omitting Sections 2, 31—36, 39, 56—60, 62—64, 69—71, 76—83, 93—158, and 186—196; Act VIII of 1876 (B.C.), Sections 8—16, 87—98; Act IV of 1893 (Partition Act).

Act IV of 1893 (Partition Act).

Act IV of 1882 (Transfer of Property Act);
Act III of 1877 (Registration Act), Part I, Section 3, Parts III, IV, VI, X and XII. # Orders and Hotifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following orders, issued by the Government of India in the Finance and Commerce Department, are republished for general information.

H. J. S. Cotton, Chief Secy. to the Gort. of Bengal.

#### NOTIFICATION.

ACCOUNTS AND FINANCE. Simla, the 26th June 1893.

No. 2062.—The Governor-General in Council hereby announces that until further orders gold coin or gold bullion will be received by the Masters of Her Majesty's Mints at Calcutta and Bombay, respectively, in exchange for Government rupees, at the rate of 7:53344 grains troy of fine gold for one rupee, on the following conditions:—

1. Such coin or bullion must be fit for coinage.

2. The quantity tendered at one time must not be less than fifty tolas.

3. A charge of one-fourth per mille will be made on all gold coin or gold bullion which

is melted or cut so as to render the same fit for receipt into the Mint.

4. The Mint Master, on receipt of gold coin or bullion into the Mint, shall grant to the proprietor a receipt which shall entitle him to a certificate from the Mint and Assay Maters for the amount of rupees to be given in exchange for such coin or bullion, payable at the General (Reserve) Treasury, Calcutta or Bombay. Such certificates shall be payable at the General Treasury after such lapse of time from the issue thereof as the Comptroller General may fix from time to time.

No. 2063.—In supersession of the notification by the Government of India in the Financial Department, No. 3287, dated the 28th October 1868, which is hereby cancelled, the Governor-General in Council is pleased to direct that from and after the date of this notification sovereigns and half-sovereigns coined at any authorised Royal Mint in England or Australia, of current weight, shall be received in all the Treasuries of British India and its dependencies in payment of sums due to the Government, as the equivalent of fifteen

rupees and of seven rupees and eight annas respectively.

No. 2064.—In exercise of the powers conferred by the Indian Paper Currency Act, 1882, as amended by the Indian Coinage and Paper Currency Act, 1893, and of all other powers enabling him in this behalf, the Governor General in Council is pleased to direct that Currency Notes shall be issued by the Head Commissioner of Paper Currency, Calcutta, or by the Commissioner of Paper Currency, Bombay, on the requisition of the Comptroller-General, in exchange for gold coin or gold bullion, at the rate of one Government Rupee for 7.53344 grains troy of fine gold.

Sovereigns and half-sovereigns coined at any authorized Royal Mint in England or Australia, of current weight, shall be taken as the equivalent of fifteen rupees and of seven

rupees and eight annas respectively.

By order of the Governor-General in Council,

J. F. FINLAY, Secy. to the Govt. of India. The following orders, issued by the Government of India in the Home Department, are republished for general information.

#### The 23rd June 1883.

No. 103.—The following Rules for Quarantine against cholers, which have been made by the Bombay Government in exercise of the power conferred by section I, Act I of 1870, with the previous sanction of the Governor-General in Council, are published for general information.

The Rules have effect from the 9th June 1893, as a temporary measure, in the ports of Aden, Perim, and the Somáli Coast:—

I.—The Commander of every vessel, including buggalows or other native craft arriving from Arabian ports shall, before entering the harbour, indicate by signal the port from which such vessel has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any

other vessel or boat in the harbour.

III.—Immediately on arrival the Commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vessel shall anchor at such place as may be pointed out by the Port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival or for the shorter period prescribed in Rule IV and undergo disinfection, which should apply as well to crew, passengers, effects, and susceptible goods.

IV.—If the Health Officer of the Port has sufficient evidence that no cases of a suspicious nature have taken place on board during the voyage, and if the vessel is besides in good hygienic condition, the duration of the quarantine will be

diminished according to the following scale:

After eight days of voyage
Do. nine ditto
Do. ten ditto
Do. eleven ditto
Do. twelve ditto
Do. thirteen ditto and upwards

Six days of quarantine.
Five ditto.
Four ditto.
Three ditto.
Two ditto.
Twenty-four hours of quarantine.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule III.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to

prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

1X.—All vessels arriving at Aden, Perim, and the Somáli Coast which may have communicated with vessels coming from Arabian ports shall be subjected to the same quarantine as vessels arriving at Aden, Perim, and the Somáli Coast from Arabian ports.

X.—All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their bills of health.

C. J. LYALL, Secy. to the Goot. of India.

The following order, issued by the Government of India in the Military Department, is republished for general information.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly pirts, published as soon as possible after the first of each month at Calcutta, Madras Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a thard for the Bondbay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta, Series.

vinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

#### SCHEDULE.

An Act for the licensing of Warehouses and the maintenance of a Fire-brigade:

WHEREAS it is expedient to make provision for the licensing of Warehouses and the maintenance of a Fire-brigade; It is hereby enacted as follows:—

#### CHAPTER I.

#### Preliminary.

Title, application and called the Licensed Warehouse and Fire-brigade Act, 1893.

- (2) It applies to Calcutta, as defined by the Calcutta Municipal Consolidation Act, 1888, and to such portions of the Suburbs thereof as are for the time being subject to the operation of Bengal Act II of 1866; also to the municipality of Howrah and to any other municipality in the neighbourhood of Calcutta or Howrah, to which its provisions may be extended by an order of the Local Government to be published in the Calcutta Gazette.
- (3) It shall come into force from the date on which it may be published in the Calcutta Gazette, with the assent of the Governor General.

Ropeal. 2. (1) Act IV of 1883 is hereby repealed:

(2) But all rules, orders, declarations, financial arrangements and appointments made under the said Act and which are now in force, shall be deemed to have been made under this Act, so far as they are not inconsistent with the provisions thereof.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

- (1) "basti land" means land which, the owner lets out for the building of huts, in such manner that the tenant of the land is the owner of the hut: And "hut" includes any structure erected on such land, whether roofed with tiles or otherwise, and whether constructed with bricks, earth or other materials.
  - (2) "cotton" means loose raw cotton:
- (3) "jute" means raw jute, either loose or in drums, and loose jute-cuttings and rejections:
- (4) "Magistrate" means and includes a Presidency Magistrate and a Magistrate of the first class:
- (5) "person" includes an undivided Hindu family, a firm or company, or association of individuals whether incorporated or not:
- (6) "The Commissioner of Police" means the officer vested with the administration of police in the town of Calcutta under the Calcutta Police Act, 1866, and any Act amending the same:

- (7) "The Commissioners" mean, in respect of Calcutts, the Corporation of Calcutts; and in respect of Howrah and the other municipalities to which this Act applies or may hereafter be extended, the Municipal Commissioners of each of the municipalities concerned:
- (8) "warehouse" means any building or place used for the storing, or pressing, or keeping of jute, cotton, resin, varnish, pitch, tar, hay, straw, rags, tallow, wood or other inflammable substance or thing for the time being subject to the operation of this Act.

#### CHAPTER II.

#### Licensed Warehouses.

- 4. From and after the commencement of this Act, no building or place shall be used as a ware
  Warehouse not to be sed till licensed.

  Warehouse not to be occupier thereof shall have previously obtained a license from the Commissioners for such use under this Act.
- 5. The corner or occupier of any building or place for which there is in existence at the commissioners of previously building or place.

  License of previously building or place.

  License of previously building or place.

  Jute Warehouse and Fire-brigade Act of 1872 or 1879, or the Licensed Warehouse and Fire-brigade Act of 1888, shall, upon application in writing to the Chairman of the Commissioners, be entitled to obtain a license from the Commissioners therefor as a warehouse under this Act, subject to the payment to the Commissioners of such annual fee as is hereinafter provided,
- 6. Any person proposing to use any building or place as a warehouse within the area to which this Act applies or may hereafter be extended, and who, at the commencement of this Act, does not hold such license under any of the said aforementioned previous Acts, shall, with his application for a license therefor, send to the Chairman of the Commissioners a plan in duplicate of such building or place prepared on a scale-of 8 feet to the inch, and showing—
  - (a) the boundaries of such building or place;
  - (b) the position of the engines and furnaces used or proposed to be used in the "warehouse;
  - . (c) the space, if any, which has been reserved for the loading and unloading of carts thereat:

and thereupon it shall be within the discretion of the Chairman of the Commissioners to grant a license from the Commissioners therefor as a warehouse under this Act, subject to the payment to the Commissioners of such annual fee as is fereinafter provided, or to refuse a license for the same:

Provided that when a license is refused, the reason for such refusal shall be recorded in writing.

- 7. Every application for a license under the last preceding section shall be disposed of within thirty days from the date of its being received
- Period for disposal of application for liconso.

  Description of the Chairman of the Commissioners, and if not disposed of within that period, the applicant shall not he liable to any penalties under this Act for the use, after the expiration of the said period of thirty days, of the building or place as a warehouse in respect of which such application shall have been made, so long as such application is not finally refused by an order in writing under the hand of the Chairman of the Commissioners setting forth the grounds for such refusal.
- 8. Licenses under section six of this Act may be granted either permanently or for such term of

  Term and conditions years as the Chairman of of license. the Commissioners shall think fit, and shall be subject to the following conditions, namely:—
  - (1) that the warehouse shall at all times be open to the inspection of an officer appointed by the Commissioner of Police. Such officer shall be a member of the Fire-brigade, but shall not be a member of any Police Force:
  - (2) that the annual fee imposed in respect thereof be paid as in that case made and provided.
- 9. (1) With the consent of the Chairman of the Commissioners, any special Committee of the Special Commissioners, any special Commissioners, not less than three or more than five in number whom the Commissioners in meeting shall in that behalf appoint, may exercise all or any of the powers and discretion under this Act vested in the Chairman of the Commissioners.
- (2) The proceedings of such Committee shall not be submitted to the Commissioners in meeting or be subject to revision by them.
- Annual fee of license. license shall not exceed ten per centum per anuum on the annual value of the warehouse as it is assessed to the payment of the municipal taxes, less ten per centum on the outlay incurred in respect of the means and appliances, therein or appertaining thereto, for preventing or extinguishing fire:

Provided that the annual fee payable by any owner or occupier in respect of any license shall not exceed seven hundred and fifty rupecs, and that the estimated total annual amount to be derived from such fees shall not exceed fifty rupees per centum of the amount required to meet the cost of the fire-brigade, as shown in the budget mentioned in section twenty-six of this Act:

Provided also that the owner or occupier of adjacent warehouses and the godowns, yards or compounds auxiliary to such warehouses shall not be bound to take out more than one license in respect of such warehouses, godowns, yards and compounds.

Change in occupation of warehouse to be notified.

within two weeks of his so entering into occupation, give notice in writing to the Chairman of the

Commissioners of such change of occupation, and shall thereupon pay to the Commissioners a fee of five rupees; and his name shall accordingly be substituted in the license in respect of such warehouse for the name of the last occupier.

Chairman may apply to missioners receives credible information that any of the conditions, to which the license of any warehouse shall be subject, has been broken by the holder thereof, he may apply in writing, setting forth the substance of such information, to a Magistrate for the issue of a summons upon the holder of the license to show cause why such license should not be cancelled or suspended, and may also apply to such Magistrate to suspend in the meantime such license pending the hearing of the case.

(2) The Magistrate shall not make an order suspending such license unless he is satisfied that it is necessary to prevent or obviate immediate

danger or injury of a serious kind.

(3) The summons issued under this section shall be served upon the said holder of the license named therein in the manner provided in the Code of Criminal Procedure, 1882, for the service of summons.

13. The Magistrate, before whom the case instituted under the last preceding section is brought on for disposal, may, if after taking evidence he be satisfied that there exist reasonable

Magistrate may cancel er suspend license.

and proper grounds for cancelling or suspending the license, cancel such license or may order the same, for such time as he may think fit, to be suspended; and may impose such conditions as to the reversal of such order of cancelment or suspension as may be consistent with the provisions of this Act, for the grant of a license for a warehouse.

#### CHAPTER III.

#### Penalties.

14. Any person who, without taking out a license, uses any building or place as a warehouse shall be liable, on conviction before a Magistrate, to a penalty not exceeding fifty rupees for each day during which he may so use or continue to use such warehouse.

Penalty for using warehouse in respect of which a license has been refused, or after the license in respect thereof shall have been cancelled, or during the time for which such license shall have been suspended, shall be liable, on conviction before a Magistrate, to a penalty not exceeding the to a further penalty not exceeding fifty rupees for every day during which any such warehouse may be so used as aforesaid.

Ponalty for breach conditions of license.

#### CHAPTER IV.

#### Funds.

23. The Commissioners shall pay to the Commissioner of Police cost of fire-brigade.

Commissioner of Police half-yearly, in the months of May and November, such sums as are required to meet the cost of the fire-brigade as appear in the budget of the Commissioner of Police, and in such proportion, respectively, as the Local Government shall, from time to time, prescribe.

24 The Commissioners shall rateably impose the annual fees payable for licenses under section ten of this Act upon Cost of fire-brigade how all warehouses, and shall appropriate towards the cost of the fire-brigade the amount derived from such annual fees, and all penalties and fines Imposed and all rates levied under this Act.

25. (1) The Commissioners may, for the purlates may also be levied to provide for cost of fire-brigade, levy the following rates:-

(g) a rate not exceeding two and a half per centum on the annual value, as it is assessed to the payment of municipal taxes, on any building or place used for the storage of any other inflammable substance or thing not specifically mentioned in clause (8) of section three of this Act, which the Local Gownment may, by a notification to be published in the Calcutta Gazette, declare to be liable for the payment of such rate:

Provided that the rate payable by any owner or occupier in respect of any building or place under this clause shall not exceed one hundred rupees;

- (b) a rate not exceeding one-half per centum on the annual value, as it is assessed to the payment of municipal taxes, on all basti lands with the huts, if any, upon them;
- (c) a general rate not exceeding one-eighth per centum on the annual value of all houses and lands assessed under the provisions of the Bengal Municipal Act, 1884, and the Calcutta Municipal Consolidation Act, 1888.
- Any building or place in respect of which a license has been granted under this Act as a warehouse, or which has been assessed under clause (a), and any basti land assessed under clause (b), shall be exempt from further assessment under clause (c).
- (1) The Commissioner of Police shall · prepare annually in or before the month of February a budget or estimate of the receipts

and expenditure of the firebudget or estimate of recoipts and expenditure of fire-brigade.

budget or estimate of recoipts and expenditure of fire-brigade.

capelulture of the fire-brigade for the year commencing on the 1st of April next ensuing Commissioner of Police

tinguish in the receipts of such budget the proportionate sums to be contributed by the several municipalities to which this Act extends or shall hereafter be extended; and shall also show any befance of receipts remaining unexpended, after providing for any legitimate charge against the funds of the fire-brigade, and in like manner, if there be a deficit, shall show such deficit at the close of the previous year: and such credit or debit balances shall be taken into account by the Local Government in fixing the sum to be annually contributed by the municipalities concerped under this Act.

(2) Such budget shall be laid before the Commissioners at a meeting, and shall be forwarded by them to the Local Government with such remarks as they shall think fit to record; and it shall be within the discretion of the Local occasion of any alarm of fire;

Government to pass, modify or reject the estimates of all or any sums entered in such budget.

27. Any sum standing at the credit of the Jute Warehouse Fund of the municipalities abovenamed, or at the credit

Sums to be appropriated as an asset of fire-brigade fund.

of any fund appropriated to the maintenance of the fire brigado under the pro-

visions of Act IV of 1883 at the time when this Act comes into force, shall be appropriated as an asset of the Fire-brigade Fund under this Act.

28. The provisions of the Bengal Municipal Act, 1884, and the Calcutta Municipal Conso-Mode of recovery of rates levied under section to the recovery of section to the recovery of rates levied under those Acts. respectively, shall, so far as they are consistent with this Act, apply to the recovery of rates levied

under section twenty-five of this Act: Provided that the rates levied under this Act in Calcutta shall be included with the four rates mentioned in section one hundred and one of the Calcutta Municipal Consolidation Act, 1888,

as one consolidated rate.

29. The Local Government may fix the proportionate liability for the cost of the fire-brigade

Local Government to fix proportionate liability for cost of fire-brigade to be borne by Commisto be borne by the Commissioners of the municipalities to which this Act applies or may hereafter be extended,

and may from time to time alter the proportions in which the Commissioners of any or all the municipalities, for the time being subject to the operation of this Act, are liable for the payment of the said sum.

#### CHAPTER V.

#### Fire-brigade.

The Commissioner of Police shall main-30. tain an efficient fire-brigade Commissioner of Police for the municipalities or to maintain fire-brigade for municipalities. such portions thereof that are for the time being subject to the operation of this Act.

31. (1) The Local Government may from time to time make, and when Power of Local Governmade alter or repeal, such ment to make orders with respect to fire-brigade. general or special orders as

it may think fit-

for appointing or removing any member or officer of the force;

for furnishing the fire-brigade with such fireengines, fire-escapes, horses, accoutrements, equipments, tools and implements, as it may think proper;

for building or providing stations, or hiring places for the keeping of the force, engines, horses and appurtenances;

for giving gratuities to persons who have given notice of fires, and to those who have rendered effective service to the brigade on the occasion

for the training, discipline, good conduct, salaries and pensions of the members of the

for the speedy attendance of such members with engines and all necessary implements on the for sending the force, engines and appurtenances beyond the limits of the area to which this Act extends, in order to extinguish fire in the neighbourhood of the said limits;

for imposing and summarily realizing a fine not exceeding one week's wages from any member of the brigade who may infringe these orders, and,

generally, for the maintenance of the firebrigade in a due state of efficiency.

(2) Such orders shall be published in the Calcutta Gazette and shall take effect from the date of such publication.

- 32. (1) On the occasion of a fire, the Commissioner of Police, &c., may exercise certain nowers on occasion of a fire, the Commissioner of Deputy Commissioner of Police, or the Chief or other Officer in charge of the fire-brigade on the spot, may—
- (a) remove, or may order any member of the brigade to remove, any persons who by their presence interfere with the due operations of the brigade;
- (b) by himself or by his men break into or through, or pull down, any premises for the purpose of putting an end to the fire, doing as little damage as possible;
- (c) cause the mains and pipes of any district to be shut off, so as to give greater pressure of water in the place where the fire has occurred;
- (d) call on the officer in charge of the Port Commissioners' fire-engine to render such assistance as may be possible, in the case of any fire occurring near the river bank, and,
- (e) generally, take such measures as may appear necessary for the preservation of life and property.
- (2) The Commissioner or Deputy Commissioner of Police, or the Chief Officer on the spot in charge of the brigade, may verbally nominate and depute one or more officers of the brigade to act at a distance; and such officer or officers shall have for the time being the like powers as the chief officer himself possesses under this section.
- 33. Police Officers of all grades shall be Police officers to aid firebrigade in execution of its duties. They may close any street in or near which a fire is burning, and they may, of their own motion or on the request of the Chief or other Officer of the fire-brigade, remove any persons who interfere by their presence with the operations of the fire-brigade.
- 34. No officer of the police or of the firebrigade shall be held liable to damages on account of any act done by him in the bond fide belief that such act was required in the proper execution of his daties.
- 85. (1) In the case of any fire occurring within the area to which this Act applies, the chief officer of the fire-brigade shall ascertain the facts as to the origin and cause of such fire, and shall make a report the place in which such fire shall have occurred; and

the said Magistrate, in any case where he may see

fit, shall summon witnesses and take evidence in order to the further ascertainment of such facts.

(2) Copies of all reports and of all evidence recorded under this section shall be furnished on application to any Fire Assurance Company or other person interested, on payment of the fees payable for the copies of judicial proceed; ings.

## CHAPTER VI. Fireworks, &c.

- 36. (1) Whoever within the area to which Penalty for letting off rockets, i.e., and selling fireworks without license. The shall let off rockets or send up fire-balloons without a license from the Commissioner of Police, and whoever shall sell fireworks without a license from the Commissioner of Police, for which a yearly fee not exceeding ten rupees shall be payable, shall be liable, on conviction before a Magistate, to a penalty not exceeding fifty rupees for every such offence.
- (2) All such fees received by the Commissioner of Police shall be applied by him towards the maintenance of the fire-brigade.
- Power of Commissioner of Police may, at his discretion, withdraw or suspend license, discretion, withdraw or suspend any license granted by him under the last preceding section:

Provided that a license to sell fire-works shall not be withdrawn or suspended except after thirty days' notice.

38. The powers conferred on the Commissioner of Howrah to exercise certain powers of Commissioner of Police.

Sections, shall be exercised in the municipality of Howrah by the Magistrate of the district, or the officer in charge of the current duties of the Magistrate's office.

Penalty on house-holder for allowing rockets, &c., to be let off within premises without express permission.

The event of any rockets being let off or five-balloons sent up within the precincts of any private premises or columnus. The express permission in writing of

permission in writing of the Commissioner of Police or the Magistrate or officer as aforesaid, as the case may be, the owner or occupier, or person under whose immediate control the said premises or compound is, shall be liable to a fine not exceeding fifty rupees, unless he can prove that the offence was committed without his knowledge.

### CHAPTER VII.

Miscellaneous.

Local Government may declare other building or place to be a warehouse.

Local Government may declare other building or place to be a warehouse.

Commendation of the Commissioners in meeting, declare that any building or place used for the attraction.

ing, or pressing, or keeping of any inflammable substance or thing other than those specified in clause (8) of section three of this Act shall be a warehouse within the meaning of, and be subject to the operation of, this Act.

- Reports respecting heenses for warehouses, ec., to be submitted to Local Government.

  time as the Local Government shall direct, giving a statement of account of receipts and disbursements, and showing how the provisions of this Act have been carried out, and specifying the warehouses in respect of which licenses have been granted.
- (2) The Commissioner of Police shall make a similar report, shewing the constitution, assets and the working of the fire-brigade during the year, the receipts and expenditure in respect thereof and the proceedings taken by him under sections thirty-six and thirty-seven of this Act.
- (3) Such reports shall be forthwith published in the Calcutta Gazette?
- 42. Any person come any offence in respect of which a penalty is Police officer may arrest provided by section thirtyoffenders under section 36 and convey them before six of this Act may, if Magistrate. his name and address be unknown, be arrested by any officer of police and forthwith conveyed before a Magistrate having jurisdiction in the place in which such offence has been committed, or shall be taken to the nearest police-station within the said jurisdiction, in order that such person may be detained until he can be brought before a Magistrate, or until he shall enter into a recognizance with or without sureties for his appearance before a Magistrate.
- Time within which offenders should be conveyed before Magistrate.

  a police-station, the officer in charge of such station shall, as soon as possible, but in every case within twenty-four hours, cause him to be conveyed before a Magistrate having jurisdiction in the matter.
- 44. Every license granted under Chapter II

  Form of license for warehouse.

  Form of license for possible, be in the form of the Schedule to this Act
- Act not applicable to buildings where small quantities of jute, &c., are deposited.

  Act not applicable to buildings or buildings where small quantities of jute, &c., are deposited.

  Act not applicable to apply to buildings or places wherein small quantities of jute, cotton, resin, varnish, pitch, tar, hay, straw, rags, tallow, wood or other inflammable substance or thing for the time being subject to the operation of this Act are deposited.

- (2) The Local Government may from time to time declare, by notification in the Calcutta Gazette, what quantities of jute, cotton, resin, varnish, pitch, tar, hay, straw, rags, tallow, wood or other inflammable substance or thing as aforesaid, shall be deemed to be small quantities within the meaning of this section.
- Ropeal of sections 347 of Act 11 of 1888 and 261 of Act 111 of 1884.

  One of the Bengal Municipal Act, 1894, are hereby repealed, in so far as they entitle the Commissioners to levy fees in respect of premises licensed as depôts for hay, straw, wood, rags, jute or other dangerously inflammable material which are licensed and used as warehouses under this Act.

## RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1892.

No. 1741.D.

POLICE.

Darjeeling, the 21st June 1893.

READ-

The Annual Report on the Police Administration of the Town of Calcutta and its
Suburbs for the year 1892.

Read also—

. The reports for the two preceding years, and the Resolutions recorded by Government thereon.

SIR JOHN LAMBERT, K.C.I.E., was in charge of the Police of the town of Calcutta and its suburbs throughout the year as Commissioner of Police, and Mr. A. B. Barnard continued to hold the office of Deputy Commissioner.

2. The following table shows the number of cognizable and non-cognizable cases reported in the town and suburbs of Calcutta during 1892 and the two preceding years:—

	1		2	3	4
	•		1890.	1891.	1892.
Town Suburbs	•••	•••	48,873 12,669	48,569 11,871	47,765 11,472
	Total	•••	61,542	60,440	59,237

In the town 27,352 cognizable cases were tried, of which number 25,031 ended in conviction in the Magistrates' Courts, and 19 in the High Court. In the suburbs 6,890 cognizable cases were tried, of which 6,518 resulted in conviction before the Magistrates, and 28 in the Sessions Court. The outturn of police work was favourably mentioned in the Resolution on last year's report, and His Honour is glad to notice that the improvement has been maintained. There has been a satisfactory decrease in serious crime, which felt below the avorage recorded for many years past, while there was an improvement in dealing with serious offences, both in respect of the number of cases detected and persons convicted, as well as in the amount of stolen property recovered. The number of cognizable offences under the Penal Code shows a decrease of 558 as compared with 1891, while in non-cognizable cases under the Penal Code there is a decrease of 226 in the same period. The decrease of 479 in miscellaneous cognizable cases occurred mainly in street offences punishable under the Police Act. There was a slight increase in miscellaneous non-cognizable cases, chiefly under the Workman's Contract Act.

3. Arrests and convictions.—The total number of arrests under all heads fell from 47,802 in 1891 to 46,731 in 1892. The decrease occurred mainly in cases of public and local nuisances and street offences. The number of persons convicted fell from 44,518 to 43,425, and the ratio of convictions from 93.30

in 1891 to 92 92 in 1892.

4. False cases.—Sixty-two false cases were brought in the town and 27 in the subarbs against 58 and 18, the corresponding figures for 1891. Out of 22 town prosecutions instituted under the Penal Code for bringing false complaints, convictions were obtained in 11 cases, in two of which the offenders were sentenced to imprisonment. In the suburbs prosecutions were instituted in 16 cases, of which 9 resulted in conviction, and in 6 of these the complainant was sentenced to imprisonment. Besides these, Rs. 235 were granted as compensation to the accused person in 31 cases in the town, and Rs. 67 in 8 cases in the suburbs. In 1891 compensation was granted in 20 cases only in the town, and in not a single case in the suburbs. His Honour is glad to notice this improvement, and trusts that a judicious use of the powers conferred on Magistrates by this section will result in a reduction in the number of frivolous and vexatious complaints instituted.

5. Property stolen and recovered.—The value of the property stolen in the town was Rs. 1,13,974 against Rs. 1,17,901 in 1891. There was a satisfactory increase in the percentage of property recovered from 57.82 in 1890 and 58.05

in 1891 to 72.02 in 1892.

Cognizable crime in the town.—The number of cognizable cases reported as true was 28,472 against 28,356 in 1891. There were five cases relating to coin against seven for the preceding year, but all were unimportant, and the maximum sentence imposed was only six months' rigorous imprisonment. There were six cases of murder against four in 1891. In two of these cases the accused were convicted and executed, one resulted in an acquittal, and in another the accused was found to be insane and was ordered to be confined in an Asylum. In the fifth case no clue to the murderer could be obtained. In the remaining case two men were committed to the Sessions for having murdered and robbed an old woman, and although each made incriminating statements before the Magistrate which led to the recovery of some of the stolen property, they were acquitted by the jury, mainly on account of some discrepancies in the police evidence. There was no case of murder by poison, and only one of attempt at murder in which the accused was convicted and sentenced to 10 years' rigorous imprisonment. Of the four cases of culpable homicide reported, one should not have been shown in the return, as it was found by the Coroner's Jury and by the Magistrate who held the enquiry that the death was the result of natural causes. Of the other cases, the conviction in one was for simple hurt only under section 323, Indian Penal Code, while in the remaining two the accused were convicted of culpable homicide and sentenced, one to transportation for life, and the other to rigorous imprisonment for seven years. There was one case of unnatural offence against three in 1891, and in this the offender was convicted and sentenced to transportation for life. There were 31 cases of grievous hurt in which 38 persons were sent up, of whom 16 were convicted, 21 were discharged, and one was under trial at the close of

There were four cases of administering stupefying drugs, of which the year. three ended in the conviction of the accused, who were sentenced to terms of imprisonment varying from three to seven years. The remaining case should not have been returned as true, as no trace of any poison was found, and the accused was discharged by the Magistrate. There were 14 cases of kidnapping against 22 in 1891. In the 51 cases of hurt by dangerous weapons reported, 80 persons were arrested, of whom 41 were convicted and 29 acquitted. The number of true cases of burglary and lurking house-trespass was 106, the same as in the preceding year, but the number of cases detected rose from 79 to 92, and the convictions from 93 to 97. The number of thefts reported as true was 1,382, being a decrease of 113 as compared with 1891, and of 236 as compared with the average of the past four years. The number of cases detected and the convictions increased by 58 and 87 respectively. These results are very satisfactory. There were 859 arrests and 806 convictions under the Gambling Act in 1892 against 530 arrests and 489 convictions in 1891. In one case the keeper of a gaming house, who had been six times previously convicted, was sentenced to a fine of Rs. 4 only. The Commissioner justly observes that such leniency is misplaced, as these professional gambling houses are a source of much mischief and crime. There were 3,219 cases and 2,996 convictions under the Hackney Carriage Act, while the number of persons arrested for cruelty to animals was 6,032, of whom over 94 per cent. were convicted.

7. Non-cognizable offences in the town.—The total number of non-cognizable cases fell from 20,186 in 1891 to 19,262 in 1892, and is mainly accounted for by a decrease in the number of prosecutions instituted under the Municipal Act. The number of forgery cases rose from 3 in 1891 to 13. In one of these two persons were sentenced to six months' rigorous imprisonment each for attempting to utter two forged Government currency notes for Rs. 1,000, and in the remaining 12 the accused were discharged. Cases of extortion rose from 9 in 1891 to 23, one being that of a native constable who was convicted and sentenced to three months' rigorous imprisonment. There were no prosecutions under the

Emigration Act.

Cognizable crime in the suburbs.—There was a decrease in the number of cognizable cases in the suburbs from 8,237 to 7,085 chiefly in respect of cases under special and local laws. There were three cases relating to counterfeit coins, one of culpable homicide, and four of murder. Two of the latter were cases of child murder committed for theft, but no trace of the murderers could be found. In one case the accused was convicted and executed for the murder of his wife. The remaining case was that of the Lushai Chief Nikoalo who, without any provocation, killed a fellow Lushai prisoner in the Alipore Jail. He was committed for trial, but being found to be insane was ordered to be confined in the Jail, where he is still under observation. The number of cases of burglary was only 91 against 132 in 1891 and an average of 125 in the last five years. The ratio of cases detected and of persons convicted was 53.84 and \$4.53 in 1892 against 43.93 and 77.50 in 1891. The number of thefts rose from 403 to 446, and the convictions from 214 to 321. In February a serious disturbance occurred at Alipore between the sepoys of the 17th Bengal Infantry and the police on the occasion of a balloon ascent at the Gardens of the Agri-Horticultural Society. A large crowd of spectators of the poorer class, including several hawkers of aerated waters and other refreshments, had assembled close to the parade ground to watch the ascent, and their presence gave annoyance to the sepoys, who proceeded forcibly to eject them, and in doing so followed them on to the public road. Here they came into collision with the police, and in the melle which followed, some of the latter, as well as some bye-standers, were assaulted. The matter was subsequently dealt with by a Military Court of Enquiry held at Fort William.

9. Non-cognizable crime in the suburbs.—Owing to an increase of 817 in prosecutions under the Municipal Act, the number of non-cognizable cases rose from 3,619 to 4,368. There was one case of forgery and one of extortion.

The cases were unimportant and call for no special remark.

10. Suicides and accidental deaths.—There were 87 cases of suicide in the town and suburbs against 66 in 1891, and an average of 90 in the preceding five years. Over 87 per cent. of the suicides were Hindus. Fifty-four per cent. of the total number of suicides during the year were due to opium-poisoning

and 29 per cent. to hanging. The number of accidental deaths was 276 against 308 in 1891. Of these deaths, 28 were those of persons run over by vehicles, but no case occurred in which there was evidence of rashness or negligence. Out of the 99 persons prosecuted for rash and furious driving, 85 were convicted.

11. European Vagrancy Act.—The number of vagrants admitted into the Government Workhouse rose from 41 to 56, and 4 were left in the Workhouse at the close of 1891. Thirty-six were discharged on obtaining employment, 5 were deported from British India, and 6, for whom no employment could be found, were released under the first clause of section 16 of the Act. Two inmates of the Workhouse absconded and 6 were imprisoned, the correspond-

ing figures for 1891 under these heads being 5 and 1 respectively.

12. Fire Brigade Act.—The brigade was employed at 34 fires against 26 in 1891, and of these 10 occurred in the town, 13 in the suburbs, and 11 at Howrah. There were 17 other small fires, at which assistance was rendered by the manual engines belonging to the out-stations. The most serious fire in the town occurred in the port of Calcutta on board the ship Dumbarton Rock, the value of the cargo destroyed, which consisted of gunny-bags, jute, &c., being estimated at several lakhs of rupees. At a fire at Balliaghatta in the suburbs, 86 houses, containing 2,00,000 maunds of rice and grain, were destroyed, the loss of property being estimated at 9 lakhs. At a fire which broke out at the Sibpur Jute Mills in Howrah the value of the jute and other property destroyed is estimated at Rs. 3,35,000. The total loss of property from fires, excluding that on the ship Dumbarton Rock, is estimated at Rs. 12,95,045 compared with Rs. 1,97,100 in 1891. Two of these fires were attended with the loss of three human lives.

13. Constitution of the police force.—The actual strength of the police force employed in the town and suburbs was 2,873, the number being the same as in 1891. Of the subordinate police only 168 were Bengalis, and 1,936 were up-countrymen. Among native officers, however, the proportion of Bengalis is large and exceeds the number of up-countrymen. The percentage of casualties in the force was 8.38 against 11.69 in the proceding year. Sixty-seven men were dismissed, one deserted and 26 died, the rate of mortality being 9.49 per mille against 11.48 in 1891. The total cost of the force was Rs. 6,30,767 against Rs. 6,22,254 in 1891.

14. Four hundred and fifty-eight certificates were granted for hotels, shops for the sale of exciseable articles, and native eating-houses. The fees amounted to Rs. 1,058. The number of licenses for processions with music was 1,408, and the amount of fees realised was Rs. 5,920. Property to the value of Rs. 43,075 was brought to the Police Office as unclaimed, and more than

96 per cent. was restored to its owners.

15. Adjournment of police cases.—The number of cases adjourned was 290 against 289 in 1891, and the Lieutenant-Governor is glad to see that in this respect the improvement which was noticed in the Resolution on last year's report has been maintained during the present year. Of the above number 155

cases were disposed of at the second hearing.

16. Judicial work.—Mr. Pearson officiated as Chief Presidency Magistrate, Calcutta, from the 25th February to the 17th November, during the absence on leave of Mr. Marsden. Nawab Syud Ameer Hossein, C.I.E., was in charge of the Magistracy of the Northern Division throughout the year, except for one month and thirteen days when he was absent on privilege leave, and Maulvi Abdul

Jubbar, Khan Bahadur, officiated for him.

17. Court of the Chief Presidency Magistrate.—The total number of cases instituted during the year was 13,107, in which 17,415 persons were concerned. Of the accused persons, 1,542 were acquitted or discharged, 15,816 were convicted, and 20 were committed to take their trial before the High Court. The number of persons charged under the Penal Code was 5,983 against 7,110 in 1891. Thirty-two persons were brought up under the European Vagrancy Act, of whom three were discharged, one was imprisoned, twenty-seven were sent to the Workhouse, and one was under trial at the close of the year. The number of persons prosecuted under the Merchants Shipping Act rose from 170 to 583, and of these 545 were convicted. There was only one case under the Excise Act against eight in the preceding year. Out of 3,152 persons prosecuted

for cruelty to animals, 273 were acquitted. The Chief Magistrate remarks that these prosecutions are often not carried on as circumspectly as they should be, and in several instances he has had to dismiss cases against drivers of gharces who have been unnecessarily arrested and sent up by the agents of the Society for the Prevention of Cruelty to Animals. Under the law the Magistrate has not the power to order payment of compensation to the drivers for the loss of their day's work, and they have therefore no redress. These remarks will be brought to the notice of the Society. Substantive sentences of imprisonment were passed on 774 persons, 39 were imprisoned in default of payment of fine, and five in default of furnishing sureties for good behaviour. Sentences of whipping were passed on 33 persons, and in five cases only did the sentence exceed 10 stripes, and in not a single instance did it exceed 20 stripes. The number of juvenile offenders sent to the Reformatory was six against three in 1891. The total value of fines imposed during the year was Rs. 24,641-8-6, of which Rs. 23,841-4-6 were realised. Of the 33 appeals preferred against the orders of the Chief Magistrate, 31 were rejected, and in two the convictions were set aside. The High Court was moved in six cases, in two of which the applications were rejected, in two the convictions were set side, and in two the

rule was discharged.

18. Northern, Division Court.—The number of cases instituted during the year was 17,545, and in these 21,121 persons were brought before the court, of whom 1,112 were acquitted or discharged, 19,967 were convicted, and 15 were committed to the Sessions. The number of persons sentenced to imprisonment was 733, and 10 juvenile offenders were sent to the Reformatory School. Out of 24 persons sent up under the European Vagrancy Act, 16 were sent to the Workholse, 5 were imprisoned and 3 were discharged. Fifty-three persons were sentenced to be whipped, 11 were bound down to keep the peace, and 5 called upon to give security for their good behaviour. The amount of fines imposed was Rs. 30,627-13, of which Rs. 28,107-3 were realised. Rupees 259 are shown as having been paid as compensation, but the nature of the compensation and the number of cases in which it was awarded have not been specified. Fuller details should be given in future reports, and the number of cases in which compensation is ordered under section 560, Criminal Procedure Code, and the amount so granted, should be separately shown. Processes were issued against 4,802 persons, of whom only 1,591 actually came into court. In cases of intimidation and insult, 997 processes were issued, but only 121 persons appeared to answer the charge against them, and of these 117 were acquitted. In cases of simple hurt and criminal force, processes were issued against 2,618 persons, of whom only 392 appeared. These results are far from satisfactory, and indicate a want of sufficient care in issuing processes and in enquiring into complaints beforehand. Appeals were preferred to the High Court in 73 cases, with the excellent result that in only one was the conviction set aside, while in 6 the sentence was reduced. Of the 15 persons committed to the High Court for trial, 14 were convicted and one was pending trial at the close of the year. Out of 11 cases in which the High Court was moved to set aside the order of the Magistrate, in 5 the rule was discharged, in 3 the conviction was reversed, and in 3 retrial was ordered.

19. Work of the Honorary Magistrates.—The number of cases other than municipal transferred to the Honorary Magistrates for disposal was 2,709, of which 1,689 were offences under the Penal Code, 51 were miscellaneous cases under the Criminal Procedure Code, and 969 were offences under local laws. Of these the number actually brought to trial was 2,560, in which 4,009 persons were concerned, of whom 2,773 were convicted, 1,230 were acquitted, and 6 were pending trial at the close of the year. Two hundred and seventy-six persons were sentenced to imprisonment, 17 were ordered to be whipped, and 1 juvenile offender was sent to the Reformatory. The total amount of fines imposed was Rs. 6,969-4, of which Rs. 6,467-9 were realised. Twenty-two appeals were preferred to the High Court, but all were rejected. Of the 9 cases in which the High Court was moved to set aside the order of the Honorary Court, in six the applications were rejected, in two the order was reversed, and in one retrial was directed. These are creditable results, and speak well for the soundness of the decisions given by the Honorary Magistrates. The number of cases which were not disposed of at the first hearing was only 59, and in none

of these were adjournments unnecessarily granted.

20. Municipal Prosecutions.—The total number of municipal prosecutions before the Honorary Magistrates was 13,253 against 14,103 in 1891. Processes were issued against 13,088 persons, of whom only 7,409 actually appeared in Court and of these 3,660 were acquitted and 3,749 convicted. These figures show that there is a great deal of useless prosecution and process serving which might well be avoided. The total amount of fines imposed in these cases was Rs. 17,972-6-3, of which Rs. 15,243 were realised. In four instances the High Court was moved to set aside the order of the Honorary Magistrates in municipal cases, and the result was that in one case the order was upheld, in the second retrial was directed, and in the remaining two the orders were set aside.

21. The Lieutenant-Governor is glad to notice that the Chief Magistrate is again able to acknowledge the good work done and the valuable assistance rendered by the Honorary Magistrates during the year. The list of attendance shows that out of 97 Honorary Magistrates 42 have attended at least once a month, while 16 have attended 20 times or more. Sir Antony MacDonnell desires to thank these gentlemen for the interest they have taken in their work and for the assistance they have rendered to the administration of justice. It is observed, however, that Mr. Marsden again animadverts on the irregular attendance of a few of the Honorary Magistrates who, although invited to attend, have absented themselves without notice, and in some instances after having previously intimated their intention to be present. This is a practice which cannot be too strongly deprecated both as being a discourtesy to the other Honorary Magistrates, who have been summoned to form a Bench with them, and also as causing great inconvenience to the parties and all concerned.

22. The Lieutenant-Governor's acknowledgments are again due to Sir John Lambert, the Commissioner of Police, and to Mr. A. B. Barnard, the Deputy Commissioner, for their efficient administration of the department under their control. His Honour also desires to acknowledge the work done by Mr. Pearson, Mr. Marsden, and Nawab Syud Ameer Hossein, c.i.e. The names of

*the subordinate officers favourably mentioned have been noted.

Ordered that copies of the Resolution be forwarded to the Commissioner of Police, Calcutta, for information and communication to the Presidency Magistrates and to the Commissioner of the Presidency Division, and the Chairman of the Corporation of Calcutta for information.

Ordered also that a copy of this Resolution be published in the Calcutta

Gazette.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Government of Bengah

#### · ENCOURAGEMENT OF SANSKRIT LEARNING IN ORISSA.

#### GENERAL DEPARTMENT-EDUCATION No. 310T.-G.

Darjeeling, the 22nd June 1893.

#### RESOLUTION.

READ the following papers on the subject of the encouragement of Sanskrit learning in Orissa:—

Letter from the Director of Public Instruction, No. 8321, dated the 26th October 1892, and its enclosure.

Letter to the Director of Public Instruction, No. 3130, dated the 16th November 1892.

Letter from the Director of Public Instruction, No. 9206, dated the 6th December 1892.

Letter to the Director of Public Instruction, No. 53, dated the 6th January 1893. Letter from the Director of Public Instruction, No. 2417, dated the 20th April 1893, and its enclosures.

In pursuance of the policy of encouraging indigenous institutions for the teaching of Sanskrit which was initiated by Sir Ashley Eden in 1878 and has since been maintained, Mahamahopadhyaya Mahesa Chandra Nyayaratna, c.i.e., Principal of the Sanskrit College, Calcutta, was authorized under the orders of this Government to visit Orissa, in the hope that his presence and personal influence might induce the leading men of that province to organise effective measures for the revival of Sanskrit studies, and for their more active prosecution in future.

2. From the report now received, it appears that the Pandit's visit has evoked considerable enthusiasm for the extension of Sanskrit teaching, and that Associations have been established for the promotion of the study of Sanskrit at the following places:—

(1) At Puri, the Jagannath Sanskrit Samiti has been formed with 57 members, and Mohant Raghunandan Ramaniya Das, head of the Emar Matha, has consented to pay all expenses of holding the Sanskrit examinations under the Society for the first three years, the expenditure being estimated at Rs. 200 per annum.

(2) At Cuttack, 64 persons have joined the Orissa Sanskrit Samiti, and annual subscriptions, amounting to Rs. 700, have been promised for the maintenance of the Association and to carry out its objects.

(3) At Balasore, the Balasore Sanskrit Samiti numbers 61 members, and the President of the Committee, Raja Baikantha Nath De, Bahadur, has promised a subscription of Rs. 150 annually to the funds of the Society.

3. Pandit Mahesa Chandra Nyayaratna also visited the Kanika Tributary estates at Ganja in the Cuttack district. The present Raja is a minor, and the estates are under the management of the Court of Wards. The Manager of the estates, an officer of the Subordinate Executive Service, expressed his opinion that the estates ought to do something for the promotion of Sanskrit learning, and that Rs. 1,000 a year should be expended for the purpose from the revenue of the estates. This suggestion will be considered by Government in the Revenue Department.

. 4. The Raja of Mourbhanj has agreed to the Pandit's proposals to keep up two tols at his own expense—one at a cost of Rs. 6,440 annually at Mourbhanj, and the other at Balasore, at a cost of Rs. 1,560.

5. The Lieutenant-Governor has read with interest the report of Mahamahopadhyaya Mahesa Chandra Nayaratna and of the Director of Public Instruction, and desires that the thanks of Government may be conveyed to the former. His Honour agrees with Dr. Martin that the visit of the Pandit to Orissa has been a success, and that the Associations which have been formed should be brought under the general scheme for the award of Government stipends to indigenous Sanskrit tols, sanctioned in Government notification No. 634, dated the 16th February 1893.

6. His Honour also desires to invite the co-operation and support of the wealthy nobility and gentry in Orissa in the furtherance of the study of Sanskrit in that province.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Director of Public Instruction for information and guidance, and for communication to Pandit Mahesa Chandra Nyayaratna.

Ordered, also, that a copy of the Resolution be published in the Calcutta

Gazette.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY. Secretary to the Govt. of Bengal.

#### REPORT ON THE WORKING OF THE JUTE WAREHOUSE AND FIRE-BRIGADE ACT IV OF 1883 IN THE HOWRAH MUNICIPALITY DURING THE YEAR 1822-93.

The following report is published for general information.

J. A. BOURDILLON. Offg. Secy. to the Covt. of Bengal.

#### Dated the 13th May 1893.

From-G. A. GRIERSON, Chairman, To-The Magistrate of Howrah.

I have the honour to report on the working of the licensed warehouses in this Municipality for the year 1892-93.

There were (32) thirty-two warehouses licensed during the year for the storage of jute and cotton only. This shows an increase of one over last year, with a corresponding increase of Rs. 350, and is accounted for as follows:—

 An extra warehouse yielding Rs. 50.
 An increase of Rs. 100 from the warehouse of Messrs. Jumna Das and Broma Datta.

(3) Receipts from jute exposed on chur land for drying, and further in cases where jute has been stored for short periods.

A classified list of warehouses licensed during the year is given in Appendix A. ..

No new warehouses were established during the year.

The total receipts amounted to Rs. 6,650 from license fees only, and from lines under section 11 of Act IV of 1884, Rs. 27, made up as shown below:—

Mr. N. P. Guzdar Rs. 25, and Gozar Mul Marwari Rs. 2.

The expenditure under inspection of jute warehouses amounted to Rt. 5,823-10-9, and is given in detail below :-

•					${f Re.}$	A.º	P.
80 per cent. conf	tribution to ]	Fire-brig	ade (Rs. 40 l	eing in		•	
payment of arre		-92)	•••	•••	5,360	0	0
Salary of Inspecto	r	•••	•••		196	14	0
Site for Fire brigg	de barrack	•••	•••	•••	120	0	•
Contingencies	•••	•••	•••	•••	146	12	9
	•		Total	•••	5,823	10	9

The Fire-brigade establishment, as hitherto, remained under the control of the Commissioner of Police, Calcutta. The Fire-brigade station is most centrally situated, standing next to the Municipal Market, and in such a position is well located to overlook the whole town in case of fires occurring.

There were (4) four fires during the year. A statement showing the particulars of

each fire, with respective destruction of property, is give'n, vide Appendix B.

Additional expenditure industred during the year irrespective of the amount expended by the Commissioner of Police, Calcutta, is as follows:

80 per cent. paid to the Commissioner of Police-Re. 5860.

	20	Dinajpur	,, 24.	93 6.12	Weather—hot; occasionally cloudy and rainy. Prospects of standing crops very good. Ploughing for haimanti crop vigorously going on. Transplantation commenced on low lands. Prices of rice unchanged. Cattle in good condition. Fodder and drinking water sufficient.							
	21	Rajshahi	,, 24,	93 9.78	The rains have set in with unprocedented copiousness. Weather hot in the intervals of the showers. All crops were coming on nicely, but the very wet weather we are having is said to be affecting them injuriously. No cattle disease. Water and fodder ample. Price of rice varies from 10 to 14 seers per rupee.							
	22	Rangpur	,, 24, '	93 4.37	Weather-cloudy and warm at present. Heavy rain during the week. Aus paddy is being cut. Laud is being got ready for aman and tran planting							
DIVI.	28	Bogra	" 24 '	5.17	going on. Prospects good for all crops.  Weather—cloudy with heavy rain. Preparation of land for aman and transplunting going on. Prospects of aus and jute fairly good. Common rice sells at 12 seers per rupes. Fodder and water sufficient.							
RAJSBARI DIVE	24	Pabna	., 24, '9	12.13	Weather—cloudy with almost incessant rain. Rivers are rising. The heavy rainfall during the week has somewhat damaged the paddy crops. Price of common rice at Pabna 114 seers per rupee; at Sirajganj Rs. 4 to							
RAJORA	25	Darjeeling	,, 24, '(	98 <b>7</b> ·60	Rs. 5 per maund. Fodder and water-supply sufficient.							
	25	Jalpaiguri	<b>,, 24,</b> 3	98 0.67	Hills Terai  Weather—hot and cloudy at times. Prospects of standing crops remain unaltered. Lands being prepared for winter rice. Prices of common rice:  Srs.							
					Jalpaiguri 114 } per rupec.  Alipur 7 to 8 } per rupec.  Fodder and water-supply sufficient.							

_	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.  Weather—cloudy and rainy; hot in the latter part of the week. Bkodoi sowings nearly complete. Indigo and sugarcane in excellent condition. No cattle-disease. Fodder and water-supply sufficient. Prices of common rice:—							
BI	HAR C27	Moughyr June 24, '98	3.83								
•				Srs.  Sadar 12 to 15  Begusarai 14½ per rupee.  Jamui 13½							
DIVE.	28	Bhagalpur ,, 24, 93	6.22	Weather—cloudy with rain. Except in Supaul, where it is wanted for the bhadoi, there has been plenty of rain, and the young crops are doing well.							
BHAGALPUB DIVE.	29	Puruea ',, 24, '93	8.06	Weather—cool, cloudy and wet. Bhadoi and jute doing well. Weeding going on. Lands being prepared for aghani, and transplanting begun. Indigo being manufactured with good results. Fodder and water plentiful. Prices stationary and high.							
•		•		,							
	<b>8</b> 0	Maldu " 24, '98	6.93	Weather—heavy rain during early part of week; last two days clear and hot.  Heavy rain throughout the district. State of bhadoi paddy, jute and other crops continue satisfactory. Manufacturing of indigo has commenced; average outturn is expected. Price of common rice varies from 11 to 15 seers per rupoe. No want of fodder.							
	91	Sonthul Parganus p. 24, 93	6.64	Heavy rain all week. Weather seems to be clearing up now. Rice seedlings promise well. The heavy rain interfered with the sowing of Indian-corn for which fine weather is now needed. Price of rice much the same.							
	82	Patna ., 24, '93	6.94	Weather—seasonable. The recent rain has done immense good to sugarcane and to bhadoi crops where sown. In places where bhadoi crops have not been sown, they are being fast sown. Prospects favourable all round. Millets harvested in places. Fodder and water for cattle sufficient. Prices of common rice:—							
		• .		Patna							
PATRA DIVISION,	83	Gaya 21, 93	4.17	Weather—stormy and rainy. Rain very beneficial for agricultural operations.  Marua millet being transplanted and other thadoi crops being sown.  Prices stationary. Water and folder-supply ample.							
PATRI	84	Shahabad,•24, '98	3.62	Weather—scasonable. The rain is very favourable for the sowing of bh.idoi and aghani crops.							
	85	• Darbhanga ., 24, '98	1·55	Weather—cloudy and close. The rainfall of the week has greatly benefited paddy and indige. Bhadoi sowings in full swing. More rain is, however, wanted for bhadoi cultivation. Prices remain stationary. Fulder and water for cattle sufficient.							
	. 86	Muzaffarpur ., 24, '98	0.29	Weather—hot and cloudy sometimes. Sowing of bhadoi crops going on. More rain wanted for sowing and transplantation of paddy. Standing crops doing well. Prices stationary. Supply of fodder and water sufficient. No disease among cattle.

a management to management &c. are deduced from the traces of the Barograph	and Thermograpi

The mean pressure, temperature. &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the hermometers are verified and the readings have been corrected to a standard constructed and verified at the few Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet bove the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, rmerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in Meteorological Office, and besed on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

e, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

Calcutta, the 26th June 1893.

Explanation. —... indicates that no rain has allen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the deduction of a rainy day is when as it calculates of rain has fallen.

CALCULTA, the 27th June 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 24TH OF JUNE 1893.

THE weather of the past week has been remarkable for the large oscillations of pressure which prevailed over the whole province, but which were more striking in the southern districts. It was probably owing to the fact that the larger changes occurred in Lower *Bengal that unusually heavy rain has fallen in South-West and East Bengal and in parts of South Bihar and Chota Nagpur, while, as a result of the heavy rainfall, temperature has been

inusually low in these districts.

At the beginning of the week pressure was above the normal by small amounts and was changing very slightly; the wind circulation was almost normal, that is, south-westerly in Orissa, Chota Nagpur and South-West Bengal, and south-easterly or easterly elsewhere. Ordinary south-west monsoon weather was general, and moderate rain was falling in all districts except Orissa and the more northern districts of North Bihar. On the 19th, the second day of the week, a rapid fall of pressure began, and this, besides causing much steeper gradients over the Bay, must have led to the heavy rain which fell on that day in East Bengal. The fall of pressure continued slowly during the 20th, but local disturbances occurred and brought unusually heavy rain in places. The heaviest falls were in South-West Bengal, where Calcutta and Howrah received more than 8 inches, and in the Darjeeling Hills; elsewhere general, but not heavy, rain fell. A rapid rise then commenced, and the pressure distribution from being considerably in defect became practically normal on the 21st, and above it on the 22ud by amounts varying from .02 inch in East Bengal to .1 inch in Orissa. At the same time rainfall became more scattered in the western dustricts, and though it was general in the eastern and central districts, amounts were very variable and were due in part to local disturbances. During the last two days of the week pressure was again falling, very rapidly in South-West Bengal on the 23rd, and rapidly in East Bengal on both days. The resulting distribution was unusual, because of a depression which appeared over South-West Bengal on the 23rd with gradients sufficiently steep to cause light cyclonic winds in all districts except Bihar, where directions were still easterly. Very heavy rain fell in this area of lowest pressure, especially in the Midnapore and Bankura districts. On the 24th lowest pressure was in East Bongal, where there was defect of a quarter of an inch. the depression did not extend beyond the western boundary of the province, where readings were very nearly normal. Rainfall on this day was general except in the extreme west, but amounts were not nearly as heavy as on the previous day.

Throughout the whole week steep gradients prevailed in the Bay, and weather was of

ordinary south-west monsoon character.

Pressure.—Notwithstanding the large oscillations referred to above, the mean pressure for the week does not differ much from the normal. The means are below the normal every-

where generally by less than a twentieth of an iuch.

Temperature.—Owing to the cloudy weather which has prevailed, day temperatures have been steadily below the normal by variable amounts up to 10°. During the night, readings were much more nearly normal, and occasionally exceeded the normal by one or two degrees. Greatest defect was in Chota Nagpur in the early part of the week, and latterly in Lower Bengal after the depression developed there. During these last two days of the week mean daily temperature increased in North Bengal and North Bihar, and exceeded the normal for the only time during the week. The means for the week are all much below the normal, in Chota Nagpur and South Bihar by nearly 5°, in South-West and East Bengal by about 4° in North Bihar by 2.5°, North Bengal by 2°, and Orissa by 1.7°.

Rainfall has been almost general throughout the week in all districts except Orissa and North Bihar, where the falls were scattered and generally light. The rainfall in Lower Bengal has been unusually heavy, but at the same time irregular in its distribution, as in many cases it was caused by local disturbances. In such cases it is not unusual to find a fall of 6 to 10 inches at one station, and comparatively light falls, possibly of less than 1 inch, at neighbouring stations. During the past week many such instances may be found by reference to the tables herewith given, but further reference to them is unnecessary, as they

are of only passing interest.

The districts which have received fairly uniform heavy falls are the 24-Parganas, Nadia, Murshidabad, Chittagong, Backergunge, Noakhali, Faridpur, Dacca and Mymensingh. Nearly all the rainfall stations in these districts have received 10 inches, and in some cases many more. In North Bihar the falls have generally been under 2 inches; the exceptions being Bhagalpur, Bauka and Colgong in the Bhagalpur district, which received each about 6 inches. In South Bihar falls are rarely under 3 inches, and at many places between 5 and 8 inches.

The average fall in East Bengal is 1241 inches, and in South-West Bengal 824, both being about three times the normal amount for the week. South Bihar has received more than twice the normal, Chota Nagpur 1 13 inches excess, and North Bengal 31 inch excess.

In Offissa there is defect of '43 inches, and in North Bihar '46 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 24th of June 1893:—

• [First Publication.]

AUSTRALIA-BRISBANE RIVER.

Tide signals at Pile light-house.

Portmaster, Brisbane, has given notice (No. 19 of 1893) that on and after Wednesday, 17th May, the original Code of Tide Signals at the Pile Light-house, as contained in the Local Harbour Regulations, will be restored, replacing the one now in use there.

The depth shown by the original code is the tidal rise added to 14 feet, and that depth now exists between the Bay and the Powder Magazine. From the latter point upwards the

available depth is 5 feet 6 inches less than the above.

It is anticipated that, by the end of June navigation will be completely restored, and that there will be a depth of 14 feet of water available, in addition to the tidal rise, as far as the Town Reach.

[Third Publication.]

JAPAN-SIMONOSEKI STRAIT.

Buoy marking Kasaze rock.

THE British Admiralty has given notice (No. 223 of 1893) that a buoy has been placed in 6½ fathoms at low water spring tides, eastward of Kasaze rock, at the west-entrance of Simonoseki or Nagato strait. The buoy, conical red, and surmounted by a cone (about 14½) feet above water), lies with the south-west extreme of Hamo island (Miaiko jima), N.-E. by E. E., distant 61 cables, and cape Sizikuts, N. 4 W.
Approximate position, lat. 33° 56′ 4″ N., long. 130° 52′ 18″ E.

### (2) Hayatomo strait-Fixed light on Northern shore.

Also, that on or about 1st April 1893, a light, named Danno ura, would be exhibited from a light-house recently erected on the northern shore of Hayatomo strait, Simonoseki

Danno ura light is a fixed white light, with a sector of green light, showing white from the bearing of S. 57°W., through north, to N. 41°E., green over the channel from N. 41°E. to N. 51°E., and is obscured in other directions. It is elevated 52 feet above the sea, and should be visible in clear weather from a distance of 6 miles.

The light, house, 44 feet high, is a hexagonal wooden structure, painted red and white in

horizontal bands.

Approximate position on Admiralty Charts, lat. 33° 58′ 25″ N., long. 130° 57′ 48″ E..
Nors.—Danno ura light kept in line with Kanabuse beacon light (fixed white), leads through the fairway of Middle channel, between Middle ground (Nakanosu) red buoy and Tobigasu buoy.

### GOVERNMENT OF BENGAL-MARINE DEPARAMENT.

NOTICE TO MARINERS-No. 143.

[Third Publiction.]

JAPAN-YEZO ISLAND, EAST COAST.

Go Yo Mai channel-Sunken rocks south-westward of Odoke Shima.

WITH reference to Notice to Mariners No. 44, dated 25th April 1890, issued by this office, the British Admiralty has given further notice (No. 224 of 1893) of the existence of two sunken rocks south-westward of Odoke Shima, eastern side of Go Yo Mai channel—

A rock, with a depth of 2 fathoms on it, and deep water to the south-westward,

A rock, with a depth of 2 isthoms on it, and deep water to the south-westward, lies with cape Noyshaf (Nosapp) light-house, bearing W: by N. ³/₄ N., distant 1.⁹/₁₀ miles; and Odoke Shima summit, N.E. ³/₅ E.
 Approximate position, lat. 43° 22′ 25″ N., long. 145° 51′ 35″ E.

 A rock, with a depth of two fathoms on it, and deep water to the south-westward, lies about 1½ cables north-north-west of rock No. 1, in a position with cape Noyshaf light-house, bearing W. by N. ³/₂ N., distant 1.⁹/₁₀ miles, and Odoke Shima summit, N.E. by E. ¹/₅ E.

Note.—The vicinity of the rock reported by the Mulsu-maru, viz., with cape Noyshaf light-house, bearing N.W. by W.  $\frac{1}{2}$  W., distant  $1^{\circ}_{10}$  miles, was searched under favourable conditions by Japanese surveyors, depths of 15 to 16 fathoms being obtained in the position with 30 fathoms near, and no indication of a rock in the locality. The rock in this position has consequently been expunged from the Admiralty charts, as it is believed that the Mulsu-marula = 0maru touched on the above rocks south-westward of Odoke Shima.

# RESOLUTION ON THE ANNUAL REPORT.ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1892.

No. 174J.D.

POLICE.

Darjeeling, the 21st June 1893.

READ-

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1892.

Read also—

The reports for the two preceding years, and the Resolutions recorded by Government thereon.

SIR JOHN LAMBERT, K.C.I.E., was in charge of the Police of the town of Calcutta and its suburbs throughout the year as Commissioner of Police, and Mr. A. B. Barnard continued to hold the office of Deputy Commissioner.

2. The following table shows the number of cognizable and non-cognizable cases reported in the town and suburbs of Calcutta during 1892 and the

two preceding years:-

	1		2	3	.4
			1890.	1891.	1892.
Town Suburbs	•••	•••	48,873 12,669	48,569 11,871	47,765 11,472
	Total	•••	61,542	60,440	59,237

In the town 27,352 cognizable cases were tried, of which number 25,031 ended in conviction in the Magistrates' Courts, and 19 in the High Court. In the suburbs 6,890 cognizable cases were tried, of which 6,518 resulted in conviction before the Magistrates, and 28 in the Sessions Court. The outturn of police work was favourably mentioned in the Resolution on last year's report, and His Honour is glad to notice that the improvement has been maintained. There has been a satisfactory decrease in serious crime, which fell below the average recorded for many years past, while there was an improvement in dealing with serious offences, both in respect of the number of cases detected and persons convicted, as well as in the amount of stolen property recovered. The number of cognizable offences under the Penal Code shows a decrease of 558 as compared with 1891, while in non-cognizable cases under the Penal Code there is a decrease of 226 in the same period. The decrease of 470 in miscellaneous cognizable cases occurred mainly in street offences punishable under the Police Act. There was a slight increase in miscellaneous non-cognizable cases, chiefly under the Workman's Contract Act.

3. Arrests and convictions.—The total number of arrests under all heads fell from 47,802 in 1891 to 46,731 in 1892. The decrease occurred mainly in cases of public and local nuisances and street offences. The number of persons convicted fell from 44,518 to 43,425, and the ratio of convictions from 93.30

in 1891 to 92 92 in 1892.

4. False cases.—Sixty-two false cases were brought in the town and 27 in the suburbs against 58 and 18, the corresponding figures for 1891. Out of 22 town prosecutions instituted under the Penal Code for bringing false complaints, convictious were obtained in 11 cases, in two of which the offenders were sentenced to imprisonment. In the suburbs prosecutions were instituted in 16 cases, of which 9 resulted in conviction, and in 6 of these the complainant was sentenced to imprisonment. Besides these, Rs. 235 were granted as compensation to the accused person in 31 cases in the town, and Rs. 67 in 3 cases in the suburbs. In 1891 compensation was granted in 20 cases only in the town, and in not a single case in the suburbs. His Honour is glad to notice this improvement, and trusts that a judicious use of the powers conferred on Magistrates by this section will result in a reduction in the number of frivolous and vexatious complaints instituted.

5. Property stolen and recovered.—The value of the property stolen in the town was Rs. 1,13,974 against Rs. 1,17,901 in 1891. There was a satisfactory increase in the percentage of property recovered from 57.82 in 1890 and 58.05

in 1891 to 72.02 in 1892.

6. Cognizable cases reported was 28,472 against 28,356 in 1891. There were five cases relating to coin against seven for the preceding year, but all were unimportant, and the maximum sentence imposed was only six months' rigorous imprisonment. There were six cases of murder against four in 1891. In two of these cases the accused were convicted and executed, one resulted in an acquittal, and in another the accused was found to be insane and was ordered to be confined in an Asylum. In the fifth case no clue to the murderer could be obtained. In the remaining case two men were committed to the Sessions for having murdered and robbed an old woman, and although each made incriminating statements before the Magistrate which led to the recovery of some of the stolen property, they were acquitted by the jury, mainly on account of some discrepancies in the police evidence. There was no case of murder by poison, and only one of attempt at murder in which the accused was convicted and sentenced to 10 years' rigorous imprisonment. Of the four cases of culpable homicide reported, one should not have been shown in the return, as it was found by the Coroner's Jury and by the Magistrate who held the enquiry that the death was the result of natural causes. Of the other cases, the conviction in one was for simple hurt only under section 323, Indian Penal Code, while in the remaining two the accused were convicted of culpable homicide and sentenced, one to transportation for life, and the other to rigorous imprisonment for seven years. There was one case of unnatural offence against three in 1891, and in this the offender was convicted and sentenced to transportation for life. There were 31 cases of grievous hurt in which 38 persons were sent up, of whom 16 were convicted, 21 were discharged, and one was under trial at the close of

the year. There were four cases of administering stupefying drugs, of which three ended in the conviction of the accused, who were sentenced to terms of imprisonment varying from three to seven years. The remaining case should not have been returned as true, as no trace of any poison was found, and the accused was discharged by the Magistrate. There were 14 cases of kidnapping against 22 in 1891.. In the 51 cases of hurt by dangerous weapons reported, 80 persons were arrested, of whom 41 were convicted and 29 acquitted. . The number of true cases of burglary and lurking house-trespass was 106, the same as in the preceding year, but the number of cases detected rose from 79 to 92, and the convictions from 93 to 97. The number of thefts reported as true was 1,382, being a decrease of 113 as compared with 1891, and of 236 as compared with the average of the past four years. The number of cases detected and the convictions increased by 58 and 87 respectively. These results are very satisfactory. There were 859 arrests and 806 convictions under the Gambling Act in 1892 against 530 arrests and 489 convictions in 1891. In one case the keeper of a gaming house, who had been six times previously convicted, was sentenced to a fine of Rs. 4 only. The Commissioner justly observes that such leniency is misplaced, as these professional gambling houses are a source of much mischief and crime. There were 3,219 cases and 2,996 convictions under the Hackney Carriage Act, while the number of persons arrested for cruelty to animals was

6,032, of whom over 94 per cent. were convicted.

7. Non-cognizable offcaces in the town.—The total number of non-cognizable cases fell from 20,186 in 1891 to 19,262 in 1892, and is mainly accounted for by a decrease in the number of prosecutions instituted under the Municipal Act. The number of forgery cases rose from 3 in 1891 to 13. In one of these two persons were sentenced to six months' rigorous imprisonment each for attempting to utter two forged Government currency notes for Rs. 1,000, and in the remaining 12 the accused were discharged. Cases of extortion rose from 9 in 1891 to 23, one being that of a native constable who was convicted and sentenced to three months' rigorous imprisonment. There were no prosecutions under the

Emigration Act.

Cognizable crime in the suburbs.—There was a decrease in the number of cognizable cases in the suburbs from 8,237 to 7,085 chiefly in respect of There were, three cases relating to cases—under special and local laws. counterfeit coins, one of culpable homicide, and four of murder. Two of the latter were cases of child murder committed for theft, but no trace of the murderers could be found. In one case the accused was convicted and executed for the murder of his wife. The remaining case was that of the Lushai Chief Nikoalo who, without any provocation, killed a fellow Lushai prisoner in the Alipore Jail. He was committed for trial, but being found to be insane was ordered to be confined in the Jail, where he is still under observation. The number of cases of burglary was only 91 against 132 in 1891 and an average of 125 in the last five years. The ratio of cases detected and of persons convicted was 53.84 and 81.53 in 1892 against 48.93 and 77.50 in 1891. The number of thefts rose •from 403 to 446, and the convictions from 214 to 321. In February a serious disturbance occurred at Alipore between the sepoys of the 17th Bengal Infantry and the police on the occasion of a balloon ascent at the Gardens of the Agri-Horticultural Society. A large crowd of spectators of the poorer class, including several hawkers of serated waters and other refreshments, had assembled close to the parade ground to watch the ascent, and their presence gave annoyance to the sepoys, who proceeded forcibly to eject them, and in doing so followed them on to the public road. Here they came into collision with the police, and in the mêlee which followed, some of the latter, as well as some bye-standers, were assaulted. The matter was subsequently dealt with by a Military Court of Enquiry held at Fort William.

9. Non-cognizable crime in the suburbs.—Owing to an increase of 817 in prosecutions under the Municipal Act, the number of non-cognizable cases rose from 3,619 to 4,368. There was one case of forgery and one of extortion.

The cases were unimportant and call for no special remark.

, 10. Suivides and accidental deaths.—There were 87 cases of suicide in the town and suburbs against 66 in 1891, and an average of 90 in the preceding five years. Over 87 per cent. of the suicides were Hindus. Fifty-four per cent. of the total number of suicides during the year were due to opium-poisoning

and 29 per cent. to hanging. The number of accidental deaths was 276 against 308 in 1891. Of these deaths, 28 were those of persons run over by vehicles, but no case occurred in which there was evidence of rashness or negligence. Out of the 99 persons prosecuted for rash and furious driving, 85 were convicted.

11. European Vagrancy Act.—The number of vagrants admitted into the Government Workhouse rose from 41 to 56, and 4 were left in the Workhouse at the close of 1891. Thirty-six were discharged on obtaining employment, 5 were depotted from British India, and 6, for whom no employment could be found, were released under the first clause of section 16 of the Act. Two inmates of the Workhouse absconded and 6 were imprisoned, the correspond-

ing figures for 1891 under these heads being 5 and 1 respectively.

12. Fire Brigade Act.—The brigade was employed at 34 fires against 26 in 1891, and of these 10 occurred in the town, 13 in the suburbs, and 11 at Howrah. There were 17 other small fires, at which assistance was rendered by the manual engines belonging to the out-stations. The most serious fire in the town occurred in the port of Calcutta on board the ship Dumbarton Rock, the value of the cargo destroyed, which consisted of gunny-bags, jute, &c., being estimated at several lakhs of rupees. At a fire at Balliaghatta in the suburbs, 86 houses, containing 2,00,000 maunds of rice and grain, were destroyed, the loss of property being estimated at 9 lakhs. At a fire which broke out at the Sibpur Jute Mills in Howrah the value of the jute and other property destroyed is estimated at Rs. 3,35,000. The total loss of property from fires, excluding that on the ship Dumbarton Rock, is estimated at Rs. 12,95,045 compared with Rs. 1,97,100 in 1891. Two of these fires were attended with the loss of three human lives.

13. Constitution of the police force.—The actual strength, of the police force employed in the town and suburbs was 2,873, the number being the same as in 1891. Of the subordinate police only 168 were Bengalis, and 1,936 were up-countrymen. Among native officers, however, the proportion of Bengalis is large and exceeds the number of up-countrymen. The percentage of casualties in the force was 8.38 against 11.69 in the preceding year. Sixty-seven men were dismissed, one deserted and 26 died, the rate of mortality being 9.49 per mille against 11.48 in 1891. The total cost of the force was Rs. 6,30,767 against Rs. 6,22,254 in 1891.

14. Four hundred and fifty-eight certificates were granted for hotels, shops for the sale of exciscable articles, and native eating-houses. The fees amounted to Rs. 1,058. The number of licenses for processions with music was 1,408, and the amount of fees realised was Rs. 5,920. Property to the value of Rs. 43,075 was brought to the Police Office as unclaimed, and more than

96 per cent. was restored to its owners.

15. Adjournment of police cases.—The number of cases adjourned was 290 against 289 in 1891, and the Lieutenant-Governor is glad to see that in this respect the improvement which was noticed in the Resolution on last year's report has been maintained during the present year. Of the above number 155

cases were disposed of at the second hearing.

16. Judicial work.—Mr. Pearson officiated as Chief Presidency Magistrate, Calcutta, from the 25th February to the 17th November, during the absence on leave of Mr. Marsden. Nawab Syud Ameer Hossein, C.I.E., was in charge of the Magistracy of the Northern Division throughout the year, except for one month and thirteen days when he was absent on privilege leave, and Maulvi Abdul

Jubbar, Khan Bahadur, officiated for him.

.17. Court of the Chief Presidency Magistrate.—The total number of cases instituted during the year was 13,107, in which 17,415 persons were concerned. Of the accused persons, 1,542 were acquitted or discharged, 15,816 were convicted, and 20 were committed to take their trial before the High Court. The number of persons charged under the Penal Code was 5,983 against 7,110 in 1891. Thirty-two persons were brought up under the European Vagrancy Act, of whom three were discharged, one was imprisoned, twenty-seven were sent to the Workhouse, and one was under trial at the close of the year. The number of persons prosecuted under the Merchants Shipping Act rose from 170 to 583, and of these 545 were convicted. There was only one case under the Excise Act against eight in the preceding year. Out of 3,152 persons prosecuted

for cruelty to animals, 273 were acquitted. The Chief Magistrate remarks that these prosecutions are often not carried on as circumspectly as they should be, and in several instances he has had to dismiss cases against drivers of gharces who have been unnecessarily arrested and sent up by the agents of the Society for the Prevention of Cruelty to Animals. Under the law the Magistrate has not the power to order payment of compensation to the drivers for the loss of their day's work, and they have therefore no redress. These remarks will be brought to the notice of the Society. Substantive sentences of imprisonment were passed on 774 persons, 39 were imprisoned in default of payment of fine, and five in default of furnishing sureties for good behaviour. Sentences of whipping were passed on 33 persons, and in five cases only did the sentence exceed 10 stripes, and in not a single instance did it exceed 20 stripes. The number of juvenile offenders sent to the Reformatory was six against three in 1891. The total value of fines imposed during the year was Rs. 24,641-8-6, of which Rs. 23,841-4-6 were realised. Of the 33 appeals preferred against the orders of the Chief Magistrate, 31 were rejected, and in two the convictions were set aside. The High Court was moved in six cases, in two of which the applications were rejected, in two the convictions were set side, and in two the rule was discharged.

18. Northern Division Court.—The number of cases instituted during the year was 17,545, and in these 21,121 persons were brought before the court, of whom 1,112 were acquitted or discharged, 19,967 were convicted, and 15 were committed to the Sessions. The number of persons sentenced to imprisonment was 733, and 10 juvenile offenders were sent to the Reformatory School. of 24 persons sent up under the European Vagrancy Act, 16 were sent to the Workhouse, 5 were imprisoned and 3 were discharged. Fifty-three persons were sentanced to be whipped, 11 were bound down to keep the peace, and 5 called upon to give security for their good behaviour. The amount of fines imposed was Rs. 30,627-13, of which Rs. 28,107-3 were realised. The amount of Rupees 259 are shown as having been paid as compensation, but the nature of the compensation and the number of cases in which it was awarded have not been specified. Fuller details should be given in future reports, and the number of cases in which compensation is ordered under section 560, Criminal Procedure Code, and the amount so granted, should be separately shown. Processes were issued against 4,802 persons, of whom only 1,591 actually came into court. In cases of intimidation and insult, 997 processes were issued, but only 121 persons appeared to answer the charge against them, and of these 117 were acquitted. In cases of simple hurt and criminal force, processes were issued against 2,618 persons, of whom only 392 appeared. These results are far from satisfactory, and indicate a want of sufficient care in issuing processes and in enquiring into complaints beforehand. Appeals were preferred to the High Court in 73 cases, with the excellent result that in only one was the conviction set aside, while in 6 the sentence was reduced. Of the 15 persons committed to the High Court for trial, 14 were convicted and one was pending trial at the close of the year. Out of 11 cases in which the High Court was moved to set aside the order of the Magistrate, in 5 the rule was discharged, in 3 the conviction was reversed, and in 3 retrial was ordered.

19. Work of the Honorary Magistrates.—The number of cases other than municipal transferred to the Honorary Magistrates for disposal was 2,709, of which 1,689 were offences under the Penal Code, 51 were miscellaneous cases under the Criminal Procedure Code, and 969 were offences under local laws. these the number actually brought to trial was 2,560, in which 4,009 persons were concerned, of whom 2,773 were convicted, 1,230 were acquitted, and 6 were pending trial at the close of the year. Two hundred and seventy-six persons were sentenced to imprisonment, 17 were ordered to be whipped, and 1 juvenile offender was sent to the Reformatory. The total amount of fines imposed was Rs. 6,969-4, of which Rs. 6,467-9 were realised. Twenty-two appeals were preferred to the High Court, but all wore rejected. Of the 9 cases in which the High Court was moved to set aside the order of the Honorary Court, in six the applications were rejected, in two the order was reversed, and in one retrial was directed. These are creditable results, and speak well for the soundness of the decisions given by the Honorary Magistrates. The number of cases which were not disposed of at the first hearing was only 59, and in none

of these were adjournments unnecessarily granted.

Municipal Prosecutions.—The total number of municipal prosecutions before the Honorary Magistrates was 13,253 against 14,103 in 1891. Processes were issued against 13,088 persons, of whom only 7,409 actually appeared in Court and of these 3,660 were acquitted and 3,749 convicted. These figures show that there is a great deal of useless prosecution and process serving which might well be avoided. The total amount of fines imposed in these cases was Rs. 17,972-6-3, of which Rs. 15,243 were realised. In four instances the High Court was moved to 'set aside the order of the Honorary Magistrates in municipal cases, and the result was that in one case the order was upheld, in the second retrial was directed, and in the remaining two the orders were set aside.

The Lieutenant-Governor is glad to notice that the Chief Magistrate is again able to acknowledge the good work done and the valuable assistance rendered by the Honorary Magistrates during the year. The list of attendance shows that out of 97 Honorary Magistrates 42 have attended at least once a mouth, while 16 have attended 20 times or more. Sir Antony MacDonnell desires to thank these gentlemen for the interest they have taken in their work and for the assistance they have rendered to the administration of justice. It is observed, however, that Mr. Marsden again animadverts on the irregular attendance of a few of the Honorary Magistrates who, although invited to attend, have absented themselves without notice, and in some instances after having previously intimated their intention to be present. This is a practice which appears to the attention of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present of the present which cannot be too strongly deprecated both as being a discourtesy to the other Honorary Magistrates, who have been summoned to form a Bench with them,

and also as causing great inconvenience to the parties and all concorned."

22. The Lieutenant-Governor's acknowledgments are again due to Sir John Lambert, the Commissioner of Police, and to Mr. A. B. Barnard, the Deputy Commissioner, for their efficient administration of the department under then control. His Honour also desires to acknowledge the work done by Mr. Pearson, Mr Marsden, and Nawab Synd Ameer Hossein, c.r.e., The names of

the subordinate officers favourably mentioned have been noted.

Ordered that copies of the Resolution be forwarded to the Commissioner of Police, Calcutta, for information and communication to the Presidency Magistrates and to the Commissioner of the Presidency Division, and the Chairman of the Corporation of Calcutta for information.

Ordered also that a copy of this Resolution be published in the Calcutta

Guzetle.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Government of Bengal,

### ENCOURAGEMENT OF SANSKRIT LEARNING IN ORISSA.

### GENERAL DEPARTMENT-EDUCATION No. 310T.-G.

Darjeeling, the 22nd June 1893.

#### RESOLUTION.

Read the following papers on the subject of the encouragement of Sanskrit learning in Oriesa:—

Letter from the Director of Public Instruction, No. 8321, dated the 26th October 1892, and its enclosure.

Letter to the Director of Public Instruction, No. 3130, dated the 16th November 1892.

Letter from the Director of Public Instruction, No. 9206, dated the 6th December 1892.

Letter to the Director of Public Instruction, No. 53, dated the 6th January 1893 Letter from the Director of Public Instruction, No. 2417, dated the 20th April 1893, and its enclosures:

In pursuance of the policy of encouraging indigenous institutions for the teaching of Sanskrit which was initiated by Sir Ashley Eden in 1878 and has since been maintained, Mahamahopadhyaya Mahesa Chandra Nyayaratna, C.I.E., Principal of the Sanskrit College, Calcutta, was authorized under the orders of this Government to visit Orissa, in the hope that his presence and personal influence might induce the leading men of that province to organise effective measures for the revival of Sanskrit studies, and for their more active prosecution in future.

2. From the report now received, it appears that the Pandit's visit has evoked considerable enthusiasm for the extension of Sanskrit teaching, and that Associations have been established for the promotion of the study of Sanskrit at the following places:—

(1) At Puri, the Jagannath Sunskrit Samiri has been formed with 57 members, and Mohant Raghunandan Ramaniya Das, head of the Emar Matha, has consented to pay all expenses of holding the Sanskrit examinations under the Society for the first three years, the expenditure being estimated at Rs. 200 per annum.

(2) At Cuttack, 64 persons have joined the Orissa Sanskrit Samiti, and annual subscriptions, amounting to Rs. 700, have been promised for the maintenance of the Association and to carry out its objects.

(3) At Balasore, the Balasore Sarskrit Samiti numbers 61 members, and the President of the Committee, Raja Baikantha Nath De, Bahadur, has promised a subscription of Rs. 150 snnually to the funds of the Society.

• 3. Pandit Mahesa Chandra Nyayaratna also visited the Kanika Tributary estates at Ganja in the Cuttack district. The present Raja is a minor, and the estates are under the management of the Court of Wards. The Manager of the estates, an officer of the Subordinate Executive Service, expressed his opinion that the estates ought to do something for the promotion of Sanskrit learning, and that Rs. 1,000 a year should be expended for the purpose from the revenue of the estates. This suggestion will be considered by Government in the Revenue Department.

in the Revenue Department.

4. The Raja of Mourbhanj has agreed to the Pandit's proposals to keep up two tols at his own expense—one at a cost of Rs. 6,440 annually at Mourbhanj, and the other at Balasore, at a cost of Rs. 1,560.

5. The Lieutenant-Governor has read with interest the report of Mahamahopadhyaya Mahesa Chandra Nayaratna and of the Director of Public Instruction, and desires that the thanks of Government may be conveyed to the former. His Honour agrees with Dr. Martin that the visit of the Pandit to Ofissa has been a success, and that the Associations which have been formed should be brought under the general scheme for the award of Government stipends to indigenous Sanskrit tols, sanctioned in Government notification No. 634, dated the 16th February 1893.

His Honour also desires to invite the co-operation and support of the wealthy nobility and gentry in Orissa in the furtherance of the study of Sanskrit in that province.

Order.-Ordered that a copy of this Resolution be forwarded to the Director of Public Instruction for information and guidance, and for communication to Pandit Mahesa Chandra Nyayaratna.

Ordered, also, that a copy of the Resolution be published in the Calcutta

Gazette.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY, Secretary to the Govt. of Benga

### REPORT ON THE WORKING OF THE JUTE WAREHOUSE AND FIRE-BRIGADE ACT IV OF 1883 IN THE HOWRAH MUNICIPALITY DURING THE YEAR 1892-93.

The following report is published for general information.

J. A. BOURDILLON,

Offg. Secy. to the Govt. of Bengal.

### Dated the 13th May 1893.

From-G. A. GRIERSON, Chairman, To-The Magistrate of Howrah.

I have the honour to report on the working of the licensed warehouses in this Municipality for the year 1892-93.

There were (32) thirty-two warehouses licensed during the year for the storage of jute and cotton only. This shows an increase of one over last year, with a corresponding increase of Rs. 350, and is accounted for as follows:-

An extra warehouse yielding Rs. 50.

(2) An increase of Rs. 100 from the warehouse of Messrs. Jumna Das and Broma Datta.

(3)Receipts from jute exposed on chur land for drying, and further in cases where jute has been stored for short periods.

A classified list of warehouses licensed during the year is given in Appendix A.

No new warehouses were established during the year.

The total receipts amounted to Rs. 6,650 from license fees only, and from fines under section 11 of Act IV of 1884, Rs. 27, made up as shown below:-

Mr. N. P. Guzdar Rs. 25, and Gozar Mul Marwari Rs. 2.

The expenditure under inspection of jute warehouses amounted to Rs. 5,823-10-9, and is given in detail below :--

		172.	Α.	Р.
80 per cent. contribution to Fin	re-brigade (Rs. 40 being in			
payment of arrears for 1891-9;	2)	5,360	0	0
Salary of Inspector	***	196	14	0
Site for Fire brigade barrack	•••	120	0	0
Contingencies	•••	146	12	9
	Total	5.823	10	9

The Fire-brigade establishment, as hitherto, remained under the control of the Commissioner of Police, Calcutta. The Fire-brigade station is most centrally situated, standing next to the Municipal Market, and in such a position is well located to overlook the whole town in case of fires occurring.

There were (4) four fires during the year. A statement showing the particulars of

each fire, with respective destruction of property, is given, vide Appendix B.

Additional expenditure incurred during the year irrespective of the amount expended by the Commissioner of Police, Calcutta, is as follows:-

⁸⁰ per cent. paid to the Commissioner of Police—Rs. 5360.

APPENDIX A.

### APPENDIX B.

Statement showing the particulars of fires which occurred in Howrah during the year 1892-93.

DATE.	Locality of fire with section letter.	Time of occurrence of fire.	Time of alarm of fire.	Time of sprival of Brigade.	Nature of property destroyedswith approximate value and whether insured or not.	Cause of fire.	Remarks.
9th April 1892	Kekrapara Chatterji Hat outpost, Subpur thana.	12 midnight	12-10 A.M.	12-25 A.M.	Three small stacks of straw. Value Rs. 60. Not insured.	Unknown	All out at 2-15
14th November 1892.	Charae Bagan Road, Sibpur thana,	10-5 P.M	10-20 г.м.	10-80 P.M.	Three thatched houses. Value Rs. 100. Not insured.	Pitta	All out at 11-30
3rd Fobruary	Khettra Mittra's Lane, Golabari thana.	S-45 A.M	3 50 A.M.	4 A.M	One large tiled house. Value Rs. 100.	Ditto	All out at 4-30 •
26th March 1893	Bakhsara, Sibpur	10 P.M	10-30 P.M.	11 Р.ж	Twelve tiled hats. Value Bs. 700.	Ditto	All out at 4

### Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 24th June 1893.

1	No.	District an		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects								
BEN	NGA	L.	•										
• [	1	Busdwan	June 24, '93	4.88	Weather-rainy. Aman being sown. Fodder and water sufficient. Prices of common rice:-								
•		•••	•		System								
	2	Bankura	. 1, 24, 193	8:16	Weather—cloudy with occasional heavy showers. Rain excessive. Sowing of aman still going on. Transplanting of aus nearly finished, that of aman begun. Common rice selling at 111 seers per rupee at the Bankura market.								
)IT%.	3	Birbhum	" 24, [°] 93	4.90	Weather—raining every day of the week. Sugarcane which has been lately transplanted does not look healthy owing to the continued rain. Sowing of paddy going on. Price of common rice 12 to 14½ seers per rupes.								
BURDWAN DIVE	4	Midnapore	,, 21, '93	9-86	General rain. Floods reported from Ghatal. Crops on low lands must have been injured, but full reports not yet received. Prices of common rice:— Srs.								
BTR		•	•		Sadar 10 Tamluk 11 Contai 12								
	5	Hooghly	" 24, 'y3	8.77	Weather—exceptionally persistent and heavy rain. Jute and aus doing well.  Aman cultivation progressing. Pro-pects generally very good, although the lowest lands may suffer from flooding. Prices of common rice:—								
		•	•										
	6	Howrah •	., 24, '93	16.59	Weather—abnormally wet. Cultivation progressing. Sugarcane and vegetables doing well. Rice on low lands drowned, but that on high lands greatly benefited. Condition of cattle good. Fodder and water-supply ample. Price of rice 10 to 11 seers per rupee.								
•	7	24-Furgana	,, 24, '93 •	16.72	Weather—rainy. Aman and aus on high grounds doing well. Jute suffering from heavy showers. Preparation of land and planting and sowing of rice on low lands seriously retarded by excess of water. Price of common rice varies from 10 to 13 ¹ / ₁ seers per rupee.								
Віти.	8	• Nadia	, 24, '98	7:54	Westher—wet and cool. Some damage has been done to paddy on low lands by the excessive rain. Weeding and harrowing have been checked by it.								
PRESIDENCY DIVE	y	Khulna	,, 24, '93	8.62	Prices stationary.  Weather—rainy. Prospects of ans, aman and jute good, but in some places weeding and transplanting being retarded by the incessant rain. Prices stationary. Fodder and water for cattle sufficient.								
	10	Jessors	,, 24, '93	8-90	Weather—cloudy and rainy. The rainfall of the week has submerged the aus and aman plants grown on low lands, and may cause injury if the water does not subside early. It has caused injury to aman crop in the Narail subdivision. Young jute and aus plants on high lands doing well. Prospects of indigo good. Prices of rice have risen.								
	11	Myrshidabad	,, 24, '93	10.46	Weather—cloudy and rainy. Transplanting of aman continues. Harvesting of til finished, and that of indigo going on. Jute, numberry and sugarcane promising. Fodder available for cattle. Common rice sells at 11 seers per rupes.								

					Adaptive to the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the st

mean pressure temperature &c., are	deduced from	the trace	a of the Bar	oranh a	

The mean pressure, temperature. &c., are deduced from the traces of the Barograph and Thermograph. and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground. .

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

e, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

replanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period.

The humidity of the atmosphere is expressed at percentage, asturated air being presented by 0. A clear sky is denoted by 0 and an overcass any by 01 required the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations of the rainfall at the subdivisional stations. A raing day is one of the subdivisional stations in the district sending in returns divided by the number of seations. A raing day is one of

Explanation...... indicates that no rain has allen. If the return for any day has not been received, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the dediction of a rainy day is when a CALCUITA, the 27th June 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFAEL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSER-TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., VATIONS SATURDAY, THE 24TH OF JUNE 1893.

The weather of the past week has been remarkable for the large oscillations of pressure which prevailed over the whole province, but which were more striking in the southern districts. It was probably owing to the fact that the larger changes occurred in Lower Bengal that unusually heavy rain has fallen in South-West and East Bengal and in parts of South Bihan and Chota Nagpur, while, as a result of the heavy rainfall, temperature has been

unusually low in these districts.

At the beginning of the week pressure was above the normal by small amounts and was changing very slightly; the wind circulation was almost normal, that is, south-westerly in Orissa, Chota Nagpur and South-West Bengal, and south-easterly or easterly elsewhere. Ordinary south-west mondon weather was general, and moderate rain was falling in all Ordinary south-west monsoon weather was general, and moderate rain was falling in all districts except Orisss and the more northern districts of North Bihar. On the 19th, the second day of the week, a rapid fall of pressure began, and this, besides causing much steeper gradients over the Bay, must have led to the heavy rain which fell on that day in East Bengal. The fall of pressure continued slowly during the 20th, but local disturbances occurred and brought unusually heavy rain in places. The heaviest falls were in South-West Bengal, where Calcutta and Howrah received more than 8 inches, and in the Darjeeling Hills; elsewhere general, but not heavy, rain fell. A rapid rise then commenced, and the pressure distribution from being considerably in defect became practically normal on the 21st, and above it on the 22nd by amounts varying from 02 inch in East Bengal to 1 inch in Orissa. At the same time minfall became more scattered in the western districts, and though it was general in the castern and central districts, amounts were very variable and were due in part to local disturbances. During the last two days of the week pressure was again falling, very rapidly in South-West Bengal on the 23rd, and rapidly in East Bengal on both days. The resulting distribution was unusual, because of a depression which appeared over South-West Bengal on the 23rd with gradients sufficiently steep to cause light cyclonic winds in all districts except Bihar, where directions were still easterly. Very heavy rain fell in this area of lowest pressure, especially in the Midnapore and Bankura districts. On the 24th lowest pressure was in East Bengal, where there was defect of a quarter of an inch, but the degression did not extend beyond the western boundary of the province, where readings were very nearly normal. Rainfall on this day was general except in the extreme west, but amounts were not nearly as heavy as on the previous day.

Throughout the whole week steep gradients prevailed in the Bay, and weather was of

ordinary south-west monsoon character.

• Pressure.—Notwithstanding the large oscillations referred to above, the mean pressure r the week does not differ much from the normal. The means are below the normal everyfor the week does not differ much from the normal.

where generally by less than a twentieth of an inch.

Temperature.—Owing to the cloudy weather which has prevailed, day temperatures have been steadily below the normal by variable amounts up to 10°. During the night, readings were much more nearly normal, and occasionally exceeded the normal by one or two degrees. Greatest defect was in Chota Nagpur in the early part of the week, and latterly in Lower Bengal after the depression developed there. During these last two days of the week mean daily temperature increased in North Bengal and North Bihar, and exceeded the normal for the only time during the week. The means for the week are all much below the normal, in Chota Nagpur and South Bihar by nearly 5°, in South-West and East Bengal by about 4°, in North Bihar by 2.5°, North Bengal by 2°, and Orissa by 1.7°.

Rejective has been almost general throughout the most in all districts the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the

Rainfull has been almost general throughout the week in all districts except Orissa and North Binar, where the falls were scattered and generally light. The rainfall in Lower Bengal has been unusually heavy, but at the same time irregular in its distribution, as in many cases it was caused by local disturbances. In such cases it is not unusual to find a fall of 6 to 10 inches at one station, and comparatively light falls, possibly of less than 1 inch, at neighbouring stations. During the past week many such instances may be found by reference to the tables herewith given, but further reference to them is unnecessary, as they

are of only passing interest.

The districts which have received fairly uniform heavy falls are the 24-Parganas, Nadia, Murshidabad, Chittagong, Backergunge, Noakhali, Faridpur, Dacca and Mymensingh. Nearly all the reafful stations in these districts have received 10 inches, and in some cases many more. In North Bihar the falls have generally been under 2 inches, the exceptions being Bhagalpur, Banka and Colgong in the Bhagalpur district, which received each about 6 inches. In South Bihar falls are rarely under 3 inches, and at many places between 5 and S inches.

The average fall in East Bengal is 12.41 inches, and in South-West Bengal 8.24, both being about three times the normal amount for the week. South Bihar has received more than twice the normal, Chota Nagpur 1.13 inches excess, and North Bengal 31 inch excess. In Orissa there is defect of '43 inches, and in North Bihar '46 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 24th of June 1893:—
